Survey of 1st North Extension War Eagle Lode.

Containing 3.67 acres.

Dec. 4. 1876.

General Description.

This claim is situated on the summit and E. slope of War Eagle Mountain.

The ore of the vein contains both gold and silver, gold predominating at the surface, the percentage of silver increasing in the descent.

The country rock consists mostly of granite, with some slate.

The claim contains some pine and oak timber, growing mostly in its Northern portion.

The work performed upon this claim by the claimants or their grantors consists of six shafts as indicated in the foregoing field notes, amounting in the aggregate to an expense of upwards of one thousand dollars (\$1000.00)
