Owing to the natural topography of the country, the Bill Jenkins, Horseshoe No. 2, Blue Bell, Minnie Williams and Kimberly lodes may be developed advantage-ously from the No. 2 shaft on the Bill Jenkins lode, as may be seen upon inspection of the accompanying map marked: "Contour Map Sur. No. 3145", which is a part of these field notes. The contours were taken from the U.S.G.S. topographic sheet of the Clifton quadrangle. The lodes to which I have accredited this working are all higher than the collar of the shaft so they may be developed at depth by drifts driven from the different

levels. The Pretoria, Dominion and Victoria lodes are lower than the bottom of said shaft, therefore I do not consider it a common improvement for these lodes.

### INSTRUMENT.

This survey was made with a Buff and Berger light mountain transit. The courses were deflected from the true meridian as determined by Polaris observation. The distances were measured with 5,50 and 500 ft. steel tapes.

#### ADJOINING LODES.

The lodes on the North are, Lot No. 58, Boulder lode and Lot No. 57 Horse Shoe lode, on the East Sur. No. 3019 Vicksburg lode, claimant herein, on the south Deep Down, Queen Lil and Gramercy lodes, unsurveyed, Keating Mines Company, Claimant, Scotchman, America and Jap lodes, unsurveyed, A. Burke, Claimant, on the the West, by Sur. No. 1276 Burning Moscow and Grand Finale lodes, claimant herein.
