This shaft and the drifts therefrom have been made as a common improvement for this group of claims by the Noscut Mining Company. The shaft is located so that a good road can be built to it easily and with good grades. It is also situated so that supplies can be easily brought to it, and at this shaft now are a hoist and air compressor. From the bottom of this shaft drifts and cross cuts can be run to all the claims of this group and the possible orebodies explored and opened up more economically than by sinking expensive shafts on each claim of the group. The two claims Dimple No. 11 and the Dimple No. 12, owned by this company, have no share at present in the work mentioned above as they were located subsequent to the completion of the work mentioned above.
