————— Arizona-New Mexico Boundary

## Township 14 South, Range 32 East

## Chains

The east boundary of the township, Arizona-New Mexico State boundary, was surveyed by Chandler Robbins in 1875. Most of the line through this township was retraced by W. B. Douglas in 1915 in connection with the survey of T. 24 S., R. 21 W., N.M.P. Meridian, New Mexico. The 128th mile was retraced by Guy R. Veal in 1919. As I disagree with the retracement made by Mr. Douglas for distance only, I therefore retraced the Arizona-New Mexico Boundary between mile corner No. 328 and mile corner No. 333. The north, south and west boundaries and the subdivisional lines were surveyed by R. C. Powers in 1883 as represented on the plat approved April 30, 1883. The north boundary was resurveyed by Veal and Siebecker in 1919 in connection with the survey of T. 13 S., R. 32 E. as represented on the plat approved September 15, 1921. The west boundary was resurveyed by C. E. Bilbray in 1952. The request for the resurvey of this township was made in a memorandum dated March 9, 1956 by the Arizona State Supervisor of the Bureau of Land Management.

The following field notes are those of the retracement of 5 miles of the Arizona-New Mexico Boundary and the resurvey of the south boundary and subdivisional lines.

The survey was executed with a W. and L. E. Gurley solar transit, serial No. 541332, constructed in accordance with the standard instrumental specifications of the Bureau of Land Management. The instrument was in good condition and placed in proper adjustment prior to the beginning of the survey.

The azimuth of all lines was ascertained by direct solar observations and checked from time to time with the solar attachment. Measurements were made with a Chicago steel tape, 8 chains in length, graduated every one-tenth link for the first link, every link for the next 99 links and every 10 links thereafter. The tape was tested by comparison with a standard steel tape and found to be correct. The measurements were made on the slope and the vertical angle of each interval was ascertained by a clinometer in good adjustment. The horizontal equivalents only are entered in this field note record.

The geographic position of the southeast corner of the township is in latitude  $32^{\circ} 09' 47.6''$  N. and longitude  $109^{\circ} 02' 53.2''$  W. The mean magnetic declination was  $13\frac{1}{2}^{\circ}$  E.

## Altitude observation of the sun for azimuth

December 6, 1957, at the corner of Ts. 14 and 15 S., Rs. 31 and 32 E., in latitude  $32^{\circ} 09' 31''$  N. and longitude  $109^{\circ} 07' 24''$  W., at apparent time of 9:00 a.m., I made a series of 3 altitude observations of the sun for azimuth, each with telescope in direct and reversed positions, reading the horizontal angle from the right edge of a power line pole to the sun.

Mean observed horizontal angle	48° 52'
Mean observed vertical angle	15° 54'
True bearing of the right edge of the power line pole	S. 0° 41' 30" E.

Retracement of Arizona-New Mexico Boundary through T. 14 S., R. 32 E.

Retracement of the survey executed by Chandler Robbins in 1875.

From the 328 mile cor. of the Arizona-New Mexico boundary, which is monumented with a sandstone, set, mkd. and witnessed as described in the official record.

## Retracement of Arizona-New Mexico Boundary through T. 14 S., R. 32 E.

	Land, rolling. Soil, third rate. Timber, none; undergrowth, greasewood, scattered mesquite, cacti and sparse grass.

## Dependent Resurvey of the S. Bdy., T. 14 S., R. 32 E.

Chains

Reestablishment of the survey executed by  
R. C. Powers, Deputy Surveyor, in 1883

From the cor. of Ts. 14 and 15 S., Rs. 31 and 32 E., which is monumented by two reference monuments, set and mkd. as described in the official record.

N. 89° 33' E., bet. secs. 6 and 31.

Over nearly level land, along S. edge of bladed road.

40.02

Point for the  $\frac{1}{2}$  sec. cor. of secs. 6 and 31, at proportionate dist.; there is no remaining evidence of the original cor.

Set an iron post, 28 ins. long, 2½ ins. diam., 20 ins. in the ground, and in a mound of stone, 3 ft. base to top, with brass cap mkd.

T14S R32E

$\frac{1}{2}$   $\frac{S31}{S 6}$

T15S

1957

Continue over nearly level land, along road.

75.00

N. edge of road, thence along N. edge of road.

80.10

Flood control drainage ditch, 30 lks. wide, 3 ft. deep, drains N.

80.50

Point for the cor. of secs. 5, 6, 31 and 32, at proportionate dist.; there is no remaining evidence of the original cor.

Set an iron post, 28 ins. long, 2½ ins. diam., 22 ins. in the ground, with brass cap mkd.

T14S R32E

$\frac{S31}{S 6}$  |  $\frac{S32}{S 5}$

T15S

1957

Deposit glass at base of iron post.

No other suitable accessories available.

Land, nearly level.

Soil, sandy clay.

Undergrowth, greasewood and mesquite.

Timber, none.

N. 89°33' E., bet. secs. 5 and 32.

Over nearly level land, through scattered undergrowth.

0.30

Flood control dike, bears N. and S.; thence desc. over gentle NE. slope, through cultivated land.

40.48

Point for the  $\frac{1}{2}$  sec. cor. of secs. 5 and 32, at proportionate dist.; there is no remaining evidence of the original cor.

Set an iron post, 28 ins. long, 2½ ins. diam., 22 ins. in the ground, with brass cap mkd.

At the corner point

Set an iron post, 28 ins. long, 2½ ins. diam., 20 ins. in the ground, with brass cap mkd.

$\frac{1}{4}$  S 6  
 T14S R32E  
 1957

Raise a mound of stone, 3 ft. base, 2 ft. high, S. of cor.

Bury the original cor. alongside the iron post.

## GENERAL DESCRIPTION

A small portion of the southwest corner of this township is suitable for farming, and part of it is now being farmed. The balance of the township is mostly gently rolling terrain, the soil is mostly sandy and gravelly clay, the vegetation is scattered to medium dense greasewood, mesquite, cacti and very sparse grass. The drainage is all towards San Simon Creek which flows northwest through the extreme southwest portion of the township.

The Southern Pacific Railroad and State Highway No. 86 bisect the township from east to west in the north end. El Paso Natural Gas Co. has a pumping station in sec. 16, with a gas line running east and west through the center of the township. Also, the Southern Pacific Co. has an oil pipe line paralleling the El Paso line.

The rainfall is very small, therefore the vegetation is scarce which makes livestock grazing very limited.

CERTIFICATE OF CADASTRAL ENGINEER

I, Donald E. Harding, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 29th day of June, 1956, I have surveyed retraced a portion of the Arizona-New Mexico Boundary and dependently resurveyed the south boundary and the subdivisional lines of Township 14 South, Range 32 East

of the Gila & Salt River Meridian, in the State of Arizona, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in the specific manner described in the foregoing field notes.

May 23, 1958
Salt Lake City, Utah

Donald E. Harding - Cadastral Surveyor

CERTIFICATE OF APPROVAL

BUREAU OF LAND MANAGEMENT,
Washington, D. C., JUL 14 1959, 19

The foregoing field notes of the survey of retracement of a portion of the Arizona-New Mexico Boundary and the dependent resurvey of the south boundary and the subdivisional lines of Township 14 South, Range 32 East, Gila & Salt River Meridian, Arizona

executed by Donald E. Harding, Cadastral Surveyor having been critically examined and found correct, are hereby approved.

Carl G. Harrington
Chief, Division of Cadastral Engineering
Cadastral Engineering Staff Officer

CERTIFICATE OF TRANSCRIPT

I certify that the foregoing transcript of the field notes of the above described surveys in is a true copy of the original field notes.

Chief, Division of Cadastral Engineering
