Preliminary Oaths of Assistants.

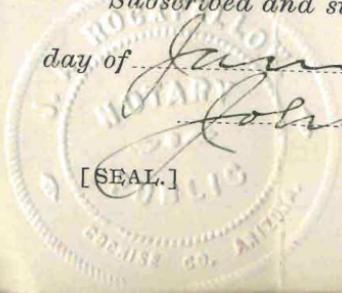

We, Earl Austin
 and G.W. Stevenson
 do solemnly swear that we will well and faithfully
 execute the duties of Chain Carriers; that we will
 level the chain upon even and uneven ground, and
 plumb the tally pins, either by sticking or dropping
 the same; that we will report the true distance to
 all notable objects, and the true lengths of all lines
 that we assist in measuring, to the best of our skill
 and ability, and in accordance with instructions
 given us, in the survey of the Subdi-
vision lines of
Tp 18 S. R 24 E

of the Gila and Salt River Base and Meridian in
 the Territory of Arizona.

Earl Austin Chainman.
G.W. Stevenson Chainman.

Dr 18 S. R. 24 E No. 950

Survey secs 21 and 28

Survey commenced Jan. 20, 1902 and executed with a Young & Sons Mountain Transit No. 685-5; with Smith Solar Attachment. The horizontal limb is provided with two double verniers placed opposite to each other, reading to single minutes of arc, which is also the least count of the verniers of latitude and declination arcs.

The instrument was examined & tested on the true meridian at Tucson, found correct, and approved by the Surveyor

Tr 18 S. R. 24 E

General for Arizona
May, 10, 1901.

I examine the adjustments of the transit on Jan. 18, 1902. And to test the solar apparatus, I set the instrument up on a meridian established by me near Black Diamond Mine on a previous occasion. Both A. M. and P. M. observations agree with the meridian mentioned.

Jan 20th

At the cor of secs 27, 28, 33 + 34
A limestone marked and
witnessed as described
by the Surveyor General,
