Timber, Cedar & pine.

Heavy timber or dense brush  
79.56 Chs.

I return to the meridian  
established at camp Sept. 28, 1902,  
and at 4<sup>h</sup> 50<sup>m</sup> p.m., first, set off  
 $8^{\circ} 23' S.$  on the decl. arc;  $35^{\circ} 09'$  on its  
lat. arc; and test the adjustment  
of my instrument, finding it  
gives the same meridian as  
before, and adjustments correct.

Oct. 15, 1902.

General Description of T. 21 N., R. 9 E.

The land in this township is rolling mountainous, and broken by canyons. Mountainous, in the northern and northwestern part, and generally rolling in the central and southern portions except where Walnut Canyon breaks through the limestone mesa. This canyon with its smaller tributaries enters the t.p. in sec. 31, and flows in a northeasterly course to Winona Station in the N.W. 1/4 of sec. 14, where it leaves the mesa and flows nearly due north out of the township. The mesa in the central and southwestern part of the t.p. is from 100 ft. to 300 feet high and consequently the canyon has an average depth of 300 ft. Several other canyons

## General Description of T. 21 N., R. 9 E.

enter the tp. from the south and flow northeast out of the tp.

In the northeastern part of the tp. is a cinder mountain about 600 ft. high, which may once have been a crater, but now no evidences of this character remain. There are several lava buttes in the northern part of the tp.

The soil is generally stony and worthless. There is a sparse growth of grass in the central & southern part of the tp.

In Walnut Canyon, and on the mesa in the southeastern part of the tp. and also in the western part of sec. 13, are evidences

## General Description of T. 21 N., R. 9 E.

of the ruins of ancient stone structures, relics of a race of people co-existent if not identical with the Cliff Dwellers. Numerous pieces of broken pottery can be found in nearly every part of the tp., on the cinder hills and mountains, as well as in the limestone regions. This fact would seem to prove that the bygone race flourished since the activities of the volcanoes and were probably finally destroyed by the sudden action of long dormant volcano.

The timber in the tp. is principally a very dense and scrubby cedar and piñon, with but little pine.

There are no springs or streams.

## General Description of T. 21 N., R. 9 E.

of running water in the tp., nor any lakes or pools of water.

There are no settlers or ranches in the tp.

The Santa Fe Pacific R.R. crosses the tp. near the middle in a westerly course. Unionia station is in the N.W.  $\frac{1}{4}$  of sec. 14, where the R.R. Company has bored a well several hundred feet deep but have found no flow of water - as yet. Several years ago the R.R. Company built a dam across Walnut canyon in the N.E.  $\frac{1}{4}$  of sec. 31, to construct a reservoir, but owing to the nature of the rock formation the water escapes through the limestone, rendering the undertaking a complete failure.

General Description of T. 21 N., R. 9 E.

A line of water pipe was laid from the dam to Angel station about eight miles east of Winona.

Cosmopolitan station is in the NE  $\frac{1}{4}$  of sec. 18.

The R.R. Co. has recently improved the roadbed by raising the track from ten to twenty inches with cinders brought a distance of nearly forty miles from Belmont.

FINAL OATH OF ASSISTANTS.

We hereby certify that we assisted Carl R. E. Marvin Caudle  
United States Deputy Surveyor, in surveying all those parts or portions  
of the Subdivisional lines of Twp.  
21 N. R. 5 S. 3d 9 E. east. th. 20 N. R.  
5 Ed 8 East, and th. 25 N. R. 3 E.

of the Gila and Salt River Base and Meridian, in the Territory of Arizona, as are represented in the foregoing field notes as having been surveyed by him and under his direction; and that said survey has been in all respects, to the best of our knowledge and belief, well and faithfully surveyed, and the corner monuments established according to the instructions furnished by the United States Surveyor-General for Arizona.

FINAL OATH OF UNITED STATES DEPUTY SURVEYOR.

126

I, Carl R. E. Marvin Caudle, United States Deputy Surveyor, do solemnly swear that in pursuance of a contract received from Stephen H. Price, United States Surveyor-General for Arizona, bearing date of the thirtieth day of June, 1902, I have well, faithfully, and truly, in my own proper person, and in strict conformity with the instructions furnished by the United States Surveyor-General for Arizona, the Manual of Surveying Instructions, and the laws of the United States, surveyed all those parts or portions of the Subdivisional lines of the 21 N. R. 5 8, E. & S.,  
the 20 N. R. 5 & 8 East, and  
the 25 N. R. 8 East.

of the Gila and Salt River Base and Meridian, in the Territory of Arizona, as are represented in the foregoing field notes as having been surveyed by me and under my direction ; and I do further solemnly swear that all the corners of said survey have been established and perpetu-
