## FIELD NOTES

Page 1

OF  
THE DEPENDENT RESURVEY  
OF  
A PORTION OF THE SECOND STANDARD PARALLEL NORTH  
THROUGH RANGES 3 AND 4 WEST  
A PORTION OF THE EAST, SOUTH AND WEST BOUNDARIES  
A PORTION OF THE SUBDIVISIONAL LINES  
AND  
THE SURVEY OF SUBDIVISIONS IN SECTIONS  
2, 3, 7, 8, 9, 17, 24, 33, 34, AND 35  
TOWNSHIP 8 NORTH, RANGE 4 WEST

Of the GILA AND SALT RIVER Meridian,  
In the State of ARIZONA

### EXECUTED BY

PAUL L. REEVES, CADASTRAL SURVEYOR

Under special instructions dated JANUARY 3, 19 79, approved JANUARY 4, 1979,

, which provided for the surveys included under U.S. Survey/Group  
Number 611, and assignment instructions dated JANUARY 3,, 19 79.

Survey commenced JANUARY 3, 19 79

Survey completed MARCH 21, 19 79

- No. 1587B, Dutchman Mill Site P. 57

Township 8 North, Range 4 West,  
Gila and Salt River Meridian, Arizona

## CHAINS

The north boundary (the Second Standard Parallel North) was surveyed by Johnston B. McLaughlin in 1883 and independently resurveyed by Benjamin J. Kinsey in 1929. The west 3 miles of the south boundary were surveyed by Solomon W. Foreman in 1872, and resurveyed in 1929 by Benjamin J. Kinsey who completed the survey of the south boundary at the same time. The east 2 miles on the south boundary were resurveyed by F. Wayne, Forrest and Berk E. Wakeman in 1946. The north  $\frac{1}{2}$  mile between secs. 7 and 12 on the west boundary of the township was surveyed by William A. Hancock in 1882. The remainder of the west boundary was surveyed and the north  $\frac{1}{2}$  mile between secs. 7 and 12 resurveyed by John F. Hesse in 1909. The north 2 miles of the west boundary were resurveyed by Benjamin J. Kinsey in 1929. The east boundary was surveyed by Benjamin J. Kinsey in 1929. A portion of the subdivisional lines were surveyed in 1882 by William H. Hancock and resurveyed in 1929 by Benjamin J. Kinsey who completed the survey of the subdivisional lines and retraced part of mineral surveys No's. 2388 and 2719 the same year.

Francis B. Jacobs executed mineral survey No. 1587 A and B in 1901 and mineral survey No. 2719 in 1910; G. A. Streitx executed mineral survey No. 1866 in 1903; J. J. Fisher executed mineral survey No. 2388 in 1907; Harlow D. Phelps executed mineral survey No. 4264 in 1942; Richard L. Merritt executed mineral survey No. 4357 in 1951.

The following field notes are those of the dependent resurvey of a portion of the Second Standard Parallel North through ranges 3 and 4 west, a portion of the east, south and west boundaries, a portion of the subdivisional lines, certain boundaries of mineral surveys and the survey of subdivisions in sections 2, 3, 7, 8, 9, 17, 24, 33, 34 and 35, Township 8 North, Range 4 West, Gila and Salt River Meridian, Arizona.

The survey was executed in accordance with specifications set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions for Group No. 611, Arizona dated January 3, 1979.

The directions of lines were determined by direct solar observations and refer to the true meridian.

Prior to restoration of any corners, the lines of the original survey were retraced and diligent search was made for any evidence of the original monuments and other calls of the official record. Identified corners were remonumented in their original positions. Lost corners were reestablished at proportionate positions based on the original record but not until exhausting every reasonable possibility of finding direct evidence for the control of each corner. The retracement data were thoroughly verified and only the true line field notes are given herein.

The survey was done with a Zeiss SM 4 total station instrument.

The geographic position of the  $\frac{1}{4}$  sec. cor. of secs. 35 and 36, as scaled from the U.S. Geological Survey Quadrangle Map, "Wickenburg, Arizona," prepared in 1964, is as follows:

Latitude  $33^{\circ}59.6'$  N. Longitude  $112^{\circ}37.9'$  W.

The mean magnetic declination is  $14^{\circ}30'$  E.

<p>GENERAL DESCRIPTION</p> <p>Section 33 of this survey is located approximately 3 miles NE of Wickenburg, Arizona. The general elevation ranges from 2300 to 3500 ft. above sea level.</p> <p>The Hassayampa River flows through the NW portion of the township in a westsouthwesterly direction.</p> <p>Access is by way of Constellation road, with a graded dirt surface, which crosses the SE portion of the township in a NE direction. There are several unimproved roads throughout the township.</p>														

Township 8 North, Range 4 West,  
Gila and Salt River Meridian, Arizona

CHAINS

The vegetation consists of creosote, palo verde, mesquite  
and cacti.

There is no evidence of any mining activity at the  
present time.
