## CHAINS

The following field notes describe the dependent resurvey of a portion of the subdivisional lines and the metes-and-bounds survey of the Table Top Wilderness Area Boundary, Township 8 South, Range 2 East, Gila and Salt River Meridian, Arizona.

The south and west boundaries and a portion of the subdivisional lines were surveyed by W. K. Kierulff, in 1915. A portion of the subdivisional lines were surveyed by Francis E. Joy, in 1934.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions dated April 8, 1996, for Group No. 797, Arizona.

Preliminary to the resurvey, the lines of the original survey were retraced and search was made for all corners and other calls of the record. Identified corners were remonumented in their original positions. Lost corners were restored and monumented at proportionate positions based on the original record. The retracement data were thoroughly verified and only the true line field notes are given herein.

The distances and directions of all lines were determined by using the Trimble 4400 real time kinematic survey system, and refer to the true meridian.

The geographic position of the cor. of secs. 15, 16, 21 and 22, was determined by NAVSTAR GPS, using the technique of real time kinematic positioning. U.S. Coast and Geodetic Survey triangulation station "LIN 1960", was used as the control station. The coordinates refer to the top of the monument.

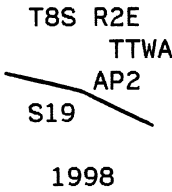

Latitude: 32°43'27.54" N. Longitude: 112°09'08.40" W.  
NAD83 (1992)

The mean magnetic declination of 12 1/4° E. was derived from U.S. Geological Survey computer program MAGPOINT, utilizing the Regional Magnetic Field Model for Epoch 1995 for the dates of the survey.
