CHAINS

The following field notes are those of the dependent resurvey of a portion of the south boundaries of Townships 12 North, Ranges 8 and 9 East, the dependent resurvey of Homestead Entry Survey No. 427, the dependent resurvey of the east boundary of Tract 37 and a metes-and-bounds survey of Tracts 38 and 39 in unsurveyed Township 11½ North, Range 9 East, Gila and Salt River Meridian, Arizona.

The south boundary (Black Mesa Forest Reserve) of Townships 12 North, Ranges 8 and 9 East, was surveyed by W.H. Thorn in 1902-1903. Homestead Entry Survey No. 427 was surveyed by R.P.A. Johnson in 1915. Tract 37 in unsurveyed Township 11½ North, Range 9 East was surveyed by Ray Harpin in 1971.

The survey was executed in accordance with specifications set forth in the Manual of Surveying Instructions, 1973, and the Special Instruction for Group No. 692, Arizona, dated April 16, 1987.

The direction of the lines of this survey was determined by altitude observations on the sun and refer to the true meridian. Distances were measured with a Zeiss Elta 46 instrument.

Preliminary to the resurvey the lines of the original survey were retraced and search was made for all corners and other calls of the record. Identified corners were remonumented in their original positions. Lost corners were reestablished in a proportionate position based on original records. The retracement data were thoroughly verified and only the true line field notes are given herein.

The geographic position of AP 6, Tract 39 in unsurveyed Township 11½ North, Range 9 East, as computed from a tie to U.S. Coast and Geodetic Survey triangulation station "Buck," located in unsurveyed Township 11½ North, Range 9 East, is as follows:

Latitude: 34°22'17.42" N Longitude: 111°26'37.55" W

The mean magnetic declination is 14° E, as shown on Buckhead Mesa, Arizona, U.S. Geological Survey, quadrangle map, 1973.
