U. S. SURVEYOR-GENERAL'S FINAL CERTIFICATE ON FIELD NOTES.

Department of the Interior,

OFFICE OF U. S. SURVEYOR-GENERAL,

Phoenix, Arizona,

October 15, 1907

I, U. S. Surveyor-General for District of Arizona

do hereby certify that the foregoing transcript of the Field Notes, return and approval of the survey of the mining claim of

E. F. Thompson

known as the RURAL NO. 2

situate in Wallapai

Mining District, Mohave County, Arizona

in Section Approx., Township No. 23 N., Range No. 17 W., Unsur., and

designated as Survey No. 2456, has been correctly copied from the originals on file in

this office; that said Field Notes furnish such an accurate description of said mining claim as will, if incorporated into a patent, serve fully to identify the premises, and that such reference is made therein to natural objects or permanent monuments as will perpetuate and fix the locus thereof.

And I further certify that five hundred dollars' worth of labor has been expended or improvements made upon said mining claim by claimant or his grantors, and that said improvements consist of 3 shafts and 1 tunnel with winz, total value \$4330.

and that no portion of said labor or improvements has been included in the estimate of expenditures upon any other claim.

I further certify that the plat thereof, filed in the U. S. Land Office at Phoenix, Ariz.

is correct and in conformity with the foregoing Field Notes.

Frank S. Ingalls,

United States Surveyor-General for Arizona.

An Act Concerning Mines.

Be it enacted by the Legislative Assembly of the Territory of Arizona :

That Act No. 42 of the Eighteenth Legislative Assembly of the Territory of Arizona, approved March 5th, 1895, be amended so as to read as follows:

SECTION 1. Every notice of location of a lode mining claim shall contain: First, the name of the claim located; second, the name of the locator; third, the date of location; fourth, the number of feet in length of said claim and the number of feet claimed on each side of the center of the discovery shaft, lengthwise of the claim; fifth, the general course of the lode, deposit or premises located; sixth, the locality of the claim with reference to some natural object, or permanent monument, that will identify the claim; and shall be filed with the County Recorder for record within ninety (90) days after same shall have been located.

All lode mining locations hereafter located, the certificate of location of which shall not contain: First, the name of the lode or premises; second, the name of the locator or locators; third, the date of the location; fourth, the number of feet in length of said claim and the number of feet claimed on each side of the center of the discovery shaft, lengthwise of the claim; fifth, the general course of the lode or premises, as near as may be; sixth, the general locality of the claim with reference to some natural object or permanent monument that will identify the claim, shall be void.

Before filing such location certificate with the County Recorder of the proper County, the discoverer shall locate his lode claim by: First, sinking a discovery shaft upon the premises so claimed, to a depth of at least ten feet from the lowest part of the rim of said shaft at the surface, and deeper if necessary, until there is shown by such work a lode deposit or mineral in place; second, by posting at the point of discovery on the surface, a plain sign, or notice, substantially conforming to the location certificate; third, by marking such claim or premises on the ground so that its boundaries can be readily traced.

Such surface boundaries shall be marked by eight substantial posts projecting at least three feet above the surface of the ground, or by substantial stone monuments at least three feet high, to-wit: One at each corner of said claim, and one at the center of each end and side line thereof.

Any open cut, adit or tunnel, which shall be made as above provided for, as a part of the location of a lode mining claim, and which shall be equal in amount of work to a shaft ten feet deep and four feet wide by six feet long, and which shall cut a lode or mineral in place at a depth of ten feet from the surface, shall be equivalent as a discovery work, to a shaft sunk from the surface.

The discoverer shall have ninety days from the date of discovering the lode and the posting of the notice thereon, to perform said discovery work thereon.

If at any time the locator of any mining claim heretofore or hereafter located, or his assigns, shall learn that his original certificate was defective, or that the requirements of the law had not been complied with before filing, or shall be desirous of changing his surface boundaries or of taking in any additional ground which is subject to location, or in case the original certificate was made prior to the passage of this law, and he shall be desirous of securing the benefits of this Act, such locator or his assigns, may file an amended certificate of location subject to the provisions of this Act regarding the making of new locations.

The amount of assessment, or representation work, or improvements, to be done or made during each year, after the completion of the location as heretofore provided, and the time for doing the same shall be as provided by the laws of the United States.

Within three months after the expiration of the period of the time fixed for the performance of annual labor or the making of improvements upon any lode mining claim or premises, the person on whose behalf such work or improvement was made, or some person for him, knowing the facts, may make and record in the office of the County Recorder of the County wherein such claim is situated an affidavit in substance as follows:

TERRITORY OF ARIZONA,

ss.

County of..... being duly sworn, deposes and says, that he is a citizen of the United States, and more than twenty-one years of age, and resides at..... in..... County, Arizona Territory, and is personally acquainted with the lode mining claim and premises known as..... mining claim or lode, situated in..... Mining District, Arizona Territory, the notice of which premises, is recorded in the office of the County Recorder of said County in Book..... of Records of Mines, at page..... that between the..... day of..... A. D..... and the..... day of..... A. D..... at least..... dollars worth of work and improvements were done and performed upon said premises or lode, not including the location work of said claim. Such work and improvements were made by and at the expense of..... owners of said premises, for the purpose of complying with the law of the United States pertaining to assessments or annual work, and (here name the miners or men who worked upon the claim in doing the work) were the men employed by said owner and who labored upon said premises, and who did said work and improvements, and said work so done upon said premises is described as follows, to-wit: (Here describe the work done.)

Subscribed and sworn to before me..... this..... day of..... A. D..... My commission as Notary Public expires on the..... day of..... A. D..... [Notarial Seal]..... Notary Public.

Such affidavit when so recorded shall be prima facie evidence of the performance of such labor or the making of such improvements and said original affidavit after it has been recorded, or a certified copy of record of same, or the record of same shall be received as evidence accordingly by all the Courts of this Territory. The relocation of forfeited or abandoned lode claims shall only be made by sinking a new discovery shaft and fixing new boundaries in the same manner and to the same extent as is required in making a new location; or the relocater may sink the original discovery shaft ten feet deeper than it was at the date of the commencement of such relocation, and shall erect anew, or make the old monuments the same as originally required. In either case a new location monument shall be erected and the location certificate shall state if the whole or any part of the new location is located as abandoned property.

This diagram is to give locator a general idea of plan of location under the new law. The Discovery Shaft can be in the center of claim or any distance from either end desired. In the diagram it is placed 500 feet from one end and 1000 feet from the other. Commence description of claim at a center end monument, giving its distance and direction from center of Discovery Shaft; thence bound the claim in either direction. In description be careful to state locality of claim with reference to some natural object, or permanent monument, as will identify the claim.
