 therefore select a point on the
 south end line as near as
 I can from the developments
 where the lead would cross
 the south end line.

A shaft. 4x6 ft. 14 ft deep.

Bears $N 19^{\circ} E$ 110 ft. distant.

I then find the South end line bears $N 74^{\circ} 36' W$. and $S 74^{\circ} 36' E$. while the line as described in the supplemental notice of locations describes this line at $N 74^{\circ} 31' W$.

I then run.

Location:

This claim is situated in the
Tombstone Mining District, Cochise County

of the Tombstone Townsite
Is bounded upon the South by the
Silver Thread M.C. lot No. 183. Upon

Report upon Examination
East Side line Empire M.C. lot no 46,
Tombstone mining District.
Cochise County, Arizona.

In the matter of the difference existing bet. the Official Survey of the east side line of the empire surveyed by A. J. Mitchell, and the official Survey of the west side line of the Silver Thread and Silver Belt as surveyed by me, the line being common to both Claims, I have the following Report to make,

Accompanying this Report and made a part thereof is a map marked "exhibit A," to which reference will be made.

Report.

I find that the S.W. end line of the Empire mining Claim lot no 46, is common to one of the lines of the Toughnut 1st S. ext'n M.C. lot no 72. From the official notes of lot no 72. (surveyed by J. F. White) I take all the included angles and distances given by him, for the lines near the empire line, and going upon the ground find the Posts as described in the official notes and as shown upon the map, being the distances and angles from Post T.N. 1st.

S. extⁿ M.C. No 2. (which point is also a cor of the Good enough M.C.) to and including Post marked T.N. 1st S. extⁿ M.C. no 3 which point intersects the N.W. side line Tranquility M.C. lot No. 49.

I take from the official Notes of the Empire the included angles as shown upon the accompanying map. and given in black figures.

I find by setting instrument at Post No 6 of Empire, which is also Post No 3, of T.N. 1st S. extⁿ with back sight to Post 5. of Empire, checked by back sight to Post No 2. T.N. extⁿ. That the Empire Post No 5 in its present position (shown by red dot) does not correspond with the surveys of Theo F White and A.J. Mitchell but stands north of its true position.

I find in monument No 4. T.N. 1st S. extⁿ a mesquite stake marked Int^e Empire, being the old initial stake. and find the official distance given by T.F. White from 3 to 4. to cut this point and the two angles. by White & A.J. Mitchell intersect at this point. I then set instrument at Post No 4. and with back sight to Post No 6 of Empire and No 3 of T.N. 1st S extⁿ. Turn to Post No 2. the N.W. cor of the Tranquility. and find the angle to be $100^{\circ} 40'$. as called for in the official Notes. But find this line does not cut the Post on the east side line of the Empire as now placed. The post being south of this line. I set pin at Point A marked upon map. and check angle

$96^{\circ}19'$ on the T.N. 1st ext'n and find it correct,
 I then set instrument at intersection
 of Red lines extended being the lines of
 Empire posts as they now stand and find
 the included angle to be $101^{\circ}31'$ which does
 not correspond with the official notes
 as given by A.J. Mitchell,

I then set instrument at "A" and with
 back sight along east side line of Empire
 measure the angle to the old initial
 monument (stake) being Post no 4 T.N. 1st S ext'n
 and find the angle to be $139^{\circ}02'$ which
 is the same as given in the official
 Notes of Survey by A.J. Mitchell.
 I carefully measure the distance from
 Point A to Post E.M.C. No 2, and find the dis-
 tance to be 9.00 feet.

I find from the above survey that
 Post no 2 of the empire has at some time
 since the official Survey been moved
 south of its true position along the
 east line of the empire 9 ft.
