FIELD NOTES

OF THE SURVEY OF THE

West boundary,

North boundary, and

Subdivision lines

of

TOWNSHIP 26 NORTH, RANGE 12 WEST

(In the Hualpai Indian Reservation)

Of the Gila and Salt River Base and *Meridian,*

In the State of Arizona

EXECUTED BY

Dupreee R. Averill

and

James C. O'Brien

In the capacity of U. S. Surveyors, under Special Instructions dated February 26, *19*20, *issued by the United States Surveyor General to govern surveys included in Group No.* 109 Ariz., *which were approved by the Commissioner of the General Land Office,* March 10, *19*20, *and Assignment Instructions dated* September 10, *19*20

Survey commenced October 7, *19*20

Survey completed November 10, *19*20

For dates of survey of this line, see Book "E" of Group 108.

For dates of survey of this line, see Book "E" of this survey.

Black lines indicate surveys by Dupree R.Averill, U.S.S., on dates shown thereon.

Red lines indicate surveys by James C.O'Brien, U.S.S., on dates shown thereon.

Green lines indicate surveys under Group 108.

Surveys hereinafter described executed by Dupree R. Averill and James C. O'Brien,U.S.Surveyors, on dates shown on diagram on page 1 hereof, using respectively Buff solar transit No.9223 and Young and Sons' light mountain transit No.8389. For description of instruments and certificate of approval, see Book "B".

Unless otherwise specified, all measurements are made with a Lufkin steel tape,5 chs.in length,compared with a Chesterman standard steel tape and found correct. The measurements are made on the slope, the vertical angles determined and the slope measurements properly reduced to true horizontal distances.

We examine the adjustments of the transits and correct all errors; then, , to test the solar apparatus, by comparing their indications, resulting from solar observations made during a.m.and p.m.hours with a meridian determined by observations on Polaris at elongation, we proceed as follows:

Nov.1,1920: at our camp at Milkweed Tank, near the center of sec.10,T.26 N.,R.12 W.,G.and S.R.B. and M., lat.35°39½'N.,long. 113°33'W., at 4 hrs.48.5 M. a.m., l.m.t.,we observe Polaris at western elongation, in accordance with the Manual of Instructions, and mark a point in the line thus determined by a tack in stake, firmly driven in the ground, 5 chs.N.of our station.

At 8 hrs. 0 m.,a.m.,l.m.t.,we lay off the azimuth of Polaris, 1°22½' to the east, and mark a point in the true meridian thus determined by a tack in a stake, firmly set in the ground, 5 chs. N. of our station.

At 9 hrs.0 m.,a.m.,l.m.t.,we set off 35°39½'N.,on the lat.arcs; 14°27½S.on the decl.arcs; and determine a meridian with each solar which agrees with the true meridian.

At apparent noon, with the lat.arcs.unchanged, we observe the sun on the meridian with each solar; the resulting decl.with each solar is 14°30½'S.,which is the computed decl.of the sun.

At 3 hrs.0 m.,p.m.,l.m.t.,with the lat.arcs.unchanged, we set off 14°32½'S.,on the decl.arcs.and determine a meridian with each solar, which agrees with the true meridian.

As all of the solar observations during the usual hours of solar work come within 1'30" of the true meridian, we conclude that the adjustments of the solar are satisfactory.

Survey of the
West Boundary of T. 26 N., R. 12 W.

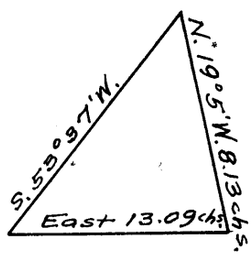
275 lks. dist., marked T27N R12W S31 BT.
A cedar, 6 ins. diam., brs. S.56°E.,
283 lks. dist., marked T26N R12W S6 BT.

Land, rolling.
Soil, gravelly loam, 2nd and 3rd rates.
Timber, cedar.
Undergrowth, sagebrush.
Good grass.

Chains. From the cor. of Ts. 26 and 27 N., Rs. 11 and 12 W., which is an iron post, 3 ins. diam., properly marked, set in a mound of stone, witnessed by a mound of stone S. of post, as described in the field notes of current Group 108,
West on a random line, along the N. bdy. of T. 26 N., R. 12 W., setting temp. ¼ sec. and sec. cors. at intervals of 40.00 chs. to the 278.73 ch. point, where the precipitous nature of the country prevents direct measurement by chaining. Set a flag ahead on line, and from the 278.73 ch. point, measure a base N.19°05'W., 8.13 chs. from the N. end of which, flag brs. S.53°37'W. The three angles of the triangle are therefore 36°23', 72°42' and 70°55', the sum of which is 180°. The distance triangulated is given by the sine proporation:



$$\frac{X}{8.13} = \frac{\sin. 72°42'}{\sin. 36°23'}$$

log. 8.13	=	0.910091
log.sin.72°42'	=	9.979895
		0.889986
log.sin.36°23'	=	9.773190
log. X	=	1.116796

X = 13.09 chs. which added to 278.73 chs., gives

291.82 Continue West on a random line, along the N. bdy. of T. 26 N., R. 12 W.

517.45 Fall 43 lks. N. of the cor. of Ts. 26 and 27 N., R. 12 W., hereinbefore described. The falling answers to a correction of 0°03', or 7 lks. S. per mile, counting from the NE. cor. of the Tp.

Therefore from the NW. cor. of the Tp.
N.89°57'E. on a true line, bet. secs, 6 and 31.

The continued satisfactory adjustment of the solar apparatus during the survey of this township is indicated from field tests as described in Book "F".

GENERAL DESCRIPTION.

This township consists mostly of level or gently rolling land, supporting on its 2nd and 3rd rate gravelly land, a good growth of grass and a scattering growth of cedar timber and sagebrush undergrowth. Near the centerof sec. 10, at Milkweed Tank, which is an artificial body of surface water resulting from damming a shallow wash, are found corrals and a house. There is no other water in the township, nor are there any settlers. Roads run from Milkweed Tank to Milkweed Spring and to Peach Springs.
