GENERAL DESCRIPTION.

This township consists of level and rolling land, except for the NE. corner, which is mountainous. The vegetation is yucca, greasewood and cacti. There is no timber. The soil varies from sandy, 2nd rate, to rocky; 4th rate.

Many shallow washes traverse the Tp., most of which lead into Sacramento Wash, which flows northwesterly through the township.

There are many dim, sand blown roads in the township, connecting with main roads, which lead to Whitehills and Gold Basin.

Two telephone lines cross the township, with a branch line leading to Kemple's camp, in the NW. quarter of sec. 31.

Survey commenced Apr. 1, 1915, and executed jointly by H. G. Bardsley, U. S. Surveyor, and Royston C. Durnford, U. S. GENERAL DESCRIPTION.

This township is very rough and hilly, except for the
 northeast corner, which is rolling land. The drainage in
 the southern part of the township is largely to the west
 and northwest, but in the northern part, the drainage is
 easterly and westerly from a central range of mountains
 running north and south. The soil consists of sand,
 gravel and stone, the latter predominating. Vegetation
 is greasewood and cacti. There is no timber.
 U. S. L. M. No. 1101, Minnesota District, is located
 in the northeast quarter of sec. 4. Mocking Bird Mill,
 Assay Office, Cook House and Bunk House are located near

the line between secs. 15 and 22. There are a few deserted cabins in the township, but no settlers. There is a spring in the south-east quarter of sec. 25.
