WE, Harry S. Ingalls and Wilfred B. Helm
do solemnly swear that we will well and faithfully execute the duties of chainmen; that we will level the
chain upon even and uneven ground, and plumb the tally pins, either by sticking or dropping the same; that
we will report the true distances to all notable objects, and the true lengths of all lines that we assist in
measuring, to the best of our skill and ability, and in accordance with instructions given us, in the survey of
the subdivision lines of Bl. 5 N. Rg. 13 W.

Harry S. Ingalls, Chainman.
Wilfred B. Helm, Chainman.

Subscribed and sworn to before me this 5th
day of December, 1908 }
commission expires March 29, 1910

W. F. Research
Surveyor Public

WE, _____ and _____
do solemnly swear that we will well and truly perform the duties of moundmen in the establishment
of corners, according to the instructions given us, to the best of our skill and ability, in the survey of

U.S. Dep. Surveyor

(ID)

Subdivision of Township 5 North Range 13 West.

chains

Survey commenced December 29th, 1908, and executed with a Young and Sons light mountain transit, No 7532, with solar attachment. The horizontal limb is provided with two double verniers placed opposite to each other, reading to single minutes of arc, which is also the least count of the verniers of the latitude and declination arcs.

The instrument was examined, tested on the true meridian at Phoenix, found correct, and approved by the Surveyor General for Arizona.

I examine the adjustments of the transit and find them correct; and then, to test the solar apparatus, by comparing indications resulting from solar observations made during a.m. and p.m. hours, with a meridian determined by observations on Polaris, I proceed as follows:-

At the standard cor. of secs. 35 and 36, Tp. 5 N. R. 13 W., latitude $33^{\circ}43'27''$ N., longitude $113^{\circ}34'26''$ W., I set off $33^{\circ}43, 1/2'$ N. on the lat. arc, $23^{\circ}09' S.$ on the decl. arc; and at 4 p.m., l.m.t., determine a meridian with the solar and mark a point thereof, on a stone, firmly set in the ground, 5 chs. N. of the cor.

December 29th, 1908.

50

December 30th; At 12 h. ~~45~~' m., a.m., by my watch which has correct l.m.t., I observe Polaris at western elongation, in accordance with the Manual of Instruction and mark a point in the line thus determined, on a peg driven in the ground, 5 chs. N. of my station.

At 7 a.m., l.m.t., I lay off the azimuth of Polaris $1^{\circ}25'$ to the E., and mark a point in the meridian thus determined by cutting a small groove in the stone, set December 29th, on which this meridian coincides with one determined by the solar.

At 8 a.m., l.m.t., I set off $33^{\circ}43, 1/2'$ N. on the lat. arc, $23^{\circ}06' S.$ on the decl. arc; and mark a point in the meridian thus determined with the solar, by a cross on the stone, already set 5 chs. N. of my station; this mark coincides with the meridian established by the Polaris observations.

The solar apparatus, by a.m. and p.m., observations define positions for meridians identical with the meridian established by Polaris observations; Therefore I conclude that the adjustments of the instruments are satisfactory.

The magnetic bearing of the true meridian at 8 a.m. is $N 414^{\circ}53' W.$, the angle thus determined gives the mag. decl. as $14^{\circ}53'E.$

I begin at the standard cor. of secs. 35 and 36, Tp. 5 N., R. 13 W., established by me December 17th, 1908.

Thence I run

$NO^{\circ}01' W.$ bet. secs. 35 and 36.

Over gently rolling land through dense brush. wash, 40 lks. wide, course NE. Set a porphyry stone, 21x8x6ins., 16ins. in the ground, for $\frac{1}{2}$ sec. cor. marked $\frac{1}{4}$ on W. face; and raise a mound of stone, 2ft. bse, 1, 1/2 ft. high, W. of cor. Pits impracticable.

wash, 30 lks. wide, course E.

wash, 10 lks. wide, course ENE.

Set a porphyry stone, 18x8x8ins., 12ins. in the ground, for cor. of secs. 25, 26, 35 and 36, marked with 1 notch on S. and E. edges; and raise a mound of stone, 2ft base, 1, 1/2 ft. high, W. of cor. Pits impracticable.

GENERAL DESCRIPTION.

This Township is mostly level, being hilly in the eastern portion and along the South boundary, the growth of timber is very slight but the entire Tp., is covered with dense underbrush.

The town of Salome is located in Sec 16.
Jose Sanches has a house in the SE. $\frac{1}{4}$ of the SW. $\frac{1}{4}$ of section 1.

John D. Hesse
U.S. Deputy Surveyor.

BOOK 2125 FINAL OATH OF UNITED STATES DEPUTY SURVEYOR.

I, John P. Hesse, United States Deputy Surveyor, do solemnly swear that, in pursuance of a contract received from Frank S. Ingalls, United States Surveyor General for Arizona, bearing date of the 10th day of October, 1908, I have well, faithfully, and truly, in my own proper person, and in strict conformity with the instructions furnished by the United States Surveyor General for Arizona, the Manual of Surveying Instructions, and the laws of the United States, surveyed all those parts or portions of the subdivision lines of Ph. 5 N. Rg. 13 E.

of the Gila and
Salt River meridian, in the Territory of Arizona, which are represented in the foregoing field notes as having been surveyed by me, and under my direction; and I do further solemnly swear that all the corners of said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the United States Surveyor General for Arizona and in the specific manner described in the field notes, and that the foregoing are the original field notes of such survey.

John P. Hesse
United States Deputy Surveyor.

Subscribed by said John P. Hesse, and sworn to before me }
this first day of March, 1909, 190 }

Frank S. Ingalls

U. S. SURVEYOR GENERAL

APPROVAL.

OFFICE OF THE UNITED STATES SURVEYOR GENERAL,

Phoenix, Ariz. Aug. 25, 1909

The foregoing field notes of the survey of the subdivision lines of
Ph. 5 N. Rg. 13 E. Gila and Salt River
Base and Meridian, Arizona

executed by John P. Hesse U.S. Deputy Surveyor
under his contract No. 117, dated Oct. 10, 1908, having been
critically examined, and the necessary corrections and explanations made, the said field notes, and the surveys they describe, are hereby approved.

Frank S. Ingalls
United States Surveyor General.

I certify that the foregoing transcript of the field notes of the above-described surveys in _____, has been correctly copied from the original notes on file in this office.

United States Surveyor General.
