This survey was made with a Gurley light mountain solar transit.The courses were deflected from the true meridian as determined by direct solar observations.The distances were measured with 100-ft.and 500-ft.steel tapes.

The veins are all traceable on the surface.It is the intention of the owner to worke these lodes as a group and will connect the workings at debth.

Note:- I think that Cor.No.3 Walter Scott is identical with cor.No.4 Centipede lode sur.No.1586, although there is nothing at that place to indetify the Cor.of sur.No. 1586.
