OF RESURVEY OF

South boundary

AND OF SURVEY OF

West boundary

North boundary

and

Subdivision lines of

Township No. 10 North, Range No. 14 East

Of the Gila and Salt River Meridian,

In the State of ARIZONA

EXECUTED BY

Claude F. Warner, U.S. Transitman

and

Frank Moteh, Public Land Surveyor

<sup>supplemental</sup>  
Under special instructions dated July 23, 1937, which provided  
for the surveys included under Group No. 190, Arizona, bearing the approval of the  
Commissioner of the General Land Office under date of August 10, 1937  
and assignment instructions dated May 24, 1938

Resurvey and Survey commenced June 3, 1938

Resurvey and Survey completed September 3, 1938

- Lines of accepted surveys.
- Lines resurveyed under this group.
- Unsurveyed.
- Lines surveyed under this group.
- Areas surveyed as per accepted plats on file.

The resurvey and surveys herein described were executed by Claude F. Warner, Transitman, and Frank Motch, Public Land Surveyor, using respectively, Buff and Buff transit No. 9984, and Young and Sons' transit No. 8526. Both of these instruments are equipped with an improved Smith solar attachment and otherwise conforms to the standard specifications of the General Land Office. The instruments were examined and tested by the District Cadastral Engineer for Arizona and California prior to the beginning of the surveys of this group, and were approved conditional upon satisfactory results of field tests of same.

The azimuths of all of the lines of survey herein described were determined with the solar attachments.

All measurements were made with Dietzgen steel tapes, 5 chs. in length, graduated every link for the first 100 links, and the remainder at intervals of 10 links. The tapes were tested by comparison with a Lufkin standard tape and found to be correct. All of the measurements were made on the slope; the vertical angle of each interval determined with a clinometer in good adjustment; and the horizontal equivalents entered in the field notes.

#### PRELIMINARY FIELD TESTS OF INSTRUMENTS.

Buff and Buff transit No. 9984  
Claude F. Warner, Transitman.

June 2, 1938; at camp near SW. cor. of sec. 5, Frac. T. 9 N., R. 15 E., G. & S.R. Meridian, Arizona, in latitude  $34^{\circ}08'N.$ , longitude  $110^{\circ}50\frac{1}{4}'W.$ , examine the adjustments of Buff and Buff transit No. 9984 and find no errors; then, to test the solar apparatus of same by comparing its indications with a true meridian determined at this station by Polaris observation on this date, by Horace M. Muscott, Surveyor, using Buff and Buff transit No. 16723, as described in field notes of survey of Frac. T. 10 N., R. 15 E., proceed as follows:

At 7h. 30m., a.m., app.t., set off  $34^{\circ}08'N.$  on the lat. arc;  $22^{\circ}10'N.$  on the decl. arc; and determine a meridian with the solar, which agrees with the true meridian.

At app. noon, with the latitude arc unchanged, observe the sun on the meridian, and obtain a reading of  $22^{\circ}11'N.$  on the decl. arc, which agrees with the computed decl. of the sun.

At 4h. 30m., p.m., app.t., with the lat. arc unchanged; set off  $22^{\circ}13'N.$  on the decl. arc; and determine a meridian with the solar, which agrees with the true meridian.

As all of the solar observations made during the usual hours of solar work come within  $1'30''$  of the true meridian, conclude that this instrument is in satisfactory adjustment on this date, prior to beginning surveys with same which are hereinafter described.

Young and Sons' transit No. 8526  
Frank Motch, Public Land Surveyor.

June 2, 1938; at same station, examine the adjustments of Young and Sons' transit No. 8526 and find no errors; then to test the solar apparatus of same by comparing its indications with the true meridian, hereinbefore

2.

referred to, proceed as follows:

At 7h. 30m., a.m., app.t., set off  $34^{\circ}08'N.$  on the lat. arc;  $22^{\circ}10'N.$  on the decl. arc; and determine a meridian with the solar, which agrees with the true meridian.

At app. noon, with the lat. arc unchanged, observe the sun on the meridian, and obtain a reading of  $22^{\circ}11'N.$  on the decl. arc, which agrees with the computed decl. of the sun.

At 4h. 30m., p.m., app.t., with the lat. arc unchanged; set off  $22^{\circ}13'N.$  on the decl. arc; and determine a meridian with the solar, which agrees with the true meridian.

As all of the solar observations made during the usual hours of solar work come within  $1'30''$  of the true meridian, conclude that this instrument is in satisfactory adjustment on this date, prior to beginning surveys with same which are hereinafter described.

Chains

The South boundary of T. 10 N., R. 14 E., was surveyed in 1907 by E.C.Dietrich, U.S.D.S., establishing common reference 1/4 sec. and sec. cors., alternately thereon, at 40 ch. intervals counting from the east.

No retracement or resurvey of any part of this Tp. bdy. is of record.

The following notes describe a resurvey of the entire line, reconstructing all of the existing corner monuments except the cor. of secs. 3, 4, 33 and 34, with regulation brass-capped iron posts, set in the original corner points.

The only original corner monument found missing in this resurvey was the cor. of secs. 2, 3, 34 and 35, and this cor. was reestablished at midpoint on a direct line between the original 1/4 sec. cors. 1/2 mile E. and W. therefrom. The intervals between all of the sec. cors., and between the sec. and 1/4 sec. cors. on the west 3 miles of the line, being within allowable limits of measurement, said corners retain their original common reference. The intervals between the sec. and 1/4 sec. cors. on the east 3 miles of this Tp. bdy. are out of limits in measurement, therefore the original 1/4 sec. cor. monuments on such portion of the line are reconstructed with reference to areas S. of line only, and 1/4 sec. cors. referring to secs. 34, 35 and 36, T. 10 N., R. 14 E. only are reestablished in alinement between the controlling original cors. at midpoints in departure between the sec. cors.

Retracement for Resurvey.

From cor. of Ts. 9 and 10 N., R. 14 and Frac. R. 15 E. S. 89° 57' W., on random line, N. of sec. 1 (E. 1/2).

39.39 A point 41 lks. S. of the original 1/4 sec. cor.

True course and dist. of E. 1/2 of N. bdy. of sec. 1 are therefore: N. 89° 27' W., 39.39 chs.

Thence

S. 89° 57' W., on random line, N. of sec. 1 (W. 1/2).

40.29 A point 19 lks. S. of the original cor. of secs. 1, 2, 35 and 36.

True course and dist. of W. 1/2 of N. bdy. of sec. 1 are therefore: N. 89° 47' W., 40.29 chs., and the W. departure of S. bdy. of sec. 36 is 79.68 chs.

From orig. sec. cor.

S. 89° 57' W., on random line, N. of sec. 2 (E. 1/2).

39.84 A point 7 lks. S. of the original 1/4 sec. cor.

True course and dist. of E. 1/2 of N. bdy. of sec. 2 are therefore: N. 89° 57' W., 39.84 chs.

Thence

S. 89° 57' W., on random line, N. of sec. 2 (W. 1/2) and N. of sec. 3 (E. 1/2).

---

RESURVEY.

---

From the cor. of Ts. 9 and 10 N., R. 14 and Frac. R. 15 E., reconstructed under this group, in original position, as described in the notes of survey of Frac. T. 10 N., R. 15 E.

N.  $89^{\circ} 27' W.$ , on true line, on S. bdy. of sec. 36.  
 Over rolling land, thru dense timber and undergrowth.  
 Desc. gradually over S. and SW. slopes.

10.10 Fence, bears NW. and SE.

17.08 Enter mountainous land. Desc. 152 ft. over steep W. slope.

24.82 Wash, 10 lks. wide, course SW. Asc. 28 ft. over SE. slope.

28.75 Point of spur slopes S. Desc. 55 ft. over SW. slope.

36.03 Cherry Creek, 60 lks. wide, course NW., containing shallow pools of water at intervals. Asc. 55 ft. over NE. slope to

39.39 Intersect original  $\frac{1}{4}$  sec. cor. of secs. 1 and 36, which is a sandstone  $10 \times 6 \times 6$  ins. above ground, firmly set, marked  $\frac{1}{4}$  on N. face, and witnessed by two bearing trees:  
 a pine, 26 ins. diam., S.  $72\frac{1}{2}^{\circ} W.$ , 37 lks. dist., marked  $\frac{1}{4}$  S1 BT.  
 a pine, (dead), 30 ins. diam., N.  $38\frac{1}{2}^{\circ} E.$ , 49 lks. dist. marked  $\frac{1}{4}$  S36 BT.

Reconstruct this cor. monument with altered reference as follows:

Remove the original cor. stone, and in same place set an iron post, 3 ft. long, 1 in. in diam., 6 ins. in the ground to bedrock, with old cor. stone reset alongside, and in a mound of stone to top, for N.  $\frac{1}{4}$  sec. cor. of sec. 1, with brass cap marked

 $\frac{1}{4}$  S1

1938

Resurvey: South boundary: T. 10 N., R. 14 E.

6.

Chains	
	Obliterate marking on the original bearing tree NE. of cor., and establish an additional bearing tree in sec. 1 as follows:  An oak, 6 ins. diam.; bears S. $74\frac{1}{2}^{\circ}$ E., 35 lks. dist., marked $\frac{1}{4}$ S1 BT.  Thence N. $89^{\circ}47'$ W., on true line, continuing measurement of S. bdy. of sec. 36.  Asc. slightly over NE. slope to  39.84 (Midpoint) Set an iron post, 3 ft. long, 1 in. in diam., 12 ins. in the ground to bedrock, and in a mound of stone to top, for <del>reestablished</del> S. $\frac{1}{4}$ sec. cor. of sec. 36, with brass cap marked  $\frac{1}{4}$ S36  1938  from which  A pine, 34 ins. diam., bears N. $14\frac{1}{2}^{\circ}$ E., 60 lks. dist., marked $\frac{1}{4}$ S36 BT.  A pine, 30 ins. diam., bears N. $5^{\circ}$ W., 84 lks. dist., marked $\frac{1}{4}$ S36 BT.  Asc. 54 ft. over NE. slope.  48.56 Spur, slopes N., near point of same. Desc. 50 ft. over NW. slope.  54.25 Wash, 20 lks. wide, course NW. Asc. 10 ft. over NE. slope.  55.25 Point of low spur, slopes N. Desc. 12 ft. over NW. slope.  56.34 Wash, 10 lks. wide, course N., Asc. 100 ft. over E. slope.  64.14 Spur, slopes NE. Desc. 25 ft. over NW. slope.  68.73 Wash, 15 lks. wide, course NE. Asc. 110 ft. over NE. slope.  76.35 Ridge, bears NW. and SE. Thence across nearly level top of ridge.  76.40 Highway, Globe to Holbrook, via Young and Heber, bears N. $38\frac{1}{2}^{\circ}$ W., and S. $38\frac{1}{2}^{\circ}$ E.  78.00 Leave top of ridge. Enter rolling land. Desc. 11 ft. over SW. slope to  79.68 Intersect the original cor. of secs. 1, 2, 35 and 36, which is a sandstone 8x8x6 ins. above ground, firmly set, marked with 1 notch on E. face and 5 notches on W. face, and witnessed by a mound of stone N., and four bearing trees: A pine, 24 ins. diam., N. $78^{\circ}$ E., 212 lks. dist., marked T10N R14E S36 BT. A pine, 14 ins. diam., S. $38\frac{3}{4}^{\circ}$ E., 171 lks. dist., marked T9NR14E S1 BT. An oak, 18 ins. diam., S. $64\frac{1}{4}^{\circ}$ W., 82 lks. dist., marked T9N R14E S2 BT. A pine, 15 ins. diam., N. $31\frac{1}{2}^{\circ}$ W., 125 lks. dist., marked T10N R14E S35 BT.  Reconstruct this cor. monument as follows:

Timber, pine, juniper and oak.  
Undergrowth, oakbrush and manzanita.

Survey: Subdivision lines: T. 10 N., R. 14 E.

Chains

The south bdy. of T. 10 N., R. 14 E., being defective in alinement, proper subdivision of said Tp. cannot be obtained by initiation of survey from the section corners thereon, therefore the first latitudinal subdivision line north from the south bdy. of the Tp. is surveyed thru the Tp. as a Governing Section Line, connecting the controlling section corners on the East and West bdrs. of the Tp. The computed bearing of a direct line bet. such control cors. is N. 89° 57' W., therefore the Governing Section Line is surveyed on that bearing from the cor. of secs. 25, 30, 31 and 36 on E. bdy. of Tp., establishing  $\frac{1}{4}$  sec. and sec. cors. alternately, at 40 ch. intervals, and at 400.00 chs. establish the cor. of secs. 29, 30, 31 and 32. The line bet. secs. 30 and 31 is then surveyed by random and true lines in the usual manner. The meridional subdivision lines of the south tier of secs. are surveyed by random lines S. from the sec. cors. on the Governing Section Line, and true lines northerly from the sec. cors. on the S. bdy. of the Tp., establishing the  $\frac{1}{4}$  sec. cors. at 40 chs. in latitude from the sec. cors. on the Governing Section line. The survey of the meridional subdivision lines of the north 5 tiers of secs. is initiated from the sec. cors. on the Governing Section Line and is executed in the normal manner.

From the cor. of secs. 25, 30, 31 and 36, on the East bdy. of the Tp., reestablished under this group, as described in field notes of survey of Frac. T. 10 N., R. 15 E.,

N. 89° 57' W., on governing section line, bet. secs. 25 and 36.

Over rolling land, thru dense timber and undergrowth.

Desc. 210 ft. over W. slope to

40.00

Set an iron post,  $\frac{3}{4}$  ft. long, 1 in. in diam., 28 ins. in the ground, for  $\frac{1}{4}$  sec. cor., with brass cap marked

Land, mountainous.  
Soil, rocky, 4th rate.  
Timber, pine, oak and juniper.  
Undergrowth, oakbrush and manzanita.

GENERAL DESCRIPTION.

This township is near the heads of the Tonto Creek and Cherry Creek drainage basins, about 3 miles south from the Mogollon Rim, and about 4 miles west from the northwestern part of the Fort Apache Indian Reservation. The average elevation is about 6500 feet above sea level. The highest elevation is about 7500 feet in the northeast corner, and the lowest about 5500 feet in the southwest corner. The surface is mountainous, broken and heavily rolling, except scattered small areas of gently rolling and nearly level land. The soil is gravelly and rocky 3rd and 4th rates, except in a few small areas where there is a sandy, 2nd rate soil.

There is a dense growth of timber over almost the entire township, consisting of pine, oak, juniper, spruce and fir. Sycamore, black walnut and elm trees grow along the main watercourses. Undergrowth, consisting of oakbrush, manzanita, locust, catclaw, and second growth pine, is prevalent in most sections.

The north half and southwest quarter of the township is in the Tonto Creek drainage basin, the principal watercourses therein being Haigler Creek and its tributaries, Colcord Canyon and Neaglin Canyon in the north half, and Pine Creek in the southwest quarter. The southeast quarter of the township is in the Cherry Creek drainage basin, the principal watercourses therein being Cherry Creek and its tributaries, Parallel Canyon, and Neaglin Springs Canyon. Cherry Creek is a direct tributary of Salt River which it enters about 35 miles south of this township.

Neaglin Rim, a line of cliffs and precipitous broken slopes, extends easterly from a point in northeast quarter of section 20, thru secs. 21, 22, 23 and 24.

Colcord Mountain is located on north boundary of section 1, its summit being just outside the township. Round Mountain is located in the west half of section 26.

Haigler Creek carries a flowing stream of water throughout its entire length in this township. Several of the other watercourses in this township have small flowing streams in parts of their beds, but most of them are dry, though many of them have small shallow pools at intervals. There are several springs in the township.

The entire township is within the Tonto National Forest.

There are five Forest Homestead Entry Surveys; Nos. 146, 587, 589, 590 and 591; located as follows: No. 146 on Haigler Creek, in sections 6 and 7 and extending across the west boundary of this township into unsurveyed. T. 10 N., R. 13 E.; No. 587 in sections 28 and 29; No. 589 in sections 28, 29, 32 and 33; No. 590 in sections 21, 28 and 29; and No. 591 in sections 19 and 20.

The only permanent residents in the township are Gillette on H.E.S. No. 146, and Robt. J. Cook on H.E.S. No. 591. H.E.S. No. 587, H.E.S. No. 589, and H.E.S. No. 590 appear to have been abandoned, as the improvements on them are in a delapidated condition at this time and do not show any evidence of any attention to repairs in recent years. Residents Cook and Gillette each have improvements consisting of house, barn, fences and small tracts of cultivated land.

Other improvements in the township, besides those on the Forest homesteads are: vacant cabins, one each in NE $\frac{1}{2}$  of sec. 27, and SE $\frac{1}{2}$  of sec. 34 near S. bdy.; corral in Cherry Creek Canyon on S. bdy. of sec. 33; water trough on line between secs. 17 and 18; Forest Service telephone line northwesterly thru the west half of the Tp., from the S. bdy. of sec. 33 to the SW. cor. of sec. 6 and also following the highway in the southern part of sec. 34; and a number of lines of barbed wire range fences in various parts of the township.

A steel tower designated as Colcord No. 1 Lookout Station has been erected by the U.S. Forest Service on the summit of Colcord Mountain just north of the N. bdy. of section 1, and a telephone line extends easterly therefrom near the Tp. bdy.

A graded highway, from Globe to Holbrook, via Young and Heber, crosses the southern portions of sections 34 and 35, and the southwest corner of section 36. A graded highway known as the Chamberlain Trail, crosses the western part of section 6, extending westerly to the town of Payson, about 34 miles distant by way of said highway and southerly to Young. An ungraded road extends southerly from Cook's ranch to Young. A graded road extends easterly along N. bdy. of sec. 1 from Colcord No. 1 Lookout Station to the Globe-Holbrook highway. There are no other roads in the township, but a network of trails give access to most of the sections in the Tp., and many of these trails are suitable for truck travel.

There are no indications of valuable mineral deposits.

Stock grazing is carried on periodically as there is a fair growth of grass in some parts of the township, but the principal value of the land is for the timber.

The nearest settlement is the village and post office of Young, about 4 miles south.

#### FINAL FIELD TESTS OF INSTRUMENTS.

The continued satisfactory adjustment of the transits used in the execution of the resurvey and surveys described in the foregoing field notes is indicated by the field tests of same September 4, 1938, described in the field notes of survey of T. 9 N., R. 12 E.
