Remarks

The surface of these claims extends along the
 summit and N. and S. slopes of the Sheep Trail
 Range - rugged and rocky and destitute of
 vegetation or timber of any kind. The
 most practicable place from which to mark
 the entire group is the point selected for
 the Lower (or no 3 marking) Tunnel above described
 and the entire group can be economically
 marked through this Tunnel.

Wherever "course" is used in relation to
 ravines or gulches in these notes the direction
in which the water would flow, if there were
 any (which seldom happens) is meant.

All the lines and corners of this survey
 were first established by preliminary location
 survey.

Ledges.

- Sheep Trail From Discovery shaft on this claim the ledge or vein 2 to 10 ft wide cropping extends S. $83^{\circ} 25'$ E 1000 feet.
- Lady Bright From Discovery shaft on this claim ledge extends S. 54° E. traced by croppings, 900 feet. It is an extension of the vein of the Sheep Trail.
- Minnie. From Discovery shaft on this claim the ledge extends S. 54° E. as shown by croppings 900 feet and is parallel and below the Lady Bright ledge.
- Beuleard From Discovery shaft on this claim the ledge extends S. 54° E. cropping at intervals but traceable 700 feet. It is an extension of the Minnie vein.
- Red Hill From the Discovery shaft on this claim the ledge shown by surface croppings extends S. $83^{\circ} 25'$ E. 300 feet - parallel to the Sheep Trail vein.

Spurs and lateral feeders and stringers of ore shown by croppings on all of these claims.

Instrument.

This survey was made with a Gurley Transit tested and checked by observation upon Polaris. The courses were deflected from the true meridian by direct solar observation.

The distances were measured by a 50 foot steel chain.

Adjoining Claims

The Empire Mining Claim W. W. Zopp claimant adjoins the Sheep Trail on the West. It is unsurveyed.

The Tunnel Mining Claim unsurveyed under the same ownership with this group adjoins the Sheep Trail claim on the North.

Adjoining Claims, continued.

There is supposed to be a mining claim located south of and near to the Benward claim but the name of it, or the name of the claimant, I was unable to ascertain.

There are no other adjoining claims and none other in the immediate vicinity so far as I could find out.

No 1368.

There being no corner of a public Survey and no U.S. Loc. Mon. within a radius of three miles of this claim I proceeded to establish a Mineral Monument as follows:

Upon the top of a high peak of the Sheep Trail range which commands a good view of the country for many miles around I set a stone 3 inches long, 2 1/2 inches wide and 8 inches thick 16 inches in the ground marked U.S. L. M. 1368 plainly chiseled with a (+) cross at exact-point of location.

Along side this monument I built a conical mound of stone four feet high six feet base in the center of which I placed a 4x4 inch square pine post 7 feet long scribed U.S. L. M. No. 1368.

From the (+) Mon. of stone, cor. No. 1. distance - a Loc. mon. of the Lady Bright lode identical with West-End lode of the Sheep Trail lode hrs. S. 75° 37' E. 10 5/8 - 1/2 dist.

The highest point of Finger Butte, a noted land mark hrs S. 25° 20' E. 4 miles dist.

The Companies stamp mill situated on the East bank of the Colorado river hrs N. 83° 11.6 1/2 miles dist.
