OF THE

Resurvey of a Portion of the Gila and Salt River Meridian

Through T. 36 N.;

Resurvey of a Portion of the 9th Standard Parallel North

Through R. 1 W.;

Survey of the West Boundary and the Subdivisional Lines of

Township 36 North, Range 1 West,

Of the Gila and Salt River Meridian,

In the State of Arizona

EXECUTED BY

Charles E. Hunter, U. S. Transitman,

and

Benjamin J. Kinsey, U. S. Surveyor,

In the capacity of U. S. Surveyors, under Special Instructions dated May 1, 1931, issued by the District Cadastral Engineer to govern surveys included in Group No. 168, which were approved by the Commissioner of the General Land Office, May 25, 1931, and Assignment Instructions dated August 5, 1931, and July 27, 1932.

Survey commenced October 19, 1931.

Survey completed August 23, 1932.

The survey was executed by Charles E. Hunter, U. S. Transitman, using Young and Sons transit No. 8584, and Benjamin J. Kinsey, U. S. Surveyor, using Buff and Buff transit No. 16724 and Young and Sons transit No. 8540.

For the description of instrument and test of solar for Young and Sons transit No. 8584, reference is made to the preliminary and final tests of instrument as given in the field notes of the survey of T. 35 N., R. 1 W., surveyed under the current group.

Buff and Buff transit No. 16724 and Young and Sons transit No. 8540 are constructed in accordance with the standard specifications of the General Land Office, and are equipped with the improved Smith solar attachment. The instruments were in good condition and having been placed in satisfactory adjustment prior to beginning the survey, and tested and found free from appreciable error were approved by the district cadastral engineer on July 27, 1932. All of the instrumental adjustments were examined before making the field tests hereinafter described.

The directions of the lines were determined by solar transit method. The measurements were made with Lufkin 5 chain steel tapes compared with a Lufkin standard steel tape and found correct. The measurements were made on the slope, and the vertical angle of each interval was ascertained with a clinometer in good adjustment; the horizontal equivalents are entered in the field note record.

The data furnished with the special instructions gives the geographical position of the SE. cor. of T. 36 N., R. 1 W., as follows: latitude $36^{\circ} 28' 03''$ N.; longitude $112^{\circ} 21' 23''$ W.

August 2, 1932: in camp which is situated near the corner of secs. 10, 11, 14 and 15, T. 36 N., R. 1 W., G. & S.R.B. and M., Arizona, at 10h 54.7m p.m., l.m.t., I observe Polaris at eastern elongation, making two sights each with telescope in direct and reversed positions, and mark the mean point of the line thus determined by a nail in top of stake driven firmly in the ground 5 chs. S. of my station. After sunrise on Aug. 3, I lay off the azimuth of Polaris $1^{\circ} 19'$ to the west and mark a point in the meridian by a nail in another stake 5 chs. S.

Aug. 3: at 8h 00m a.m., app.t., I set off $36^{\circ} 32'$ N. on the latitude arc, $17^{\circ} 28'$ N. on the declination arc and determine a meridian with the solar which agrees with the true meridian.

At 12h 00m app. noon, with the latitude arc unchanged, I observe the sun on the meridian, the resultant reading of the declination arc is $17^{\circ} 26'$ N., which agrees with the computed declination of the sun.

At 3h 00m p.m., app.t., with the latitude arc still unchanged, I set off $17^{\circ} 24'$ N., on the declination arc, and determine a meridian with the solar which also agrees with the meridian obtained from Polaris observation.

As all of the observations taken during the usual hours of solar work agree within 1' of the true meridian, I conclude that the instruments are in satisfactory adjustment.

Resurvey of a Portion of the Gila and Salt River Meridian through T. 36 N.

This line was surveyed by Benjamin J. Kinsey, U. S. Transitman, in 1922. No resurvey or retracement is of record.

Investigation discloses that portions of it are defective in measurement; it is therefore necessary to set new cors. for secs. to the west and change the markings on the original cors. to refer to secs. to the east only.

The following field notes describe such resurvey, but no topography is given.

The cor. of secs. 25, 30, 31 and 36, T. 36 N., Rs. 1 E. and 1 W., is an iron post, 2 ins. diam., firmly set and marked and witnessed as described in the official record.

Resurvey of a Portion of the Gila and Salt River Meridian through T. 36 N.

Chains Thence North, on a random and true line along W. bdy. of sec. 30.

40.00 Set an iron post, 3 ft. long, 1 in. diam., 28 ins. in the ground, for 1/4 sec. cor. of sec. 25 only, of R. 1 W., with brass cap marked

1931 from which

A yellow pine, 20 ins. diam., bears N. 77° W., 36 lks. dist., marked 1/4 S 25 B T.

A yellow pine, 36 ins. diam., bears N. 75° W., 35 lks. dist., marked 1/4 S 25 B T. Note: This is the old bearing tree in sec. 25, originally marked from the original 1/4 sec. cor. of secs. 25 and 30.

40.28 The old 1/4 sec. cor. of secs. 25 and 30, which is an iron post, 1 in. diam., 10 ins. above ground, with brass cap marked

1922

As this cor. now refers to sec. 30 only, of R. 1 E., I alter the markings on the brass cap to read

	from which
	A cedar, 8 ins. diam., bears S. 18° E., 65 lks. dist., marked T 36 N R 1 W S 5 C C B T.
	A cedar, 8 ins. diam., bears S. 43° W., 16 lks. dist., marked T 36 N R 1 W S 6 C C B T.
	From point of intersection, the standard cor. of secs. 31 and 32, T. 37 N., R. 1 W., bears East, 13 lks. dist.; an iron post, 3 ins. diam., 10 ins. above ground, with brass cap marked and witnessed as described in official record.
	Land, mountainous. Soil, rocky, 3rd rate. Timber, pinyon, yellow pine and cedar; undergrowth, oak.

FINAL TEST OF SOLAR.

August 31: Near the cor. of secs. 10, 11, 14 and 15, on the meridian established as described on page 1, at 8h 00m a.m., app.t., I set off 36° 32' N., on the latitude arc; 8° 34 $\frac{1}{2}$ ' N. on the declination arc and determine a meridian with the solar, which agrees with the meridian obtained from observation on Polaris.

At 4h 00m p.m., app.t., I set off 8° 27 $\frac{1}{2}$ ' N. on the declination arc, and, with the latitude arc unchanged, again orient the instrument with the solar; the line of sight agrees with the Polaris meridian.

T. 36 N., R. 1 W.

GENERAL DESCRIPTION.

The elevation of this township ranges from about 6500 to 7500 feet above sea level. The surface is generally rolling mountainous, with numerous canyons draining westerly toward the Colorado River.

The timber, which covers most of the township, consists of yellow pine, pinyon pine, oak, juniper and aspen. The undergrowth is mostly buck brush, sage, june-berry and scrub oak.

There is no agricultural land in the township and there are no settlers. The chief value of the land is for the timber.

CERTIFICATE OF UNITED STATES SURVEYOR

Benjamin J. Kinsey, U. S. Surveyor.
 We, Charles E. Hunter, U. S. Transitman, HEREBY CERTIFY upon honor that, in
 pursuance of special instructions bearing date of the 1st day of May, 1931,
 received from the district cadastral engineer for Arizona, with assignment
 August 5, 1931, and
 instructions dated July 27, 1932, we have resurveyed a portion of the Gila
 and Salt River Meridian through T. 36 N., and a portion of the Ninth
 Standard Parallel North through R. 1 W.; surveyed the west boundary
 and the subdivisional lines of Township 36 North, Range 1 West, of the
 Gila and Salt River Meridian, in the State of Arizona, which are
 represented in the foregoing field notes as having been executed by us and under our direction; and that said
 and resurvey
 survey has been made in strict conformity with said instructions, the Manual of Instructions for the Survey
 of the Public Lands of the United States, and in the specific manner described in the foregoing field notes.

Benjamin J. Kinsey
 Benjamin J. Kinsey, U. S. Surveyor.
 Phoenix, Arizona, March 22, 1935.

Charles E. Hunter
 Charles E. Hunter, U. S. Transitman.
 Glendale, California, Oct. 3, 1934.

CERTIFICATE OF APPROVAL

OFFICE OF U. S. SUPERVISOR OF SURVEYS,

Denver, Colorado, Mar. 22, 1935.

The foregoing field notes of the resurvey of a portion of the Gila and Salt River
 Meridian through T. 36 N., and a portion of the 9th Standard Parallel
 North through R. 1 W.; survey of the west boundary and the subdivisional
 lines of Township 36 North, Range 1 West, of the Gila and Salt River
 Meridian, in the State of Arizona, executed by Benjamin J. Kinsey, U. S.
 Surveyor, and Charles E. Hunter, U. S. Transitman, under
 special instructions dated May 1, 1931, and assignment
 instructions dated August 5, 1931 and July 27, 1932, having been critically examined, and
 the necessary corrections made prior to their certification by the engineer, the said field notes, and the surveys
 and resurveys
 therein described, are hereby approved.

 U.S. Supervisor of Surveys.

CERTIFICATE OF TRANSCRIPT

I CERTIFY that the foregoing transcript of the field notes of the above described surveys in
 _____, is a true copy of the original field notes on file in the public survey office.
