———— Lines of accepted surveys.

----- Unsurveyed lines.

===== Lines resurveyed under this group.

———— Lines surveyed under this group.

▭ Areas surveyed as per accepted plats on file.

The surveys and resurveys herein described were executed by Ty White, Norville E. Shearer and Frank Kennon, Public Land Surveyors, using, respectively, Buff and Buff transits Nos. 18002 and 10125, and Lietz transit No. 6166. Each of these instruments is equipped with an improved Smith solar attachment and otherwise conforms to the standard specifications of the General Land Office. The instruments were examined and tested by the District Cadastral Engineer for California and Arizona prior to the beginning of the surveys of this group, and were approved conditional upon the results of satisfactory field tests of same.

The azimuths of all of the lines of survey herein described were determined with the solar attachments.

All measurements were made with Lufkin and Dietzgen steel tapes, 5 chs. in length, graduated every link for the first 100 lks., and the remainder at intervals of 10 lks. The tapes were tested by comparison with a Lufkin standard tape and found correct. All of the measurements were made on the slope, the vertical angle of each interval determined with a clinometer in good adjustment, and the horizontal equivalents entered in the field notes.

PRELIMINARY FIELD TESTS OF INSTRUMENTS.

Buff and Buff transit No. 18002
Ty White, Public Land Surveyor

August 17, 1938; at camp in SE $\frac{1}{4}$ of NE $\frac{1}{4}$ of section 2, T. 9 N., R. 2 W., G. & S.R. Meridian, Arizona, in latitude 34°09'04"N., and longitude 112°26'W., examine the adjustments of Buff and Buff transit No. 18002 and find no errors; then to test the workings of the solar apparatus proceed as follows:

At 10h.2m., p.m., l.m.t., observe Polaris at eastern elongation, making four observations, two each with the telescope in direct and reversed positions, and marking the mean point in the line thus determined by a tack in a stake driven firmly in the ground about 10 chs. N.

Azimuth of Polaris at eastern elongation: 1°14'49".

August 18: lay off the azimuth of Polaris 1°15' to the west, and mark the meridian thus determined, by a tack in a stake driven firmly in the ground about 10 chs. N.

At 8h.00m., a.m., app.t., set off 34°09'N. on the latitude arc; 13°12' N. on the declination arc; and determine a meridian with the solar, which agrees with the true meridian.

At app. noon, with the latitude arc unchanged; observe the sun on the meridian, and obtain a reading of 13°08 $\frac{1}{2}$ 'N. on the declination arc, which agrees with the computed declination of the sun.

At 4h.00m., p.m., app.t., with the latitude arc unchanged; set off 13°5 $\frac{1}{2}$ 'N. on the declination arc; and determine a meridian with the solar, which agrees with the true meridian.

As all of the solar observations made during the usual hours of solar work come within 1' of the true meridian, conclude that this instrument is in satisfactory adjustment on this date.

2.

Buff and Buff transit No. 10125.
Norville E. Shearer, Public Land Surveyor.

August 18, 1938; at same station, using the meridian established by Ty White, Public Land Surveyor, by Polaris observation, test the solar apparatus of Buff and Buff transit No. 10125 as follows:

At 9h.00m., a.m., app.t., set off $34^{\circ}09'N.$ on the latitude arc; $13^{\circ}11'N.$ on the declination arc; and determine a meridian with the solar, which agrees with the true meridian.

At app. noon, with the latitude arc unchanged; observe the sun on the meridian, and obtain a reading of $13^{\circ}08\frac{1}{2}'N.$ on the declination arc, which agrees with the computed declination of the sun.

At 3h.00m., p.m., app.t., with the latitude arc unchanged; set off $13^{\circ}06'N.$ on the declination arc; and determine a meridian with the solar, which agrees with the true meridian.

As all of the solar observations made during the usual hours of solar work come within $1'30''$ of the true meridian it is evident that the adjustments of this instrument are satisfactory on this date.

Lietz transit No. 6166
Frank Kennon, Public Land Surveyor.

August 18, 1938: at same station, using the meridian established by Ty White, Public Land Surveyor by Polaris observation, test the solar apparatus of Lietz transit No. 6166 as follows:

At 9h.30m., a.m., app.t., set off $34^{\circ}09'N.$ on the latitude arc; $13^{\circ}10\frac{1}{2}'N.$ on the declination arc; and determine a meridian with the solar, which agrees with the true meridian.

At app. noon, with the latitude arc unchanged; observe the sun on the meridian, and obtain a reading of $13^{\circ}08\frac{1}{2}'N.$ on the declination arc, which agrees with the computed declination of the sun.

At 3h.30m., p.m., app.t., with the latitude arc unchanged; set off $13^{\circ}06\frac{1}{2}'N.$ on the declination arc; and determine a meridian with the solar, which agrees with the true meridian.

As all of the solar observations made during the usual hours of solar work come within $1'$ of the true meridian, conclude that this instrument is in satisfactory adjustment on this date.

Resurvey: Part of West bdy. of T. 10 N., R. 1 W. BOOK 4197
 Survey and Resurvey: East bdy. of T. 10 N., R. 2 W.

3.

Chains

The West bdy. of T. 10 N., R. 1 W., west of secs. 19 and 30 of said Tp., was surveyed in 1881 by T.F. White, U.S.D.S. in connection with his survey of the subdivision lines bounding said secs. 19 and 30. This survey of 2 miles of the Tp. bdy. was initiated at the cor. of secs. 19, 24, 25 and 30 established in 1871 by O.H. Case, U.S. D.S. in his survey of what was designated as the "Bradshaw Line" the same being the 2nd latitudinal subdivision line of Ts. 10 N., Rs. 1 and 2 W. No other portion of this Tp. bdy. has been surveyed and no retracement or resurvey of the surveyed portion is of record.

The following notes describe a resurvey of the West bdy. of T. 10 N., R. 1 W., west of secs. 19 and 30; a resurvey of the East bdy. of T. 10 N., R. 2 W., east of secs. 24 and 25, and a survey of the completion of the East bdy. of T. 10 N., R. 2 W.

Retracement for Resurvey.

From original cor. of secs. 13, 18, 19 and 24,
 South, on random line, W. of sec. 19 (N. $\frac{1}{2}$).

39.45 A point 10 lks. E. of original $\frac{1}{4}$ sec. cor.

True course and dist. of N. $\frac{1}{2}$ of W. bdy. of sec. 19 are therefore, N. 0°09'E., 39.45 chs..

From $\frac{1}{4}$ sec. cor.,

South, on random line, W. of sec. 19 (S. $\frac{1}{2}$).

40.85 A point 134 lks. E. of the original cor. of secs. 19, 24, 25 and 30.

True course and dist. of S. $\frac{1}{2}$ of W. bdy. of sec. 19 are therefore, N. 1°53'E., 40.87 chs.

From original cor. of secs. 19, 24, 25 and 30,
 South, on random line, W. of sec. 30, (N. $\frac{1}{2}$).

39.95 A point 128 lks. W. of the original $\frac{1}{4}$ sec. cor.

True course and dist. of N. $\frac{1}{2}$ of W. bdy. of sec. 30 are therefore, N. 1°50'W., 39.97 chs.

From $\frac{1}{4}$ sec. cor.,

South, on random line, W. of sec. 30, (S. $\frac{1}{2}$).

40.00 Diligent search in this vicinity fails to reveal any trace of the original cor. of secs. 25, 30, 31 and 36.

Set temp. cor. of secs. 30 and 31.

As the original survey of the Tp. bdy. terminated here, no point of control exists to the S., therefore reestablish the cor. of secs. 30 and 31 at this point as hereinafter described.

True course and dist. of S. $\frac{1}{2}$ of W. bdy. of sec. 30 are therefore, North, 40.00 chs.

BOOK 415

Resurvey: Part of West bdy. of T. 10 N., R. 1 W.
 Survey and resurvey: East bdy. of T. 10 N., R. 2 W.

4.

Chains

To reestablish the SE. cor. of T. 10 N., R. 2 W., from which to initiate the survey and resurvey of the East bdy. of said Tp., proceed as follows:

From temp. cor. of secs. 30 and 31, T. 10 N., R. 1 W.

South, on random line, on E. bdy. of T. 10 N., R. 2 W.

97.02 Intersect the North bdy. of T. 9 N., R. 2 W.

Set an iron post, 3 ft. long, 3 ins. in diam., 27 ins. in the ground, for reestablished cor. of T. 10 N., R. 2 W. only (SE. cor.) with brass cap marked

T10N
R2W
S36

T9N R2W
S1

1938

No bearing trees available.

Raise a mound of stone, 3 ft. base, 2 ft. high, NW. of cor.

This cor. is alongside a barbed wire fence (5 strand) bearing E. and W.

From point of intersection, the cor. of Ts. 9 and 10 N., R. 2 W., bears S. $89^{\circ}52'E.$, 9.92 chs. dist., which is an iron post, 3 ins. in diam., projecting 9 ins. above ground, firmly set, marked on brass cap and witnessed as described in the official record.

Alter this cor. monument to refer to T. 9 N., R. 2 W. only (NE. cor.) by changing the marking on the brass cap to read:

T10N R1W
S31
T9N
R2W
S1

1938

1919-25

Destroy the mound of stone W. of cor., and raise a mound of stone 3 ft. base, 2 ft. high, SW. of cor.

SURVEY

From the reestablished cor. of T. 10 N., R. 2 W. (SE. cor.) hereinbefore described,

North, on true line, on E. bdy. of sec. 36.

Over mountainous land, thru scattering timber and dense undergrowth.

Desc. 60 ft. over NW. slope.

2.00 Old 1 wire telephone line (down) bears NE. and SW.

2.10 Bottom of ravine, 4 lks. wide, course W.; asc. 18 ft. over SW. slope.

Resurvey: Part of West bdy. of T. 10 N., R. 1 W.

Chains

The north 4 miles of the E. bdy. of T. 10 N.; R. 3 W. were surveyed in 1871 by O.H. Case, U.S.D.S., establishing common reference cors. thereon at 40 ch. intervals counting from the N. The remainder of this Tp. bdy. was surveyed in 1925 by G.F. Sawyer, U.S.S. establishing common reference cors. thereon at 40 ch. intervals counting from the S. This completion survey resulted in an excess measurement of about 7 chs. being placed in the N. $\frac{1}{2}$ bet. secs. 25 and 30. The north 4 miles of this Tp. bdy. were resurveyed in 1933 by B.J. Kinsey, U.S.S., reconstructing all of the original cor. monuments thereon with regulation brass-capped iron posts, retaining their original common reference. No other resurvey or retracement of any part of this Tp. bdy. is of record.

The following notes describe a resurvey of the W. bdy. of T. 10 N., R. 2 W., northerly from the true point for $\frac{1}{4}$ sec. cor. of secs. 25 and 30 to the closing cor. of Ts. 10 and 11 N., R. 2 W., reestablishing $\frac{1}{4}$ sec. cors. referring to quarter secs. E. of line only, at midpoints in latitude between the subdivisional closing cors. of T. 10 N., R. 2 W., with the exception of W. $\frac{1}{4}$ sec. cor. of sec. 6 which is reestablished at 40 chs. in N. latitude from the closing cor. of secs. 6 and 7; and a resurvey of the E. bdy. of T. 10 N., R. 3 W. northerly from same $\frac{1}{4}$ sec. cor. point to the cor. of Ts. 10 and 11 N., Rs. 2 and 3 W., altering all corner monuments thereon, including the said Tp. cor., to refer to areas W. of line only.

Retracement for Resurvey.

From true point for $\frac{1}{4}$ sec. cor. of secs. 25 and 30 (50 lks. N. of W.C.)

North, on random line, on E. bdy. of sec. 25 (N. $\frac{1}{2}$).

46.92 Intersect the cor. of secs. 19, 24, 25 and 30.

	<u>GENERAL DESCRIPTION.</u>
Surface:	The elevation of the greatest portion of the township lies between 4000 and 4500 feet above sea level. The east boundary of sec. 1 passes just west of the top of Horse Mountain which is 7069 feet high. The east, west and south portions of the township are mountainous, while the north central portion, known as Cellar Basin, is gently rolling.
Soil:	The soil, 3rd and 4th rates, is coarsely disintegrated granite and sand, of no agricultural value excepting that it supports a flora useful for grazing purposes.
Timber:	There is no timber of commercial value in the township. There is a fair stand of pinyon on the higher slopes of Horse Mountain. Cottonwood and sycamore are found around the springs and in some of the larger washes.
Undergrowth:	A sparse growth of range grass grows in Cellar Basin. The balance of the township supports a medium to dense growth of oak brush, laurel, manzanita, catclaw, hackberry and cacti.
Roads:	A fair dirt road, Wagoner to Minnehaha Flats, passes thru secs. 30 and 31 and a passable but very rough part of the same road passes thru secs. 35 and 36. A rough, cattlemen's road enters the township thru the north boundary of sec. 4, forks in the same section, ending at Cellar Springs in sec. 8 and at Indian Springs in sec. 4.
Trails:	At the end of the road in sec. 8 a trail begins and runs southeasterly to Minnehaha Flats just east of the east boundary of sec. 24. A second trail connects with the above mentioned road at Indian Springs on line between secs. 3 and 4 and runs easterly,

leaving the township thru the east boundary of sec. 1.

Settlement: There is a dwelling and small stamp mill near the cor. of secs. 28, 29, 32 and 33, owned by Mr. J.B. Paxton. There is a one room shack used by cattlemen, at Indian Springs in the SE. $\frac{1}{4}$ of sec. 4.

Drainage: The general drainage is westerly to Milk Creek which is a large wash running south-erly thru T. 10 N., R. 3 W. The principal washes are Cherry Creek, draining the south, Minnehaha Creek, the Central, Cellar Springs Creek and Blind Indian Creek, the north portions of the township.

Water: Cellar Springs is an excellent flow of water in sec. 8. Indian Springs is a small spring on line between secs. 3 and 4. Small springs occur all along Cherry Creek and along Minnehaha Creek, in secs. 16, 17, 18 and 19.

Mineral: There is a small producing gold mine in the SW. $\frac{1}{4}$ of sec. 28. There are no other producing mines in the township.

General: Range cattle are run thruout the township. A considerable amount of fence has been built incidental to this enterprise.

Mean Magnetic Declination: $14\frac{1}{2}^{\circ}$ E.

FINAL TESTS OF INSTRUMENTS.

The continued satisfactory adjustment of Buff and Buff transit No. 18002 and Lietz transit No. 6166, used respectively by Ty White and Frank Kennon, Public Land Surveyors in the execution of the surveys described in the foregoing field notes, thruout said surveys, is indicated from the preliminary tests of same described in the field notes of survey of T. 11 N., R. 2 W.

BUFF and BUFF transit No. 10125
Norville E. Shearer, Public Land Surveyor.

Sept. 18, 1938; at camp about 20 chs. S. of the $\frac{1}{4}$ sec. cor. of secs. 28 and 33, T. 11 N., R. 2 W., G. & S.R. Meridian, Arizona, latitude $34^{\circ} 15' 15''$ N., longitude $112^{\circ} 28\frac{1}{2}'$ W., using the meridian established at this camp on Sept. 7, by Ty White, Public Land Surveyor, by Polaris observation, as described in field notes of survey of T. 11 N., R. 2 W., test the solar apparatus of Buff and Buff transit No. 10125 as follows:

At 8h. 00m., a.m., app.t., set off $34^{\circ} 15'$ N. on the latitude arc; $1^{\circ} 59\frac{1}{2}'$ N. on the declination arc; and determine a meridian with the solar which agrees with the true meridian.

At app. noon, with the latitude arc unchanged, observe the sun on the meridian, and obtain a reading of $1^{\circ} 55'$ N. on the declination, arc, which agrees with the computed declination of the sun.

At 4h.00m., p.m., app.t., with the latitude arc unchanged, set off $1^{\circ} 51\frac{1}{2}'$ N. on the declination arc and determine a meridian with the solar which agrees with the true meridian.

As all of the solar observations made during the usual hours of solar work come within $1' 30''$ of the true meridian, conclude this instrument has remained in satisfactory adjustment thruout the surveys described in the foregoing field notes.

CERTIFICATE OF UNITED STATES SURVEYOR

I, Norville E. Shearer, Public Land Surveyor, HEREBY CERTIFY upon honor that, in
pursuance of ^{supplemental} special instructions bearing date of the 27th day of July 1938,
received from the district cadastral engineer for ARIZONA, with assignment
instructions dated July 27, 1938, I have resurveyed part of East bdy. of T.10
N., R.3 W.; part of West bdy. and part of the Subdivision lines of
T.10 N., R.2 W., and surveyed part of East bdy. and part of the Subdivi-
sion lines of Township No.10 North, Range No.2 West
of the Gila and Salt River Meridian, in the State of Arizona, which are
represented in the foregoing field notes as having been executed by me and under my direction; and that said
resurveys and
surveys have been made in strict conformity with said instructions, the Manual of Instructions for the Survey
of the Public Lands of the United States, and in the specific manner described in the foregoing field notes.
