FEET

This survey was made with a W. & L.E. Gurley transit, No. 57289, equipped with horizontal limb $6\frac{1}{2}$ ins. diam., having two double opposite verniers, and a full vertical circle 5 ins. diam., having one double vernier; the horizontal verniers read to 30 secs. of arc; the vertical vernier reads to one minute of arc. This instrument was used in all-purpose taping and alignment procedures where great distances were not involved. Distances greater than 500 feet were measured in many cases using electronic distance measuring equipment, i.e., the Hewlett-Packard Model 3800 Distance Meter, Ser. No. 0987 A 00472, having a range of 10,000 feet and an absolute accuracy in the normal operating temperature range of 0.01 feet + the distance measured divided by 100,000. In all instances wherein the distance meter was used, vertical angles were measured with a Kern theodolite, Model DKM 2 AE, Serial No. 145997, with microscopic angle-reading capabilities enabling the instrument man to read angles, either horizontal or vertical, to 1 sec. of arc. All three of these instruments were in good condition at the time of the survey and all adjustments were in good order.

All azimuths in this record were determined by the method of deflection angles referred to the meridian determined by the following observation:

November 23, 1971, at Cor. No. 4 of the IL 55 mill site, latitude $33^{\circ} 22' 54.6''$ N., and longitude $110^{\circ} 54' 53''$ W., I make a series of six altitude observations upon the sun for azimuth at approximately equal time intervals, three each with the theodolite telescope in direct and reversed positions, observing opposite limbs of the sun, and reading the horizontal angles from a reference point approximately 1500 feet southwesterly clockwise to the sun.

Mean time of observation, 105th
meridian standard time 10:29 a.m.

Declination of sun at mean
time of observation = $20^{\circ} 18' 48''$ S.

Mean observed vertical angle
to sun's center, corrected for
refraction and parallax = $31^{\circ} 11' 18''$

Mean horizontal angle from
reference point to sun's
center, turned clockwise and
to the right to sun's center = $301^{\circ} 44' 11''$

True bearing to reference point =
S. $30^{\circ} 29' 50''$ W.

FEET

The lines were measured with either a Lufkin steel tape or with the aforementioned electronic distance meter. The tape was 500 feet in length, graduated every foot for 500 ft., with an added foot on the zero end graduated in tenths and hundredths; the tape was compared with a standard 100.00 foot tape at the time of the beginning of the survey and found to be correct. The distance meter was compared with a taped course, 1200 ft. in length, measured as a base-line with a standard 100.00/ft. tape, and found to be precise and accurate.

All lines and connections of this survey were run by direct methods.

The magnetic declination observed at each corner of the survey gave a uniform value of 13° 30' E.

Note concerning monumentation: With the exception of those corners which were not monumented for reasons given in each case, or which were monumented as otherwise described herein, I have set iron posts at each corner of each mill site claim comprising this survey. Each iron post consists of a 3/4-inch nominal inside diam. galvanized water pipe having a 1 ins. exterior diam.; each pipe has been placed in the ground in a foundation consisting of not less than 1/2 cu. ft. of high early strength portland cement concrete mixed at the site. Brass caps have been securely attached and marked as described, using 1/8-in. steel dies for stamping. Alongside every corner monument I have erected a rock monument having a base two feet minimum diam., and a height of not less than two feet.

SURVEY NO. 4694

IL 40 Mill Site

At Cor. No. 1 of the IL 40 mill site, identical with Cors. Nos. 1 of the IL 42 and IL 43 mill sites of this survey.

Set an iron post, 1 ins. diam., 2 ft. long, 17 ins. in the ground, with brass cap mkd. IL 40-1, IL 42-1, and IL 43-1-4694; from which

The standard cor. of secs. 34 and 35, T. 1 N., R. 14 E., G. & S. R. M., bears S., 11° 39' 01" E., 3266.63 ft. dist., an iron post, 2 ins. diam., surrounded by a mound of stone raised to base of U.S. B.L.M. brass cap marked as described in the official record.

	LOCATION	
	This survey is located in Uns. secs. 34 and 35, T. 1 N., R. 14 E., and in Sec. 2, T. 1 S., R. 14 E., of the Gila and Salt River Meridian.	
	The survey of the thirty-six (36) mill site claims embraced in the order for mineral survey and described herein is identical with the respective locations or amended locations as marked on the ground.	
	OTHER CORNER DESCRIPTIONS AND SUPPLEMENTAL DATA	
	Sur. No. 3953 Copper Fortune lode: Cors. Nos. 3 and 4 are 2½ ins. diam. brass-capped pipes, firmly set and properly marked except that the letters I.C.C.Co. have been included on the caps. These pipes were purportedly set many years ago in the identical positions formerly occupied by the original pine posts which were rotting away, according to the testimony of	

FEET

Herbert H. Mellus, Chief Mining Engineer for Inspiration Consolidated Copper Company, owners of all the lodes embraced within Sur. No. 3953. As no superior evidence could be found pertaining to the proper placement of these corner monuments, all are accepted as correct. Line 3-4 was found to be S. 8° 56' 25" W., 1249.55 ft., instead of S. 8° 53' W., 1249.7 ft. dist., as approved.

Sur. No. 3953 Copper Panther No. 2 lode: Cors. Nos. 1 and 2 are 2½ ins. brass-capped pipes of the type described in the preceding paragraph. Line 1-2 was found to be S. 83° 15' 42" W., 601.09 ft., instead of S. 83° 17' W., 600 ft., as approved.

Sur. No. 3953 Candelaria lode: Cor. No. 4 is a 2½ ins. brass-capped pipe of the type described in the two preceding paragraphs. Lines 3-4 and 4-1 are shown as approved.

Sur. No. 4684 A&B BLUEBIRD NO. 19 AMENDED lode, BLUEBIRD NO. 20 lode, JOAN MILL SITE 55, LOTUS MILL SITE 6, LOTUS MILL SITE 7, LOTUS MILL SITE 8, and LOTUS MILL SITE 9: All corners are 2 ins. diam. brass caps mounted atop 1 ins. diam. galv. pipe posts, excepting Cors. Nos. 3 and 4 of JOAN MILL SITE 55 which were never monumented during the execution of Sur. No. 4684 B. All lines are shown as approved.

Sur. No. 4698 Bill Shaft No. 3 lode: Cor. No. 2 is witnessed as described in the official record for Sur. No. 4698. Cors. Nos. 1 and 4, as well as witness Cor. No. 2 are 2 ins. diam. brass caps mounted atop 1 ins. diam. galv. pipe posts. Lines 4-1 and 1-2 are shown as approved.

The line between the standard ¼ sec. cor. of sec. 34, T. 1 N., R. 14 E., and the standard cor. of secs. 34 and 35, T. 1 N., R. 14 E., bears N. 89° 58' 25" E., 2634.70 ft. dist., instead of N. 89° 58' E., 2638.02 ft. dist., as approved, 1967 Dependent Resurvey, or EAST, 2640 ft. dist., as approved 1906 Resurvey.

The line between the standard cor. of secs. 34 and 35, T. 1 N., R. 14 E., and the standard ¼ sec. cor. of sec. 35, T. 1 N., R. 14 E., bears N. 89° 59' 14" E., 2634.67 ft. dist., instead of EAST 2637.36 ft. dist., as approved 1967 Dependent Resurvey, or EAST, 2640 ft. dist., as approved 1906 Resurvey.

CERTIFICATE OF SURVEYOR

Name of Mineral Surveyor Travis L. Gant	Date April 3, 1972
--	-----------------------

I HEREBY CERTIFY That in pursuance of an order received from the Bureau of Land Management, at Phoenix, Arizona, dated June 21, 1971, 19 71, I have carefully executed the survey of the claim of Inspiration Consolidated Copper Company, known as the (lode, placer, or mill site) * (See attached sheet), situated in Uns. secs. 34 and 35, Township 1 North, and in sec. 2, Township 1 South, Range 14 East, Gila and Salt River Meridian, in the State of Arizona.

This survey, designated as number 4694, has been executed by me and under my direction and has been made in strict conformity with said order, the Manual of Instructions for the Survey of Public Lands of the United States, and in specific manner described in the foregoing field notes.

I FURTHER CERTIFY That the labor expended and improvements made upon and for the benefit of the (lode or placer) location(s) embraced in the said mining claim by claimant(s) or its grantors are fully stated in my report. The character, extent, location, and itemized value are specified in full detail. No portion of, or interest in, said labor and improvements so credited to this claim has been included in the estimate of expenditures upon any other claim.

Globe, Arizona (Location)	<i>Travis L. Gant</i> (Signature of Mineral Surveyor)
------------------------------	--

CERTIFICATE OF APPROVAL

Office Arizona State Office
Location Phoenix, Arizona
Date March 5, 1973

The foregoing field notes of mineral survey number 4694, in Uns. Secs. 34&35, T. 1 N., R. 14E. and Section 2, surveyed unsurveyed Township 1 S., Range 14 E., Gila and Salt River Meridian, in the State of Arizona, executed by Travis L. Gant, Mineral Surveyor, under order dated June 21, 1971, 19 71, having been critically examined and the necessary corrections made prior to their certification by the surveyor, the field notes and the survey therein described are hereby approved.

<i>Edward J. Hoffman</i> (Authorized Signature)	Acting State Director (Title)
Edward J. Hoffman	

CERTIFICATE OF TRANSCRIPT

I HEREBY CERTIFY That the foregoing transcript of field notes of the above-described mineral survey number is a true copy of the original field notes.
