		eide, 30 ed 40-2-	This survey was made with a Bausch & Lomb Precise Transit No. 9259, with horizontal limb 5-1/2 ins. diam., having two single opposite verniers, and full vertical circle 4-1/4 ins. diam., having two double opposite verniers, all verniers reading to one minute of arc. The eyepiece is equipped with a colored glass set in the dust shutter, for making direct observations on the sun. The instrument was in good condition at the time of the survey, and all adjustments were in good order. All azimuths insthis record were determined by the method of double horizontal angles referred to the meridian determined by the following observations: May 15, 1962, at Cor. No. 4 of the Copperopolis lode, in latitude
And the second s		ground,	35°225 No., fand lengitude.114°10° Word Imake anseries of four altitude observations (in two sets of two each) upon the sun for azimuth, at approximately equal time-intervals, two each with the telescope in direct and reversed positions, observing opposite limbs of the sun, and reading the horizontal angles clockwise, from Cor. No. 1 of the Fox #3 lode 1200 feet.5°19; SWootquthe sun

the second the springer of the respondent of freedrames of the entire mountains mineral source Ma.

AMENDED NOTICE OF LOCATION. BE IT KNOWN: that we, G. D. Atlee and F. L. McCracken, citizens of the United States, having discovered valuable mineral in place within the boundaries of this amended Mining Claim, do hereby locate and claim 1500 ft. along the lode line, and 600 ft. in width, being 300 ft. on each side of the lode line. This claim was formerly known as the "William Tell," and shall continue to be known as the "William Tell" mining claim. The general direction of this claim is from the East to the West. We claim 1400 Ft. in an easterly direction, and 100 ft. in a westerly direction. This amended location is made for the particular purposes of reuniting the parts of the original "William Tell" mining claim, which was divided by a sale of the southerly 200 ft. by the owners, and of removing the location monument to a point more correctly adjacent to the original location work. In general, this amended location is made for the purpose of correcting any and all defects and errors in the original location notice, and any failure to comply with the requirements of the law before filing the same, and for the purpose of. changing the surface boundaries of the claim, and of taking in any and all parts of any and all overlapping claims which have been a andoned, or any other vacant ground, and for the purpose of securing any other and further henefits which may thereby be obtained; and for these purposes the undersigned hereby make, and will file for record at the proper time, this additional and amended location notice of said claim. This amended location embraces said original discovery, and also all development and assessment work which has been performed on, or for the benefit of said original claim, and the undersigned, by making this amended location, do not abandon any rights which they may have had under said original location, but claim that this amended certificate of location relates back to the date of said original location, and that they are entitled to the benefits of the original discovery, and also of all work done, and improvements made upon or for the benefit of said original claim. This claim is situated in the Wallapai Mining District, Mohave County, Ariz., and about one mile in a southeasterly direction from the town of Mineral Park, Ariz., northward from, and adjoining the "Blue Banner" claim of the Southwest Turquoise Co. This claim is bounded as follows: Beginning at a monument of stone at a point about 100 ft. in a westerly direction from the center of this amended (and original) location cut, thence northerly about 300 ft. to a momment of stone at the N.W. corner, placed upon the patented I thaca Mining Claim, thence easterly 1500 ft. to a monument of stone, at the M. E. corner, thence southerly 300 ft. to a momment of stone at the easterly End Center, thence southerly 300 ft. to a monument of stone, at the S. E. corner, thence westerly 1500 ft. along a surveyed line of division between the "Blue Banner" and "William Tell" claims, to a monu

of stone, at the S.W. corner, thence northerly 300 ft. to the westerly End Center, the place of beginning. BE IT KNOWN that deeds showing title to all portions of this reunited slaim, the amended "William Tell", are in the hands of the undersigned. Dated and posted on the ground, this 26th day of October 1914, G. D. Atlee Locator Witness Mrs. Ida Atlee P.L. McCracken Locator.
