~~IMPROVEMENTS~~

(32)

Survey No. 1796.

I certify that the value of the labor and improvements on this group, placed thereon by the claimants or their grantors is not less than \$500.00 for each claim thereof, and that said improvements consist of:-

~~CONNOLLY~~

No. 1 Discovery shaft 4 X 9 X 550 ft, brs from cor No. 4,

S. 58° 01' W. 385 ft.

Double compartment timbered from collar to sump

Value \$16500.00

Drift at 50 ft from bottom of shaft 4 X 6 X

240 ft, course N. 50° W.

Value 2500.00

Total value of shaft and drift

\$19000.00

Shaft No. 1 is situated on the E. side, at the base of Bald Mountain, the apex of which is near the N.E. cor of the Bald Mountain Claim and is the highest point on the group. The slope is gradual on all sides except the East, which is precipitous; the radius of its Northern base passing near the N. end of the Republican and adjoining claims; its southern extremity lying along the S. end of the Number Two, Utah and adjoining claims. The central position of Shaft No. 1 develops every claim of this group, drifts radiating from this point furnish what has been proven to be the only practical method of development and ore extraction that can be used in this district, which is strictly one of deposits and not of veins. Shaft No. 1 is also the most accessible for transportation to the railroad at Glance station, one mile North, which is the present shipping point and post-office.

Developments from centrally located shafts is followed by some thirty large companies operating in this district, notably the Copper Queen Consolidated Mining Company, working some 150 claims from 3 shafts; the Lake Superior & Pittsburg, working about 70 claims from 2 shafts; the Calumet & Arizona working about 30 claims from 1 shaft; the Bisbee West working
