INSTRUMENT,

This survey was made with a Gurley solar transit. The  
 courses were deflected from the true meridian as determined  
 by direct solar observations. The distances were measured  
 with 100-ft. and 500-ft. steel tapes.

*Could not find any*  
~~\* I made a diligent search for corners on the meridian within  
 two miles of this survey except the corner to twp. 16 &  
 17 N.R. 1E & R. 1W accordingly I calculated the intersections  
 from the official survey of the meridian.~~

Common Improvements

From Shaft No. 2 on Little Daisy lode, common improvement,  
 the surface descends slightly to the South and West and  
 ascends to the North and East. This shaft is so located that  
 each lode in this claim can be developed by sinking, drifting  
 and cross cuts.

\* Having made a diligent search for corners on the  
 meridian I could not find the 1/4 Cor. between Secs. 1 and  
 6, T. 16 N., Rs. 1 E. and 1 W., the Cor. to Secs. 1, 6,  
 7 and 12, the 1/4 Cor. bet. Secs. 7 and 12, the Cor. to  
 Secs. 7, 12, 13 and 18, and the 1/4 Cor. bet. Secs. 13 and  
 18, said township and ranges, accordingly I calculated,  
 the intersections from the official survey of the Mer-  
 idian, from the Cor. to Ts. 16 and 17 N., Rs. 1 E. and  
 1 W.
