POOR QUALITY

The following pages are scanned at the best possible quality setting. The original pages are of poor quality and this is the best possible reproduction.

Instruments used a young and Sons improved Solar Transit and steel tape. var. and courses taken by use of the Solar apparatus checked by triangulation to other official surveys.

Note. I find that the Posts placed around this claim were not marked, but had their shakes (letters marked with Paint) tacked to them, which had either been pulled or fallen off.

The Posts set by me around this claim have the letters cut in, with a V marking Iron.

I connect this claim with U. S. M. M. No. 4, as U. S. M. M. No. 2, was destroyed (washed away) in the flood of 1890.

I find the end lines of this claim bear $N 78^{\circ} 52' W$ and $S 78^{\circ} 52' E$ while the survey of 1881, gives the same lines at, $N 77^{\circ} 05' W$ and $S 77^{\circ} 05' E$.

I find the side lines of claim to bear $N 74^{\circ} 48' E$ and $S 74^{\circ} 48' W$ while the survey of 1881, gives the same lines at $N 79^{\circ} 45' E$ and $S 79^{\circ} 45' W$.

I account for this, in this way, that the transit used was not in adjustment and was not a solar Transit, with no means of checking with other official surveys.
