WE, George W. Cassidy and A. A. Snyder
do solemnly swear that we will well and faithfully execute the duties of chainmen; that we will level the chain over even and uneven ground, and plumb the tally pins, either by sticking or dropping the same; that we will report the true distances to all notable objects, and the true lengths of all lines that we assist in measuring, to the best of our skill and ability, and in accordance with instructions given us, in the survey of
East, West and North boundaries of Pp. 1 N. Rg. 31 C.

George W. Cassidy, Chainman.

A. A. Snyder, Chainman.

Survey commenced August 1, 1904 and executed with a W. and L. C. Gurley solar compass. Compass not numbered. The horizontal limb is provided with two double verniers placed opposite to each other, reading to single minutes of arc, which is also the least count of the vernier of the latitude arc.

The vernier of the declination arc reads to thirty seconds of arc.

The instrument was examined, tested on the true meridian at Phoenix, found correct and was approved by the Surveyor General for Arizona.

I examine the adjustments of the compass and find them correct, then to test the solar apparatus by comparing its indications, resulting from solar observations made during a.m. and p.m. hours, with a meridian determined by observations on Polaris, I proceed as follows:

At the cor. of Tps. 1 N. Rgs. 31 and 32 E. on the Gila and Salt River Base Line; latitude $33^{\circ} 23' N.$; longitude $109^{\circ} - 04' - 22'' W.$; I set off $33^{\circ} 23' N.$ on the lat. arc; $17^{\circ} 58\frac{1}{2}' W.$ on the decl. arc; and at 3^h 00^m p.m. l.m.t., determine with the solar a meridian and mark a point thereof, on a stone set firmly in the ground 5 chs. N. of the cor.

At $10^{\text{h}} 46\frac{75}{100}\text{m}$ p.m. by my watch which has correct l.m.t. I observe Polaris at eastern elongation, in accordance with Manual of Instructions, and mark a point in the line thus determined, on

chains

a peg driven in the ground, 5 chs.
N. of my station.

August 1, 1904

August 2: At 7^h 00^m a.m. l. m. t. I
lay off the azimuth of Polaris $1^{\circ}26'$
to the west, and mark the meridian
thus determined, by cutting a
small groove in the stone set
August 1, on which the meridian
coincides with the mark deter-
mined by the solar.

At 8^h 00^m a.m. l. m. t. I set off,
 $33^{\circ}23' N.$ on the lat. arc; $17^{\circ}48' N.$
on the decl. arc; and mark a
point in the meridian determined
with the solar, by a cross on
the stone already set 5 chs. N. of
my station; this mark coincides
with the meridian established
by the Polaris observation.

The solar apparatus, by p. m.
and a.m. observations, defines
positions for meridians which
coincide with the meridian estab-
lished by the Polaris observations;
therefore I conclude that the
adjustments of the instrument
are satisfactory.

The magnetic bearing of the
true meridian, at 8^h 30^m a.m. is
 $N. 17^{\circ}05' W.$; the angle thus determined
gives the mag. decl. $17^{\circ}3'E.$

I commence at the cor. of Twp. 1
N. Rgs. 31 and 32 E., on the Gila and
Salt River Base Line, which is an
Iron post marked and witnessed
as described by the surveyor general.

Hence I run
North bet. secs. 31 and 36.
Over rolling mountains through

East boundary of Pp. 1 N. Rg 31 E.

1878

August 4: I examine the adjustments of the compass and find them correct, then to test the solar apparatus by comparing its indications resulting from solar observations made during a.m. and p.m. hours, with a meridian determined by observations on Polaris. I proceed as follows:

At the cor. of Pps. 1 N. Rgs. 30 and 31 E. on the Gila and Salt River base line; latitude $33^{\circ} 23' N.$; longitude $109^{\circ} 10' - 30' W.$; I set off $33^{\circ} 23' N.$ on the lat. arc; $17^{\circ} 11\frac{1}{2}' N.$ on the decl. arc; and at $3^{\text{h}} 00^{\text{m}}$ p.m. l.m.t. determine with the solar a meridian and mark a point thereof, on a stone set firmly in the ground 5 chs. N. of my station.

At $10^{\text{h}} 35'$ p.m. by my watch which has correct l.m.t. I observe Polaris at eastern elongation, in accordance with Manual of Instructions, and mark a point in the line thus determined, on a peg driven in the ground 5 chs. N. of my station.

August 4, 1904.

August 5: At $6^{\text{h}} 15^{\text{m}}$ a.m. l.m.t. I lay off the azimuth of Polaris $1^{\circ} 26'$ to the west, and mark the meridian thus determined, by cutting a small groove in the stone set August 4, on which the meridian coincides with the mark determined by the solar.

At $7^{\text{h}} 00^{\text{m}}$ a.m. l.m.t. I set off $33^{\circ} 23' N.$ on the lat. arc; $17^{\circ} 01\frac{1}{2}' N.$ on the decl. arc; and mark a point in the meridian determined with the solar, by a cross on the stone

chains

already set 5 chs. N. of my station; this mark coincides with the meridian established by the Polaris observation.

BOOK 1878

The solar apparatus, by p.m. and a.m. observations, defines positions for meridians which coincide with the meridian established by the Polaris observations; therefore I conclude that the adjustments of the instrument are satisfactory.

The magnetic bearing of the true meridian, at 7^h 15^m a.m. is N. $12^{\circ} 39'$ W.; the angle thus determined gives the mag. decl. $12^{\circ} 39'$ E.

The cor. of Pps. 1 N. Rgs. 30 and 31 E. is described by the surveyor general as a granite rock, 22x14x6 ins. witnessed by two bearing trees. I find the two bearing trees but am unable to find any trace of the stone. I therefore re-establish the cor. from the bearing trees as given in the notes as follows;

Set a granite stone 24x10x4 ins. in a mound of stone for cor. of Pps. 1 N. Rgs. 30 & 31 E. marked BL on N. face; with 6 notches on N., E. and W. edges; from which

A fine 8 ins. diam. bears N. $25^{\circ} 40'$ E.
53 lks. dist. marked BL TINR 31E S 31 BT

A fine 8 ins. diam. bears N. $37^{\circ} 30'$ W.
35 lks. dist. marked BL TINR 30E S 36 BT

These bearing trees are the trees as found on the ground and from which the cor. was re-established.

Thence I run
North bet. secs. 31 and 36.
Along rough N.E. slope of mountain descending through dense oak brush and very scattering cedar timber.

West boundary Pp. 1 N. Rg. 31 E.

August 11th,

North boundary concluded.

General Description.

The north, west and east boundaries of this Township traverse rough and rolling mountains cut by deep canons and ravines. The soil is worthless except where the lines traverses the Blue River. The tp. is well watered. The lines are covered with scattering and dense timber of oak, juniper, pinon and cedar. Scattering oak brush. The tp. as a whole is only suitable for grazing.

LIST OF NAMES.

BOOK 1878

A list of the names of the individuals employed by John P. Hesse

, United States Deputy Surveyor, to assist in running, measuring, and marking the lines and corners described in the foregoing field notes of the survey of the East West and North boundaries of Dp. 1 N. Rg. 31 E. showing the respective capacities in which they acted:

George W. Cassidy, Chainman.

A. A. Snyder, Chainman.

, Moundman.

, Moundman.

W. W. Oliver, Axman.

G. E. Wiswell, Axman.

W. H. Port, Flagman.

FINAL OATH OF ASSISTANTS.

We hereby certify that we assisted John P. Hesse

, United States Deputy Surveyor, in surveying all

those parts or portions of the East, West and North boundaries
of Dp. 1 N. Rg. 31 E.

of the Gila
and Salt River meridian, Perritory of Arizona, which are represented
in the foregoing field notes as having been surveyed by him and under his direction; and that said survey
has been in all respects, to the best of our knowledge and belief, well and faithfully surveyed, and the
corner monuments established, according to the instructions furnished by the United States Surveyor
General for Arizona

George W. Cassidy, Chainman.

A. A. Snyder, Chainman.

, Moundman.

, Moundman.

W. W. Oliver, Axman.

G. E. Wiswell, Axman.

W. H. Port, Flagman.

Subscribed and sworn to before me this 11th

BOOK 1878

FINAL OATH OF UNITED STATES DEPUTY SURVEYOR.

I, John F. Hesse, United States Deputy Surveyor, do solemnly swear that, in pursuance of a contract received from Frank S. Ingalls, United States Surveyor General for Arizona, bearing date of the 17th day of June 1904, I have well, faithfully, and truly, in my own proper person, and in strict conformity with the instructions furnished by the United States Surveyor General for Arizona, the Manual of Surveying Instructions, and the laws of the United States, surveyed all those parts or portions of the East, West and North boundaries of Tp. 1 N. Rg. 31 E.

of the Gila and Salt River meridian, in the Territory of Arizona, which are represented in the foregoing field notes as having been surveyed by me, and under my direction; and I do further solemnly swear that all the corners of said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the United States Surveyor General for Arizona and in the specific manner described in the field notes, and that the foregoing are the original field notes of such survey; and should any fraud be detected, I will suffer the penalty of perjury under the provisions of an Act of Congress approved August 8, 1846.

John F. Hesse
United States Deputy Surveyor.

Subscribed by said John F. Hesse, and sworn to before me }
this 2nd day of June, 1894 }

Frank S. Ingalls
U.S. Surveyor General

APPROVAL.

OFFICE OF THE UNITED STATES SURVEYOR GENERAL,

Phoenix, Ariz. April 2, 1905

The foregoing field notes of the survey of the East, West and North Bds. of T. 1 N., R. 31 E. of the Gila and Salt River Base and Meridian, in the Territory of Arizona

executed by John F. Hesse,
under his contract No. 121, dated June 17, 1904, 1894, having been critically examined, and the necessary corrections and explanations made, the said field notes, and the surveys they describe, are hereby approved.

Frank S. Ingalls
United States Surveyor General.

I certify that the foregoing transcript of the field notes of the above-described surveys in _____, has been correctly copied from the original notes on file in this office.

United States Surveyor General.
