PRELIMINARY OATHS OF ASSISTANTS.

BOOK 2223

WE, Theodore Alden and C. J. Schwartz do solemnly swear that we will well and faithfully execute the duties of chainmen; that we will level the chain upon even and uneven ground, and plumb the tally pins, either by sticking or dropping the same; that we will report the true distances to all notable objects, and the true lengths of all lines that we assist in measuring, to the best of our skill and ability, and in accordance with instructions given us, in the survey of South & west lds. & subs. of T. & N. R. 9 W.

Theodore Alden, Chainman. C. J. Schwartz, Chainman.

Subscribed and sworn to before me this 18th day of November, 1910

W. O. Jacob, Transitman

WE, J. H. McCall and Geo. J. Schwadron do solemnly swear that we will well and truly perform the duties of moundmen in the establishment of corners, according to the instructions given us, to the best of our skill and ability, in the survey of S. & W. lds. & subs. T. & N. R. 9 W.

J. H. McCall, Moundman. Geo. J. Schwadron, Moundman.

Subscribed and sworn to before me this 18th day of November, 1910

W. O. Jacob, Transitman

WE, Paul Dial and Carl Barandon John Aubrey do solemnly swear that we will well and truly perform the duties of axmen in the establishment of corners and other duties, according to instructions given us, to the best of our skill and ability, in the survey of S. & W. lds. & subs. T. & N. R. 9 W.

Paul Dial, Axman. Carl Barandon John Aubrey, Axman.

Subscribed and sworn to before me this 18th day of November, 1910

W. O. Jacob, Transitman

I, George Ely, do solemnly swear that I will well and truly perform the duties of flagman according to instructions given me, to the best of my skill and ability, in the survey of S. & W. lds. & subs. T. & N. R. 9 W.

George Ely, Flagman.

South boundary of Tps. 24 N., R. 9 West.

Survey commenced Nov^r 18, 1910, ^{and} executed with a Buff^{er} & Berger engineer's transit N^o 672, with a Sargmüller Solar Attachment, approved by the U.S. Surveyor-General ^{and} Asst. Supervising Surveyor; the horizontal limb having two double verniers placed opposite to each other ^{and} reading to 30" of arc.

I begin at the cor. of Tps. 23 ^{and} 24 N. R. 8 ^{and} 9 W. which I recently established. Latitude $35^{\circ} 25' N.$, longitude $113^{\circ} 11' 01'' W.$

At this cor., at 3^h 39^m a.m. l.m.t. I observe Polaris at western elongation in accordance with instructions in the Manual, ^{and} mark a point in the line thus determined on a rock about 5.00 Chs. N. of my station.

At 7^h 30^m a.m. I lay off the azimuth of Polaris, $1^{\circ} 26'$ to the east ^{and} mark the meridian thus determined by a point on a stake driven in the ground, east of the point established this morning.

The magnetic bearing of the meridian is $N. 15^{\circ} 17' W.$, which gives the magnetic decl. $15^{\circ} 17' E.$

At 8^h 00^m a.m. l.m.t. I set off $19^{\circ} 04' S.$ on the decl. arc; $35^{\circ} 25' N.$ on the lat. arc; ^{and} determine a meridian with the solar which is identical with the meridian obtained from my observation on Polaris; I therefore conclude the adjustments of my instrument are satisfactory ^{and} I proceed to run

West on S. Bdy. of sec. 36.

Over rolling hills, through scattering cedars.

General Description.

The south ^{and} west boundaries of this township are generally hilly ^{and} rough, though not sufficiently rough to be called mountainous.

In the hilly portions lime ledges ^{and} bed-rock frequently crop ^{and}, in some localities are exposed over a considerable area.

There are several narrow draws or graded valleys that are without timber or brush, but in which grama grass grows abundantly.

The timber in this township is principally cedar with some piñon, ^{and} is only fit for fence posts ^{and} fire-wood.

There are no settlers along the south or west boundaries, neither is there any water.
