Second Standard Parallel North through Range 6 W.

Survey commenced May 12th 1897
and executed with a Young and Sons,
light mountain transit No. 5609,
with a Smith's solar attachment.

The instrument was examined,
tested on the true meridian at
Tucson and found correct and
was approved by the Surveyor General
of Arizona, April 30th 1897
May 12th 1897: At 7^h 20^m A.M. U.S.T.
I set off 34° 4' on the lat. arc; 18° 18'
N. on the decl. arc, and determine
a true meridian with the solar
at the St. cor. to Tps. 9 N. R. 5 and
6 W. heretofore described.

I commence at the Standard
Cor. to Tps. 9 N. R. 5 and 6 W.
already described.

General Description.

This line runs through Range 6 West across level and gently rolling land well covered with an abundance of grass, and some mesquite, catclaw and cactus undergrowth. The land south of this line in Twp. 8 N. R. 6 W. is mostly fine level table land covered with an abundance of grass, and should be subdivided.
