General Description.

This township consists of rolling and gently rolling land, covered with a scattering growth of sagebrush and squawbrush, and cedar, juniper and pinion timber. The soil is a loose, yellow clay and loam, varying from 10 to 26 ins. in depth, over limestone and sandstone subsoil.

The Grand Canyon Branch of the A. T. and S. F. Ry. runs through the south west cor. of sec. 31.

There are no settlers. Several dirt dams have been built in this township for impounding flood waters.
