Dense undergrowth, 12.53 chs.

September, 24, 1901

General Description.

The land of this township is level and rolling. The soil of the San Pedro bottom is black and sandy loam, while that of the rest of the township is generally gravelly, sandy and third rate, and covered with rich and nutritious grasses. There is no timber except a few cottonwoods and willows scattered along the river bottom. The thin eastern trees are covered with misquits and

Subdivision of T. 24 S. R. 22 E. concluded.

twota, and growth. The San Pedro river runs through the northwest portion of the township. There are settlers in sections 8, 9, 17 and 18 who have made some substantial improvements.

Philip Cortzer

U. S. Deputy Surveyor.
