U. S. SURVEYOR-GENERAL'S FINAL CERTIFICATE ON FIELD NOTES.

Department of the Interior,

OFFICE OF U. S. SURVEYOR-GENERAL,

Phoenix, Arizona.

Aug. 18"

1905.

I, U. S. Surveyor-General for the district of Arizona.

do hereby certify that the foregoing transcript of the Field Notes, return and approval of the survey of the mining claim of Bisbee West Copper Mining Co.

known as the White, Florence, May, Rose, Augusta, West Bisbee No. 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12.

situate in Warren

Mining District, Cochise County, Territory of Arizona.

in Section APPROX., Township No. 23 S., Range No. 24 E. unsurveyed, and designated as Survey No. 2094,

has been correctly copied from the originals on file in this office; that said Field Notes furnish such an accurate description of said mining claim as will, if incorporated into a patent, serve fully to identify the premises, and that such reference is made therein to natural objects or permanent monuments as will perpetuate and fix the locus thereof.

And I further certify that less than five hundred dollars' worth of labor has been expended or improvements made upon each of said mining claims by claimant or its grantors, and that said improvements consist of, at time of survey, 1 discovery shaft on each claim, value \$100, making a total of 16 shafts, total value \$1600.00

and that no portion of said labor or improvements has been included in the estimate of expenditures upon any other claim.

I further certify that the plat thereof, filed in the U. S. Land Office at Tucson, Arizona,

is correct and in conformity with the foregoing Field Notes.

Affidavit of \$500 improvements on each location.

I hereby certify that the value of labor and improve-
ments on this ground, placed thereon by the claimant or
its grantors is not less than \$500 for each location
thereof, and that I further certify that the improve-
ments for each location stated below were
made by said applicant prior to expiration of the period
of publication.

This work to the value of \$100 has been done on each
location, the remainder was expended on two deep
shafts designed to develop the whole group. No. 7 shaft
on West Bisbee No. 16, Survey No. 1808, at N. 8 Deg. ...
650 ft. from Corner No. 1, which is identified with Cor.
No. 1 Road Lode of this survey, and a deep shaft on West
Bisbee No. 14, Survey No. 1806, N. 47 Deg. W. 1040 ft.,
from Cor. No. 2, and N. 10 Deg. E. W. 1870 ft. from Cor.
No. 1 of August Lode of this survey, sunk since the date
of Survey 1806.

No. 7 Shaft on West Bisbee No. 16 Survey No. 1808
is 6.8 x 10.5 ft. in the clear, 700 ft. deep and tim-
bered to the bottom. It has two compartments, the
hoisting 4.8 x 4.5 ft. and the underground roadway 4.8
x 4.8 ft. within the timbers. There is a shaft house
and black smith shop on the ground. At the time Survey
No. 1806 was made it was reported as a one-compartment
shaft with a value of \$15,000. With its enlargement and
equipment, its value is \$29,000. The under-ground
development is as follows:

500 ft. level drift 4x7x30 ft. N 7 Deg. 10' W.	\$500.00
500 ft level drift 4x7x30 ft N 1 Deg. E,	\$400.00
400 ft level drift 4x7x30 ft North,	300.00

600 ft level drift 4x7x150 ft, Northwest,	\$400.00
700 ft level drift 4x7x150 ft, Northwest,	1500.00
700 ft level pump station and Cameron pump,	<u>3500.00</u>
Total,	\$4400.00

Of the original value the sum of \$5502 was applied on improvements on the six claims of Survey No. 1603. The remainder being expressly reserved to apply on the claims of this survey. No part of the total of \$44,500 save the \$3502 has been applied as improvements on claims other than those embraced in this survey.

The main shaft on West Bisbee No. 14 Survey No. 1606 is 6.5 x 16.5 x 485 ft deep and timbered with three compartments, two hoisting, each 4x6x4.5 ft and one pump and ladderway 5.5 x 4.5 ft within the timbers.

Its value is	\$55,500.00
Drift on 800 ft level 4x7x100 ft South,	<u>1,800.00</u>
	\$56,300.00

A part of this has been apportioned to claims outside of this survey. This leaves the total valuation of the two main shafts and drifts \$71,850, of which \$3,800 has been allotted to six claims in survey No. 1603, leaving \$66,148 which has not yet been applied.

The property of the Bisbee West Mining Company embraces twenty-two claims as follows:

- 16 claims in Survey No. 2004, and
- 6 claims in Survey No. 1606.

A 1/16 interest in the above \$66,148 has been accorded to each of the 16 claims in Survey No. 2004. These two main shafts are so located that it is possible to explore and develop this group from them. From an economic standpoint, the locations are the most favorable the group affords, as they are the most accessible from the railroad both in matter of grades and of distance.

The topography of the Western and particularly of the Northwestern part of the group is so rough that extensive mining operations would be heavily handicapped by undue cost of bringing in supplies. The shafts are located so as to explore certain fault planes most prominently developed near the East end of the group. The drifting is done to this end.

Mining experience in this district has proven that faults have a powerful influence in the localization of ore deposits.

The development of the mineral possibilities is best carried out by conducting mining operations along lines laid down by intelligent study of the structural geology.

Bisbee is a camp of deep-seated deposits. It has been proven by the experience of other mining companies operating in the Warren Mining District, that the ore bodies when they exist as deposits in the Carboniferous line are best economically developed by vertical shafting or cross-cutting supplemented by raises and winzes. This method of development is adopted by the following companies: Copper Queen Consolidated Mining Co., working about 35 claims from seven main shafts, Lake Superior and Pittsburg Mining Co. about 35 claims from two main shafts, the Calumet and Pittsburg Mining Co. is developing about 15 claims from two main shafts, the Saginaw Development Co. is developing about 12 claims from one shaft, the Denn Arizona Development Co. is developing about 7 claims from one main shaft. In fact it has been the practice of every legitimate mining company operating in the Warren Mining District to prove up their ore bodies in the manner outlined above. Inasmuch as every foot obtained in depth is an approach to the level at which drifts may be run to the edges of the group in the reasonable hope of encountering ore bodies, the

shaft No. 3 on West Bisbee No. 16 Survey No. 1606, and the main shaft on West Bisbee No. 14 Survey No. 1606 must be justly considered as tending to develop the entire group and thus the claims of ^{this} ~~that~~ survey.
