Note: The mouth of No. 3 Tunnel on Mineral Zone No. 8 lode is near the foot of a steep hill which slopes to the south-east and by extending the tunnel, the presumed course of vein in Mineral Zone No. 9, Mineral Zone No. 7, Mineral Zone No. 5 and Mineral Zone No. 2 lodes would be intersected and the copper ore on these lodes can thus be taken out through this main working tunnel. The surface of the ground on the lodes mentioned is much higher than the mouth of said No. 3 Tunnel. This tunnel is run on a course of N. 18° W. and at the present time is 179 ft. long; value of this work is \$1790., 1/5 of which is \$358. and is credited to each of the following named lode claims; Mineral Zone No. 8, Mineral Zone No. 9, Mineral Zone No. 7, Mineral Zone No. 5 and Mineral Zone No. 2 lodes and therefore is considered as a common improvement for the said lodes. This tunnel as run would enter no other ground claimed by the applicant and therefore is not claimed as a common improvement for any other lodes in this survey.
