# FIELD NOTES

OF THE SURVEY OF THE

Second Guide Meridian West, through Ts. 34 N.,

The North Boundary of T.34 N., R.9 W., and

The Subdivisions of T.34 N., R.9 W.

Of the Gila and Salt River Base and Meridian,

In the State of Arizona

## EXECUTED BY

Dupree R. Averill

and

William E. Hiester

In the capacity of U. S. Surveyors, under Special Instructions dated October 12, 1916, issued by the United States Surveyor General to govern surveys included in Group No. 72, Arizona, which were approved by the Commissioner of the General Land Office, October 24, 1916, and Assignment Instructions dated April 3, 1917 and August 11, 1921.

Survey commenced May 2, 1917

Survey completed November 7, 1921.

For dates of execution of survey of this line see Book "F"

2nd Guide Meridian West

For dates of execution of survey of this line see Book "B"

Lines in black surveyed by Dupree R. Averill.

Lines in red surveyed by William E. Hiester.

Survey commenced May 2, 1917, and executed with Young and Sons light mountain transit No. 8480, and Buff and Buff light mountain transits Nos. 9208, 10125, 9977 and 9225; each instrument is equipped with full vertical circle and Smith solar attachment; unless otherwise specified, all azimuth determinations are accomplished with the solar attachment.

Field Test of Instruments No. 8480 and 9208.

April 23, 1917: We examine the adjustments of the instruments and correct all errors; then, to test the solar apparatus, by comparing their indications, resulting from observations made during a.m. and p.m. hours with a meridian established by Polaris observations, we proceed as follows:

April 24, 1917: In camp near the  $\frac{1}{2}$  cor. of secs. 4 & 35 N., R. 9 W., G. and S. R. B. and M., lat.  $36^{\circ}23'N.$ , long.  $113^{\circ}16\frac{1}{2}'W.$ , at 5 hrs. 24.8 m., a.m., l.m.t., we observe Polaris at eastern elongation, making four observations, two each with the telescope in direct and reversed positions, and marking the mean point in the line thus determined on a peg driven firmly in the ground, 5 chs. N.

Azimuth of Polaris at eastern elongation is  $1^{\circ}24'41''$

At 8 hrs. 0 m., a.m., l.m.t., we lay off the azimuth of Polaris,  $1^{\circ}24\frac{1}{2}'$  to the west, and mark the meridian thus determined by a tack driven in a peg set firmly in the ground, 5 chs. N.

At 9 hrs. 0 m., a.m., l.m.t., we set off  $36^{\circ}23'N.$  on the lat. arcs;  $12^{\circ}50\frac{1}{2}'N.$  on the decl. arcs; and determine a meridian with each solar, which we find to agree with the true meridian.

At apparent noon, with the lat. arcs unchanged, we observe the sun on the meridian with each solar. The resulting readings of the declination arcs are  $12^{\circ}52\frac{1}{2}'N.$ , which agree with the computed decl. of the sun.

At 3 hrs. 0 m., p.m., l.m.t., with the lat. arcs unchanged, we set off  $12^{\circ}55'N.$  on the decl. arcs and determine a meridian with each solar, which we find to agree with the true meridian.

As all of the solar observations during the usual hours of solar work come within  $1'30''$  of the true meridian, we conclude that the adjustments of the instruments are satisfactory.

Unless otherwise specified, all measurements are made with a Lufkin steel tape, 5 chs. in length, compared with a Lufkin standard steel tape and found correct. The measurements are made on the slope, the vertical angles determined, and the slope measurements properly reduced to true horizontal distances.

Field tests of Instruments Nos. 10125, 9977 and 9225.

Oct. 2, 1921. We examine the adjustments of the instruments and correct all errors; then, to test the solar apparatus, by comparing their indications, resulting from observations made during a.m. and p.m. hours with a meridian established by Polaris observations, we proceed as follows:

At camp, near the center of sec. 18, T. 33 N., R. 9 W., G. and S. R. B. and M., Arizona, lat.  $36^{\circ}15\frac{1}{2}'N.$ , long.

113°18½'W., at 6 hrs. 52.2 m., p.m., l.m.t., we observe Polaris at eastern elongation, making four observations, two each with the telescope in direct and reversed positions, and marking the mean point in the line thus determined on a peg driven firmly in the ground, 5 chs. N.

Azimuth of Polaris at eastern elongation is 1°23'".  
October 3, 1921.

At 8 hrs. 0 m., a.m., l.m.t., we lay off the azimuth of Polaris, 1°23' to the west and mark the meridian thus determined by a tack driven in a peg set firmly in the ground, 5 chs. N.

At 9 hrs. 0 m., a.m., l.m.t., we set off 36°15½'N. on the lat. arcs; 3°54½'S. on the decl. arcs; and determine a meridian with each solar, which we find to agree with the true meridian.

At apparent noon, with the lat. arcs unchanged, we observe the sun on the meridian with each solar. The resulting reading of the declination arc on each solar is 3°57½'S., which is the computed decl. of the sun.

At 3 hrs. 0 m., p.m., l.m.t., with the lat. arcs unchanged, we set off 4°00' S. on the decl. arcs and determine a meridian with each solar, which we find to agree with the true meridian.

As all of the solar observations during the usual hours of solar work come within 1'30" of the true meridian, we conclude that the adjustments of the instruments are satisfactory.

Unless otherwise specified, all measurements are made with a Lufkin steel tape, 5 chs. in length, compared with a Lufkin standard steel tape and found correct. The measurements are made on the slope, the vertical angles determined, and the slope measurements properly reduced to true horizontal distances.

## BOOK 3620

Survey of the  
2nd Guide Meridian West Through Ts. 34 N.

Chains.

From the cor. of Ts. 34 and 35 N., Rs. 8 and 9 W., which is an iron post, described in Book "H",  
South bet. secs. 1 and 6.  
Over rolling land, through scattering timber and dense undergrowth.

Asc. 185 ft.

40.00 Set an iron post, 3 ft. long, 1 in. diam., 24 ins. in the ground, in a mound of stone, for  $\frac{1}{2}$  sec. cor., marked on brass cap

$$\begin{array}{c} \frac{1}{2} \\ S\ 1\ | \ S\ 6 \\ 1917 \end{array}$$

From which

A pine, 40 ins. diam., brs. S.40 $\frac{1}{2}$ °E.,  
56 lks. dist., marked  $\frac{1}{2}$ S6 BT.

A pine, 32 ins. diam., brs. S.43 $\frac{1}{2}$ °W.,  
265 lks. dist., marked  $\frac{1}{2}$ S1 BT.

Continue ascent, 35 ft.

55.00 Thence over nearly level land.

70.00 Asc. 85 ft.

79.38 Spur, slopes NW. Desc. 10 ft.

80.00 Set an iron post, 3 ft. long, 2 ins. diam., 20 ins. in the ground, in a mound of stone, for cor. of secs. 1, 6, 7 and 12, marked on brass cap

$$\begin{array}{c} T34N \\ R9W\ | \ R8W \\ S\ 1\ | \ S\ 6 \\ \hline S12\ | \ S\ 7 \\ 1917 \end{array}$$

From which

A yellow pine, 16 ins. diam., brs. N.82 $\frac{1}{2}$ °E.,  
113 lks. dist., marked T34N R8W S6 BT.

A yellow pine, 30 ins. diam., brs. S.31°E.,  
168 lks. dist., marked T34N R8W S7 BT.

A yellow pine, 48 ins. diam., brs. S.43 $\frac{1}{2}$ °W.,  
61 lks. dist., marked T34N R9W S12 BT.

A white oak, 14 ins. diam., brs. N.88°W.,  
119 lks. dist., marked T34N R9W S1 BT.

Land, rolling.

Soil, 3rd rate.

Timber, yellow pine and oak.

Undergrowth, scrub oak.

South bet. secs. 7 and 12.

Over rolling and mountainous land, through scattering timber and dense undergrowth.

Desc. 15 ft.

1.48 Gulch, 5 lks. wide, course NW. Asc. 315 ft.

28.44 Trail, brs. E. and W.

37.94 Spur, slopes E. Desc.

40.00 Set an iron post, 3 ft. long, 1 in. diam., 24 ins. in the ground, in a mound of stone, for  $\frac{1}{2}$  sec. cor., marked on brass cap

$$\begin{array}{c} \frac{1}{2} \\ S12\ | \ S\ 7 \\ 1921 \end{array}$$

From which

A pine, 38 ins. diam., brs. S.35°E.,  
119 lks. dist., marked  $\frac{1}{2}$ S7 BT.

A pine, 12 ins. diam., brs. S.61°W.,  
53 lks. dist., marked  $\frac{1}{2}$ S12 BT.

Continue descent, 50 ft.

Survey of the  
2nd Guide Meridian West Through Ts. 34 N.

Chains.

The continued satisfactory adjustment of the solar transits during the survey of this township is indicated from field tests as described in Books "P" and "K".

GENERAL DESCRIPTION.

This township consists of rolling, broken and mountainous land, covered with a heavy or scattering growth of cedar, pinyon, yellow pine, white oak, locust and juniper timber, and sagebrush, white oak, scrub oak, Spanish dagger, mescal manzanita, locust and cactus undergrowth. The soil is generally rock, 3rd and 4th rates. Mt. Logan in sec. 12 attains an elevation of 7700 ft. At the base of and West of Mt. Logan is a serried and washed depression, almost inaccessible, known as Hell's Hollow, from which runs a small stream of water. Sections 1, 2, 3 and 4 drain northerly; the rest of the township drains to the South. There is a spring in sec. 4, which furnishes a constant supply of water. The natural tank in sec. 10 is dry in the spring months. Cold Spring, in sec. 17, delivers a constant amount of good water, but is reached only by pack trail. A pipe line traverses the SE. portion of the Tp. There is a small sawmill in sec. 1. There are no settlers.

William E. Hiester  
U. S. Surveyor.

APPROVAL.

OFFICE OF THE UNITED STATES SURVEYOR GENERAL,

Phoenix, Arizona, May 15, 1924.

The foregoing field notes of the survey of The Second Guide Meridian West, through Ts. 34 N., The North Boundary of T.34 N., R.9 W. and The Subdivisions of T.34 N., R.9 W. of the Gila and Salt River Base and Meridian in the State of Arizona

executed by Dupree R. Averill and William E. Hiester, U.S. Surveyors under special instructions dated October 12, 1916 for Group 72, Arizona, having been critically examined, and the necessary corrections and explanations made, the said field notes, and the surveys they describe, are hereby approved.

Charles M. Donohoe  
U. S. Surveyor General.

I certify that the foregoing transcript of the field notes of the above-described surveys in \_\_\_\_\_, has been correctly copied from the original notes on file in this office.

U. S. Surveyor General.
