~~Survey made with Burt's Patent Improved Solar
Compass, nearly new, and in first rate order. Made
by Otto Jannel of Basse
Germany in 1881.~~

Before proceeding further with the exterior of this Tp.

I made a change of 27 minutes in the latitude arc
of my solar compass by subtracting same from
the reading previously given, and at noon verified and
corrected same by observation on the sun. I also fur-
ther tested instrument by reversing.

I took the latitude and found it to be $34^{\circ} 16' N$.

Before proceeding further with the exteriors of this Tp., I made a change of 5 minutes in the latitude arc of my solar compass by adding same to the reading previously given, and at noon verified and corrected same by observation on the sun. I also further tested instrument by reversing.

I took the latitude and found it to be $74^{\circ} 16' N$.
