The Triangle Mine ^{411.C} lot No 40. lays
to the east of this claim about 200.
ft. This claim was officially survey
ed in 1881. and designated as lot
No 44. but no application for
Patent was made.

Improvements.

Made upon this claim by claimant
or his grantors consist. - of -

A shaft, 4x6ft. 15ft. deep, $S 41^{\circ} 0' N$ 65ft.
from Post I.M.E.M. No. 1.

A shaft, 4x6ft. 10ft deep, $N 18^{\circ} 30' E$ 220ft.
and a Tunnel 3x7ft. 18ft. long, $N 21^{\circ} 15' E$
250ft. and a cut 5x5ft. 5ft deep $N 21^{\circ} 15' E$
360ft. and a shaft, 4x6ft. 10ft deep $N 31^{\circ} 30' E$
200ft. from Post E.M. No. 4.

And I hereby certify that the value of
said improvements exceeds the sum
of five hundred dollars.

There have been no improvements
made by other parties on this claim.

Instructions used a young & Sons
improved Solar Transit and steel
tape.

Run and courses taken by use
of the Solar apparatus, checked by
triangulation to other official surveys.

Note. The Posts originally set around this claim
were not marked, but thin pieces of shales
painted black were tacked to them.
The Posts set by me around this claim
are marked letters cut in with a V
marking Iron.

I find the end lines of this claim to
bear $N 78^{\circ} 52' W$ and $S 78^{\circ} 52' E$ while
the Survey of 1881. gives the same lines
at $N 77^{\circ} 05' W$ and $S 77^{\circ} 05' E$.

I find the westerly side line bears
 $S 15^{\circ} 30' W$ while the survey of 1881 gives
the same line of $S 18^{\circ} 0' W$.

I find the easterly side line to bear
 $N 26^{\circ} 54' E$ the survey of 1881. gives
this line at $N 29^{\circ} 54' E$.

I account for this difference, in
this way, that the Transit used
was not in adjustment, and was
not a solar, with no means of

5
7
testing or checking with other
official surveys.
