# FIELD NOTES

DEPENDENT RESURVEY

of the

NORTH, SOUTH, EAST and WEST BOUNDARIES

and the

SUBDIVISIONAL LINES

of

Township 15 North, Range 21 East

Of the Gila and Salt River Meridian,

In the State of Arizona

## EXECUTED BY

Boyd S. Owens, Cadastral Surveyor

Kenneth D. Herman, Cadastral Surveyor

Under special instructions dated August 1, 19 66, which provided for the surveys  
included under Group Number 447, approved August 1, 1966,  
and assignment instructions dated September 27, 19 66.

Survey commenced October 19, 19 66

Survey completed November 30, 19 66

Township 15 North, Range 21 East  
Gila and Salt River Meridian, Arizona

CHAINS

The east boundary was surveyed by C. B. Foster in 1875. The west boundary was surveyed by M. N. Grant in 1883. The east boundary was retraced and the north and south boundaries and subdivisional lines were surveyed by H. Meyrick in 1883.

The following notes are those of a dependent resurvey of the boundaries and the subdivisional lines of Township 15 North, Range 21 East, Gila and Salt River Meridian, Arizona, designed to restore the corners in their true original location according to the best available evidence.

This survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1947, and the Special Instructions dated August 1, 1966.

Only the true line bearings and horizontal distances for the surveyed lines are given in these field notes. Unless described, each corner was monumented with a standard iron post, 30 ins. long, 2½ ins. diameter, flanged at the base, and with a brass cap riveted to the top.

The geographic position of the southeast corner of the township is: Latitude, 34°38'41" North, and Longitude, 110°03'46.2" West, as calculated from the Tp. cor. of Tps. 15 and 16 North, Rs. 21 and 22 East.

The mean magnetic declination was found to be 14° East.

Dependent Resurvey of the South Boundary,  
Township 15 North, Range 21 East

Reestablishment of the Survey  
Executed by H. Meyrick in 1883

The cor. of Tps. 14 and 15 N., Rs. 21 and 22 E., monumented by a sandstone, 15 x 12 x 3 ins., plainly mkd. with 6 notches on each edge, loosely set with mound of stone W.

At the corner point

Set the iron post 8 ins. in the ground, mound with stone to top, brass cap mkd.

		General Description
		<p>The land in Township 15 North, Range 21 East, is nearly level except for a few bluffs and low rolling ridges. The soil is clay loam with areas of exposed sandstone. Drainage is to the east and north with Silver Creek Canyon cutting through the southeast corner of sec. 36.</p> <p>Moderate to scattered cedars are found in the south central and southeast portion of the township, with scattered patches of cedars in the central area.</p> <p>Grazing of livestock is the predominant interest, as there is a good growth of native grass over most of the township, with windmills and stock ponds affording a continual water supply.</p> <p>Arizona State Highway No. 77 enters the township near the corners of secs. 3 and 4 on the north boundary, cuts southeasterly, leaving the township in the southwest quarter of sec. 35. The Apache Railroad enters the township on the north boundary of sec. 5, meandering south, leaving near the corner of secs. 31 and 32. Track roads, branching off from State Highway No. 77, give access to most of the township.</p>

CERTIFICATE OF SURVEY

1, We, Boyd S. Owens and Kenneth D. Herman, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 1st day of August, 1966, we have made a dependent resurvey of the boundaries and subdivisional lines of Township 15 North, Range 21 East,

of the Gila and Salt River Meridian, in the State of Arizona, which are represented in the foregoing field notes as having been executed by us and under our direction; and that said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.
