FIELD NOTES

OF THE SURVEY OF THE

Part of East boundary,

West boundary,

Part of North boundary, and

Subdivision lines

of

TOWNSHIP 27 NORTH, RANGE 12 WEST,

(In the Hualpai Indian Reservation.)

Of the Gila and Salt River Base and Meridian,

In the State of Arizona.

EXECUTED BY

Dupree R. Averill and James C. O'Brien,

U. S. Surveyors, and

Glenn F. Sawyer, U.S. Transitman,

In the capacity of U. S. Surveyors, under instructions dated February 26, 1920, issued by the United States Surveyor General to govern surveys included in Group No 109, Ariz., which were approved by the Commissioner of the General Land Office, March 10, 1920, and Assignment Instructions, dated September 10, 1920, November 22, 1920, and April 19, 1921.

Survey commenced November 9, 1920

Survey completed June 16, 1921.

For dates of survey of this line, see Book "E" of this Group

- Black lines indicate surveys by Dupree R. Averill, U. S. S., on dates shown thereon
- Red lines indicate surveys by James C. O'Brien, U. S. S., on dates shown thereon.
- Blue lines indicate surveys by Glenn F. Sawyer, U. S. T., on dates shown thereon.

Surveys hereinafter described executed by Dupree R. Averill and James C. O'Brien, U. S. Surveyors, and Glenn F. Sawyer, U. S. Transitman, on dates shown on diagram on page 1 hereof, Averill using Buff solar transit No. 9223, O'Brien and Sawyer using Young and Sons' light mountain transit No. 8389. For description of instruments and certificate of approval, see Book "B".

Unless otherwise specified, all measurements are made with a Lufkin steel tape, 5 chs. in length, compared with a Chesterman standard steel tape and found correct. The measurements are made on the slope, the vertical angles determined and the slope measurements properly reduced to true horizontal distances.

We examine the adjustments of the transits and correct all errors; then, to test the solar apparatus, by comparing their indications, resulting from solar observations made during a. m. and p. m. hours with a meridian determined by observations on Polaris at elongation, we proceed as follows:

Nov. 7, 1920: at our camp at Milkweed Tank, near the center of sec. 10, T. 26 N., R. 12 W., G. & S. R. B. & M., lat. $35^{\circ} 39\frac{1}{2}'$ N., long. $113^{\circ} 33'$ W., using the meridian established as described in Book "E", at 9 hrs. 0 m., a. m., 1. m. t., we set off $35^{\circ} 39\frac{1}{2}'$ N., on the lat. arcs; $16^{\circ} 18'$ S. on the decl. arcs; and determine a meridian with each solar which agrees with the true meridian.

At apparent noon, with the lat. arcs unchanged, we observe the sun on the meridian with each solar; the resulting decl. in each case is $16^{\circ} 21'$ S., which is the computed decl. of the sun.

At 3 hrs. 0 m., p. m., 1. m. t., with the lat. arcs unchanged, we set off $16^{\circ} 22\frac{1}{2}'$ S. on the decl. arcs and determine a meridian with each solar, which agrees with the true meridian.

As all of the solar observations during the usual hours of solar work come within $1' 30''$ of the true meridian, we conclude that the adjustments of the solar are satisfactory.

1920

I return to the 45.84 ch. point, on offset line, 10 chs. west of sec. line, and traverse as follows:

East 6.47 chs.
N. 12° W. 1.97 "
South .01 "
East .20 "

To a point 3.74 chs. west of the true point for ¼ sec. cor. of sec. 12, T. 27 N., R. 13 W.

47.76 (40.00 chs. northing from the cor. of secs. 12 and 13, T. 27 N., R. 13 W.) Set an iron post, 3 ft. long, 1 in. diam., 15 ins. in the ground, with marked (X) stone, for witness cor. to ¼ sec. cor. of sec. 12, T. 27 N., R. 13 W.; and raise a mound of stone around post, with brass cap marked

¼ S 12 W C
1920

Cor. stands at foot of cliff, 20 ft. high, facing W. From this cor., line ascends out of canyon, over cliffs impossible to chain, and the rim of canyon is invisible. The only way by which this line can be surveyed is to find a point on the north rim of canyon, on the range line, and triangulate back to some point in the canyon. For this purpose, the flag set at 70.72 chs. on the W. bdy. of sec. 18 is most suitable. Determine such

a point on the N. rim of canyon, and measure a base S. 84° 51' W., 8.44 chs. - no longer can be obtained - from the W. end of which, flag at the 70.72 ch. point on the W. bdy. of sec. 18 brs. S. 4° 39' E. The three angles of the triangle are 4° 39', 90° 30' and 84° 51', the sum of which is 180°. The distance triangulated is given by the sine proportion:

$$\frac{X}{8.44} = \frac{\sin. 90^\circ 30'}{\sin. 4^\circ 39'}$$
$$\log. 8.44 = 0.926342$$
$$\log. \sin. 90^\circ 30' = 9.999983$$
$$\log. \sin. 4^\circ 39' = 8.908853$$
$$\log. X = 2.017472$$
$$X = 104.10 \text{ chs.}$$

which added to 70.72 chs., gives 174.82 chs., or 14.82 chs. North of the point for cor. of secs. 6 and 7.

Survey of the West Boundary
of T. 27 N., R. 12 W.

Chains To establish a witness cor. to cor. of secs. 6 and 7, T. 27 N., R. 12 W., I traverse as follows from triangulation point

1920

80.00 The true point for cor. of secs. 22, 23, 26 and 27 falls on cliff, 50 ft. high, brs. NE. and SW.

Land, level and rolling.

Soil, gravelly loam, 3rd and 4th rates.

Timber, none.

Undergrowth, sagebrush and cactus.

In order to survey the line bet. secs. 25 and 26, I proceed as follows: from a point 1.85 chs. N. $0^{\circ} 1'$ W. of the true point for cor. of secs. 22, 23, 26 and 27, which is inaccessible, set a flag ahead on a bearing N. 87° E., and another flag on a bearing N. $0^{\circ} 20'$ E. From the last flag I run to the first flag,
S. $53^{\circ} 48'$ E., 27.39 chs.,

Survey of Part of the Subdivision
of T. 27 N., R. 12 W.

BOOK 3554

Chains

and compute the length of the line on the bearing N. 87° E. from the sine proportion. The three angles of the triangle are 86° 40', 54° 8' and 39° 12', the sum of which is 180°. The distance triangulated is given by

$$\frac{X}{27.39} = \frac{\sin. 54^\circ 8'}{\sin. 86^\circ 40'}$$

log. 27.39 = 1.437592
 log. sin. 54° 8' = 9.908690
 —————
 log. sin. 86° 40' = 1.346282
 log. X = 9.999265
 —————
 X = 1.347017
 X = 22.23 chs.

The latitude and departure of this line are 1.16 chs. N. and 22.20 chs. E., and the total northing from the true point for cor. of secs. 22, 23, 26 and 27, is 1.16 chs. + 1.85 = 3.01 chs.

Thence S. 81° E., 17.83 chs., on traverse line. The latitude and departure of this line are S. 2.79 chs. and E. 17.61 chs., which gives the total easting of 39.81 chs. and a total nothing of .22 chs.

Thence East .19 chs. and South .37 chs., to a point on the random line, 40.00 chs. S. 89° 47' E., of the true point for cor. of secs. 22, 23, 26 and 27, where I set temp 1/4 sec. cor.

Thence, S. 89° 47' E., on a random line, bet. secs. 23 and 26.

79.88 Intersect N. and S. line, 46 lks. S. of the cor. of secs. 23, 24, 25 and 26.

Thence, S. 89° 53' W. on a true line, bet. secs. 23 and 26. Over rolling land, through scattering undergrowth.

2.05 Wash, 10 lks. wide, course NW.

5.00 Same wash, course SW.

16.80 Wash, 30 lks. wide, course NW. Asc. 200 ft.

39.94 Spur, slopes N. Set an iron post, 3 ft. long, 1 in. diam., 27 ins. in the ground, for 1/4 sec. cor., marked on brass cap

$$\frac{1}{4} \frac{S 23}{S 26}$$

1920

And raise a mound of stone, 2 ft. base, 1 1/2 ft. high N. of cor.

Thence by triangulation and traverse, as hereinbefore described, over mountainous land.

79.88 The true point for cor. of secs. 22, 23, 26 and 27, witnessed 0.20 chs. S. 0° 1' E., as hereinbefore described.

Land, rolling and mountainous.

Soil, rocky, 4th rate.

Timber, none.

Undergrowth, sagebrush, catclaw and cactus.

Because of the mountainous nature of the country, it is impossible to measure directly the section line bet. secs. 22 and 23. I therefore use the triangulation hereinbefore described in the survey of the line bet. secs. 23 and 26, from which I compute the length of the line bearing N. 0° 20' E. from a point N. 0° 1' W., 1.85 chs. from the true point for cor. of secs. 22, 23, 26 and 27.

$$\frac{X}{27.39} = \frac{\sin. 39^\circ 12'}{\sin. 86^\circ 40'}$$

Survey of Part of the Subdivision
of T. 27 N., R. 12 W.

Chains

log. 27.39 = 1.437592
 log. sin. 39° 12' = 9.800737
1.238329
 log. sin. 86° 40' = 9.999265
 log. X = 1.239064
 X = 17.34

The total northing of the line from the true point for cor. of secs. 22, 23, 26 and 27 is therefore 17.34 + 1.85 = 19.19 chs. Thence West 10. lks. to true line bet. secs. 22 and 23 and continue

- 19.19 N. 0° 1' W., bet. secs. 22 and 23.
Over rolling land, through scattering undergrowth.
- 22.50 Draw, course W., 480. ft. below cor.
- 31.50 Wash, 15 lks. wide, course S. 80° W. Asc. 80 ft.
- 40.00 Set an iron post, 3 ft. long, 1 in. diam., 26 ins. in the ground, for 1/4 sec. cor., marked on brass cap

And raise a mound of stone, 2 ft. base, 1 1/2 ft. high, W. of cor.

- 40.16 Impracticable to chain from this point. Set a flag ahead on line, and from the 40.16 ch. point, measure a base S. 89° 59' W., 10.97 chs., from the W. end of which, flag brs. N. 44° 22' E. The three angles of the triangle are 45° 37', 44° 23' and 90°, the sum of which is 180°. The distance triangulated is given by tan. 45° 37' X 10.97 = 1.02176 X 10.97 = 11.21 chs., which added to 40.16 chs., gives 51.37 chs.

- 51.37 Top of cliff, 200 ft. high, brs. E. and W. From this point, triangulate again as follows: Set a flag ahead on line, and measure a base N. 89° 59' E. from it 2.49 chs., from the E. end of which, flag at the 51.37 ch. point brs. S. 8° 34' W. The three angles of the triangle are therefore 90°, 81° 25', and 8° 35', the sum of which is 180°. The dist. triangulated is given by tan. 81° 25' X 2.49 = 6.62523 X 2.49 = 16.50 chs., which added to 51.37 chs., gives

- 67.87 Continue ascent, 80 ft. Dist. by chaining.
- 80.00 Set an iron post, 3 ft. long, 2 ins. diam., on bed rock, with marked (X) stone, for cor. of secs. 14, 15, 22 and 23; and raise a mound of stone around post, with brass cap marked

Land, rolling and mountainous.
 Soil, rocky and gravelly loam, 4th and 3rd rates.
 No timber.
 Undergrowth, palo verde and cat claw.

Survey of Part of the Subdivision
of T. 27 N., R. 12 W.

BOOK 3554

Chains N. 89° 53' E., on a random line, bet. secs. 14 and 23.
 40.00 Set temp. 1/4 sec. cor. Impracticable to continue chaining
 from here. Set flag ahead on random line 30 lks. N. of
 the cor. of secs. 13, 14, 23 and 24 and return to

35.33 From this point, measure a base N. 0° 7' W., 13.31 chs. -
 impracticable to secure longer base
 - from the N. end of which, flag
 set on line at the cor. of secs.
 13, 14, 23 and 24 brs. S. 73° 31' E.
 The three angles of the triangle
 are therefore 90°, 73° 24', and
 16° 36', the sum of which is 180°.
 The distance triangulated is
 given by $\tan. 73^\circ 24' \times 13.31 =$
 $3.35223 \times 13.31 = 44.65 \text{ chs.},$
 which added to 35.33 gives

The cor. of secs. 13, 14, 23 & 24

BOOK 3554

- Chains
- 77.15 The witness cor. to cor. of secs. 10, 11, 14 and 15, 2.93 chs. N. 89° 56' E. of true point.
- 77.21 Top of rocky point, on rim of canyon, 700 ft. deep, brs. N. and S.
- 80.08 The true point for cor. of secs. 10, 11, 14 and 15, in inaccessible canyon.
Land, rolling and mountainous.
Soil, gravelly, 3rd rate.
No timber.
Undergrowth, sagebrush and catclaw.

In order to survey the line bet. secs. 10 and 11, I determine a point in the canyon, due north of a flag which is set 17.87 chs. S. and 2.67 chs. W. of the true point for cor. of secs. 10, 11, 14 and 15. I measure a base West 5.00 chs. from the W. end of which, flag brs. S. 5° 13' E. The three angles of the triangle are therefore 5° 13', 84° 47' and 90°, the sum of which is 180°. The distance triangulated is given by $\tan. 84^\circ 47' \times 5.00 = 10.9529 \times 5.00 = 54.76$ chs., or 36.89 chs. North and 2.67 chs. West of the true point for cor. of secs. 10, 11, 14 and 15.

- 40.00 Thence measure North 3.11 chs. and East 2.67 chs. to set an iron post, 3 ft. long, 1 in. diam., on bed rock, with marked (X) stone, for $\frac{1}{4}$ sec. cor.; and raise a mound of stone around post, with brass cap marked

$\frac{1}{4}$

Land, mountainous and rolling.

Survey of Part of the Subdivision
of T. 27 N., R. 12 W.

Chains Soil, rocky, 4th rate, and gravelly loam, 3rd rate.
No timber.
Undergrowth, sagebrush and cactus.

The canyon wall at 27.31 chs. going east bet. secs 3 and 10, prevents the establishment of the $\frac{1}{4}$ sec. cor. of secs. 3 and 10 within 10 chs. of the true point on line, and makes the survey of this mile impossible.

N. $0^{\circ} 1' W.$, on a random line, bet. secs. 3 and 4.
40.00 Set temp. $\frac{1}{4}$ sec. cor.
70.00 At this point, I set temp. witness cor. to cor. of secs. 3, 4, 33 and 34. A flag on the $\frac{1}{4}$ sec. cor. of secs. 4 and 33, brs. N. $76^{\circ} 8\frac{1}{2}' W.$ Thence I run offset line, East 40.00 chs., N. $0^{\circ} 1' W.$, 9.90 chs. to a point on the N. bdy. of sec. 3, due E. of the $\frac{1}{4}$ sec. cor. of secs. 4 and 33. If a line were projected from the 70.00 ch. point on the random line, bet. secs. 3 and 4, to the N. bdy. of Tp., its length would be 9.90 chs., and the three angles of the triangle formed would be $90^{\circ} 1'$, $76^{\circ} 7\frac{1}{2}'$, and $13^{\circ} 51\frac{1}{2}'$, the sum of which is 180° . The distance from the $\frac{1}{4}$ sec. cor. of secs. 4 and 33 along the N. bdy. of Tp. to an intersection with the random line bet. secs. 3 and 4 is found from the sine proportion:

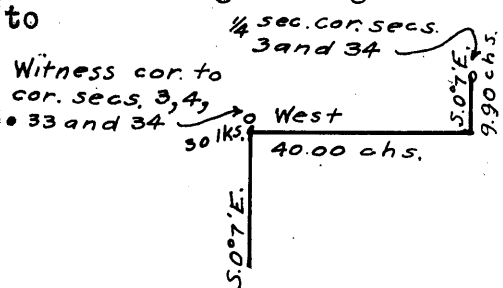

$$\frac{X}{9.90} = \frac{\sin. 76^{\circ} 7\frac{1}{2}'}{\sin. 13^{\circ} 51\frac{1}{2}'}$$

log. 9.90	=	0.995635
log. sin. $76^{\circ} 7\frac{1}{2}'$	=	9.987140
		0.982775
log. sin. $13^{\circ} 51\frac{1}{2}'$	=	9.379345
log. X	=	1.603430
X	=	40.13

I move the point on the N. bdy. bet. secs. 3 and 34, 0.13 chs. W.; and establish the $\frac{1}{4}$ sec. cor. of secs. 3 and 34 as hereinbefore described.

Thence, S. $0^{\circ} 7' E.$, on an offset line, through sec. 3. Over mountainous land, through scattering undergrowth.

Survey of Part of the Subdivision
of T. 27 N., R. 12 W.

Chains It is impracticable to chain bet. secs. 21 and 28, from the cor. of secs. 20, 21, 28 and 29, I therefore set a flag ahead on line on a bearing N. 89° 48' E., and measure a base from the cor. of secs. 20, 21, 28 and 29, N. 0° 27' W., 20.16 chs., from the N. end of which, flag brs. S. 33° 54' E. The three angles of the triangle are 90° 15', 33° 27', and 56° 18', the sum of which is 180°. The distance triangulated is given from the sine proportion

$$\frac{X}{20.16} = \frac{\sin. 33^\circ 27'}{\sin. 56^\circ 18'}$$

$$\log. 20.16 = 1.304491$$

$$\log. \sin. 33^\circ 27' = 9.741316$$

$$\log. \sin. 56^\circ 18' = 9.920099$$

$$\log. X = 1.125708$$

$$X = 13.36$$

The Cor. secs. 20, 21, 28 and 29.

13.36 Triangulation point. Impracticable to chain from here. Set a flag ahead on line, from which I measure a base S. 24° 48' W., 10.91 chs., from the S. end of which the flag at the 13.36 ch. point brs. N. 61° 35' W. The three angles of the triangle are 28° 37', 65° and 86° 23', the sum of which is 180°. The distance triangulated is given by the sine proportion:

$$\frac{X}{10.91} = \frac{\sin. 86^\circ 23'}{\sin. 28^\circ 37'}$$

$$\log. 10.91 = 1.037825$$

$$\log. \sin. 86^\circ 23' = 9.999134$$

$$\log. \sin. 28^\circ 37' = 9.680288$$

$$\log. X = 1.356671$$

$$X = 22.73$$

which, added to 13.36 chs., gives

36.09 Triangulation point. Continue N. 89° 48' E., on a random line, bet. secs. 21 and 28.

N. 0° 5' W., bet. secs. 19 and 20.
 Over mountainous land, through scattering undergrowth.
 It is impossible to chain across Hindu Canyon. I measure
 distance by triangulation, using as a base a line the
 length of which I determine by triangulation as fol-
 lows: Set a flag ahead on line, on N. side of canyon.
 Go to this flag and set a second flag on a bearing N.
 89° 57' E. Measure a base from the first flag, N.
 0° 5' W., 5.00 chs., along sec. line, from the N. end
 of which, the second flag hrs. S. 67° 51' E.

The angles of this triangle are
 therefore 67° 48', 22° 12' and 90°,
 the sum of which is 180°. The
 distance triangulated is given by
 tan. 67° 48' X 5.00 = 12.25 chs.
 From the second flag at the end of
 this base, flag at the cor. of
 secs. 19, 20, 29 and 30 hrs. S.
 16° 7 1/2' W. The three angles of
 this triangle are 16° 10 1/2', 90°
 and 73° 49 1/2', the sum of which is
 180°. The distance triangulated
 is given by tan. 73° 49 1/2' X 12.25 =
 3.44763 X 12.25 = 42.25 chs.

Survey of Part of the Subdivision of T. 27 N., R. 12 W. 3554

Chains The approximate topography from the cor. of secs. 19, 20, 29 and 30 is as follows:
 27.00 South, or left rim of Hindu Canyon, 600 ft. deep, brs. E. and W.
 40.00 The true point for $\frac{1}{4}$ sec. cor. falls where it cannot be established
 42.23 Thence S. $0^{\circ} 3'$ E., 1.00 ch. to
 41.23 North or right rim of canyon, brs. E. and W. Set an iron post, 3 ft. long, 1 in. diam., on bed rock, with marked (X) stone, for witness cor. to $\frac{1}{4}$ sec. cor.; and raise a mound of stone around post, with brass cap marked

80.00 Thence by chaining, N. $0^{\circ} 3'$ W., bet. secs. 19 and 20. Set an iron post, 3 ft. long, 2 ins. diam., 14 ins. in the ground, with marked (X) stone, for cor. of secs. 17, 18, 19 and 20; and raise a mound of stone around post, with brass cap marked

Land, mountainous.
 Soil, rocky, 4th rate.
 Timber, none.
 Undergrowth, sagebrush and cactus.

To survey the line bet. secs. 17 and 20, I begin at the cor. of secs. 16, 17, 20 and 21, and triangulate random line as follows: Set a flag ahead on line, S. $89^{\circ} 55'$ W., and from the cor. of secs. 16, 17, 20 and 21, measure a base S. $0^{\circ} 58'$ E., 21.58 chs., from the S. end of which, flag brs. N. $55^{\circ} 22'$ W. The three angles of the triangle are therefore $34^{\circ} 43'$, $90^{\circ} 53'$ and $54^{\circ} 24'$, the sum of which is 180° . The distance triangulated is found from the sine proportion:

$$\frac{X}{21.58} = \frac{\sin. 54^{\circ} 24'}{\sin. 34^{\circ} 43'}$$

log. 21.58	=	1.334051
log. sin. $54^{\circ} 24'$	=	9.910144
		<u>1.244195</u>
log. sin. $34^{\circ} 43'$	=	9.755508
log. X	=	<u>1.488687</u>
X	=	30.81

30.81 Set temp. witness cor. to $\frac{1}{4}$ sec. cor. Set a flag ahead on line, and from the cor. of secs. 16, 17, 20 and 21, measure a base S. $0^{\circ} 58'$ E., 59.84 chs., from the S. end of which, the flag brs. N. $45^{\circ} 6'$ W. The three angles of the triangle are $44^{\circ} 59'$, $90^{\circ} 53'$ and $44^{\circ} 8'$, the sum of which is 180° . The distance triangulated is given by the sine proportion as follows:

Cor. secs. 16, 17, 20 and 21

20.18 S. 89° 55' W., on a random line, bet. secs. 18 and 19. Impracticable to chain from this point, Set a flag ahead on line, and from the 20.18 ch. point, measure a base N. 3° 21' W., 5.00 chs., from the N. end of which, flag hrs. S. 79° 53' E. The three angles of the triangle are therefore 10° 57', 82° 29' and 86° 34', the sum of which is 180°. The distance triangulated is found from the sine proportion:

$$\begin{aligned} \frac{X}{5.00} &= \frac{\sin. 82^\circ 29'}{\sin. 10^\circ 57'} \\ \log. 5.00 &= 0.698970 \\ \log. \sin. 82^\circ 29' &= 9.996252 \\ &= 0.695222 \\ \log. \sin. 10^\circ 57' &= 9.278645 \\ \log. X &= 1.416577 \\ X &= 26.10 \end{aligned}$$

chs., which added to 20.18 chs., gives 46.28 chs.

46.28 Set temp. witness cor. to $\frac{1}{4}$ sec. cor.
54.26 Impracticable to chain from this point. From this point flag 11.05 chs. N. 0° 5' E. of cor. of secs. 18 and 19 hrs. N. 79° 53' W., and flag 50.51 chs. N. 0° 5' E. of said cor. hrs. N. 51° 7 $\frac{1}{2}$ ' W.

BOOK 3554

Survey of Part of the Subdivision
of T. 27. N., R. 12. W.

Chains

The distance to the flag 11.05 chs. N. 0° 5' E. of the cor. of secs. 18 and 19 is determined from the triangle whose three angles are 28° 45½', 100° 2' and 51° 12½', and side 39.46 chs., as follows:

$$\frac{X}{39.46} = \frac{\sin. 51^{\circ} 12\frac{1}{2}'}{\sin. 28^{\circ} 45\frac{1}{2}'}$$

log. 39.46 = 1.596157
 log. sin. 51° 12½' = 9.891776
 1.487933
 log. sin. 28° 45½' = 9.682250
 log. X = 1.805683
 X = 63.93

Using the distance 63.93 chs., the length of the random line is computed by the sine proportion from the triangle whose angles are 10° 12', 89° 50' and 79° 58', as follows:

$$\frac{X}{63.93} = \frac{\sin. 79^{\circ} 58'}{\sin. 89^{\circ} 50'}$$

log. 63.93 = 1.805705
 log. sin. 79° 58' = 9.993307
 1.799012
 log. sin. 89° 50' = 9.999998
 log. X = 1.799014
 X = 62.95

From the same triangle, the falling is computed:

$$\frac{X}{63.93} = \frac{\sin. 10^{\circ} 12'}{\sin. 89^{\circ} 50'}$$

log. 63.93 = 1.805705
 log. sin. 10° 12' = 9.248181
 1.053886
 log. sin. 89° 50' = 9.999998
 log. X = 1.053888
 X = 11.32

62.95 + 54.26 = 117.21 chs. 11.32 - 11.05 = .27 chs.

117.21 Fall 27 lks. S. of the cor. of secs. 18 and 19, on the W. bdy. of Tp., hereinbefore described.

Chains N. 89° 57' W., on a random line, bet. secs. 7 and 18.
 40.00 Set temp. 1/4 sec. cor.
 74.90 Impossible to chain from this point. Flag on the cor. of
 secs. 7 and 18 brs. S. 89° 54' W. Measure a base N.
 0° 6' W. 10.00 chs., from the N. end of which, flag
 at the cor. of secs. 7 and 18 brs. S. 76° 36' W.
 The three angles of the
 triangle are therefore 76°
 42', 90° and 13° 18', the
 sum of which is 180°. The
 distance triangulated is
 given by $\tan. 76^\circ 42' \times$
 $10.00 = 4.23030 \times 10 =$
 42.30 chs., which added to
 74.90 chs., gives 117.20
 chs. The random line con-
 tinued on its proper bear-
 ing would have intersected
 the W. bdy. 11 lks. N. of
 the cor. of secs. 7 and 18.

117.20 Fall 11 lks. N. of the cor. of secs. 7 and 18, on the W.
 bdy. of Tp., hereinbefore described.
 Thence, East on a true line, bet. secs. 7 and 18.
 Over mountainous land, through scattering undergrowth.
 Distance by triangulation, as hereinbefore described.

The continued satisfactory adjustment of Young and Sons' light mountain transit No.8389 during the survey in 1920 is indicated from field tests as described in Book "G".

Final Field Test of Instrument No. 9223.

I examine the adjustments of the transit and find them satisfactory; then, to test the solar apparatus, by comparing its indications, resulting from solar observations made during a. m. and p. m. hours, with a meridian determined by observations on Polaris at elongation, I proceed as follows:

Nov. 27, 1920: At our camp at Milkweed Tank, near the center of sec. 10, T. 26 N., R. 12 W., G. and S. R. B. and M., lat. 35° 39½' N., long. 113° 33' W., using the meridian established as described in Book "E", at 3 hrs. 0 m., p. m., l. m. t., I set off 35° 39½' N. on the lat. arc; 21° 10½' S. on the decl. arc; and determine a meridian with the solar which agrees with the true meridian. I therefore conclude that the transit and solar have been in satisfactory adjustment during the progress of this survey.

Final Field Test of Instrument No. 8389.

I examine the adjustments of the transit and find them satisfactory; then, to test the solar apparatus, by comparing its indications, resulting from solar observations made during a. m. and p. m. hours, with a meridian determined by observations on Polaris at elongation, I proceed as follows:

June 20, 1921: at our camp at Milkweed Tank, near the center of sec. 10, T. 26 N., R. 12 W., G. and S. R. B. and M., lat. 35° 39½' N., long. 113° 33' W., using the meridian established as described in Book "E", at 3 hrs. 0 m., p. m., l. m. t., I set off 35° 39½' N. on the lat. arc; 23° 27' N. on the decl. arc; and determine a meridian with the solar which agrees with the true meridian. I therefore conclude that the transit and solar have been in satisfactory adjustment during the progress of this survey.

General Description.

This township is very mountainous land, unsurveyable in the northeastern corner, comprising rocky, 4th rate soil supporting a scanty growth of sagebrush and cactus undergrowth over the entire township, and a sparse growth of cedar timber south of Hindu Canyon only. This township is traversed by deep canyons with perpendicular walls; the largest, Hindu Canyon, runs in a westerly direction through the center of the township to its confluence with Spencer Canyon on the W. Bdy. of sec. 18. In this section Spencer Canyon has walls nearly 1500 ft. high, with the bottom of the canyon 2000 to 2300 feet below the bench. Two other deep canyons are found in the northeastern corner. Water is found in Hindu Canyon in sec. 20. There is also water in sec. 29, which can be reached from the bottom of Spencer Canyon only. A trail into Spencer Canyon, crosses the south boundary of sec. 31 about 20 chs. West of the ¼ sec. cor., passes

6 to 8 chs. E. of the cor. of secs. 30 and 31, and crosses the W. Bdy. about 20 chs. North of said cor. There are no settlers in the township, which seems to be suitable for grazing purposes only, although no cattle are run north of Hindu Canyon.

BOOK 3554

CERTIFICATE OF UNITED STATES TRANSITMAN.

I, Glenn F. Sawyer, U.S. Transitman, hereby certify upon honor that, in pursuance of special instructions received from the U. S. Surveyor General, for Group 109, Arizona, bearing date of the 20th day of February, 1920, I have well, faithfully, and truly in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instructions, and the laws of the United States, surveyed all those parts or portions of the West boundary, North boundary, and Subdivision lines of

TOWNSHIP 27 NORTH, RANGE 12 WEST,

of the Gila and Salt River Base & Meridian, in the State of Arizona, and by diagram on page 1 hereof the foregoing field notes as having been executed by me, and under my direction; and that all the corners of said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the U. S. Surveyor General, for Group 109, Arizona, and in the specific manner described in the field notes, and that the foregoing are the original field notes of such survey.
