## INSTRUMENT.

This survey was made with a G.L. Berger & Sons No. 1 C transit; the courses were deflected from the true meridian as determined by a solar observation checked by an observation on Polaris. The ~~courses~~<sup>distances</sup> were measured with a 300-foot steel tape. Magnetic variation at all corners, 12°30' E.

*Franklin Smith*

U. S. Deputy Mineral Surveyor.

Dated at Bisbee, Arizona

*June 10<sup>th</sup>* 1905.

## Note:-

In the survey of the Wash lode, I find that cor. No. 3 Columbia lode; cor. No. 3 Rabbit lode and Cor. 4 Rabbit lode, all of survey No. 1795, are not in alignment, and that the course N. 12° 47' E. of line 3-4 Rabbit lode as reported in survey No. 1795 is in error, and the conflict that would appear to exist between the Wash lode, survey No. 2095, with the Rabbit lode, survey No. 1795, does not exist in the field, as corner No. 2 of the Wash lode falls to the east of line 3-4 Rabbit lode.
