CHAINS

The north and west boundaries were surveyed in 1941 by Hiester and White. The south boundary, the Base Line, was surveyed in 1914-16 by Abbey Gill Voight.

The following field notes are those of the survey of the east boundary and the subdivisional lines of Township 1 North, Range 12 West.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1947, and the Special Instructions dated February 11, 1963.

Only the true line bearings and horizontal distances for the surveyed lines are given in these notes. Unless described, each corner was monumented with a standard iron post 30 inches long, 2½ inches in diameter, flanged at the base and with a brass cap riveted to the top.

The geographic position of the southeast corner of the township is: Latitude 33°22'38.3" North, and Longitude 113°26'17.5" West, as determined from U.S.G.S. Quadrangle Eagle Tail Mts, dated 1962.

The mean magnetic declination was found to be 14°30' East.

East Boundary, T. 1 N., R. 12 W., Arizona

Beginning at the Std. corner of Townships 1 North, Ranges 11 and 12 West, monumented by an iron post 3 ins. diam., as described in the official record.

North, bet. secs. 31 and 36.

Over rolling desert land, through scattered palo verde, creosote brush and cacti.

3.40 Rocky rim, bears SE. and NW., desc. NE. slope.

7.50 Wash, 50 lks. wide, 1 ft. deep, drains SE.; thence over gently rolling land.

40.00 Point for the ¼ sec. cor. of secs. 31 and 36.

Set the iron post 22 ins. in the ground, cap mkd.

1964

from which

A water well bears N. 35° E., 2.46 chs. distant.

Build a mound of stones W. of the iron post.

43.70 Fence, bears E. and W.

80.24 The cor. of secs. 5, 6, 31 and 32 on the N. bdy. of the Tp., monumented by an iron post as described in the official record.

Land, nearly level.

Soil, fine, sandy clay.

Timber, none.

Undergrowth, dense creosote brush and scattered catclaw.

General Description

The elevation of Township 1 North, Range 12 West, ranges from a low of 1,400 feet to a high of 2,375 feet above sea level in the southwest portion. The northwest portion is nearly level at about 1,500 feet average elevation. The remainder of the township consists of rolling land and small hills. The soil is a fine, sandy clay in the flat areas and shallow, stony soil in the hilly areas. The general drainage is to the south. There is a scattered growth of palo verde and ironwood trees in the major wash areas, while creosote brush and scattered catclaw, also saguaro and other cacti are prominent in the more level areas.

No mining activity was noted within the township during this survey. The land is primarily used for very limited grazing of livestock.

CERTIFICATE OF SURVEY

I, Boyd S. Owens, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 11th day of February, 1963, I have surveyed the east boundary and the subdivisional lines of Township 1 North, Range 12 West,

of the Gila & Salt River Meridian, in the State of Arizona, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.
