Survey commenced May 28, 1913, and executed with a Young and Sons Transit, No. 8541, with Solar attachment. The instrument was examined, tested on the true meridian at Phoenix, found correct and was approved by the surveyor general for Arizona, November 27, 1912.

At our camp in sec. 13, T. 22 N., R. 20 W., in latitude $35^{\circ}18'$ N., longitude $114^{\circ}21'W.$ At 8h. 30m. p.m. by my watch, which was correct local mean time, I observe Polaris May 28, 1913, in accordance with instructions in the Manual, and mark the line thus determined, by a pin set in the ground about five chains north of my station.

May 29, 1913, at 6h. 30m. a.m. I lay off the azimuth of Polaris, $0^{\circ}13'$ to the east, and mark the true meridian thus determined, by a pencil mark on a stake firmly set in the ground east of the point established last night, the magnetic bearing of said true meridian is $N.15^{\circ}55'W.$, which gives the magnetic declination, $15^{\circ}55'East.$

At 4h. 30m. l.m.t., I set off $35^{\circ}18'$ on the lat. arc; $21^{\circ}39\frac{1}{2}'N.$ on the decl. arc; the resulting observation agrees with the Polaris observation.

May 30, 1913. At 7h. 30m. l.m.t., I set off $35^{\circ}18'$ on the lat. arc; $21^{\circ}45\frac{1}{2}'N.$ on the decl. arc; this resulting observation also agrees with the Polaris observation; therefore, I conclude that the adjustments of the instrument are correct.

May 30, 1913

May 29, 1913
Preliminary to commencing the subdivision of this town-ship, I run north on a random line, on the East boundary of sec. 36; at 40.00 chs. I find no trace of ^{old} sec. cor. and at 80.00 chs. I find no trace of the ^{original} cor. of secs. 25, 30, 31 and 36. therefore I resurvey the range line, as follows:

May 31, 1913, at the ^{old} cor. of Twps. 21 and 22 N., R's. 19 and 20 W., which is a sandstone 10x8x10 ins. ^{above ground} firmly set, and marked and witnessed as described by the surveyor general. at 8h. a.m., l.m.t. I set off $35^{\circ}15'$ on the lat. arc; $21^{\circ}54'N.$ on the decl. arc; and determine a true meridian with the solar.

Thence I run, on a true line, North, bet. secs. 31 and 36.
