GENERAL DESCRIPTION.T.21 N., R.10 E.

This township situated in the north central portion of the state of Arizona, on the watershed of the Little Colorado river, has a gently rolling or level surface, except an extinct volcanic crater in secs.9 and 10, and several scattered buttes and low ridges. The soil is mainly a thin dark loam, coarse texture, on limestone subsoil. Some portions have a red sandy loam, medium texture, other portions a clay loam, covered with volcanic ash, and the other portions a coarse gravel.

GENERAL DESCRIPTION, continued.

There is no soil of 1st rate, the entire township ranging from 2nd to 4th rate. The only cultivated land is a small field in sec.16, known as Piper's ranch.

About a quarter of the total area of the township has a good growth of grass, suitable for grazing. Nearly the entire surface is covered with a dense growth of cedar and pinon timber.

Coconino National Forest embraces all of the Tp., except secs. 1,2,3,11,12 and 36. About one-fourth of the area has a scattering undergrowth of rabbit and buck brush, and the remainder is almost clear of under-growth.

There is no evidence of mineral deposits of value in the township. The drainage is northeasterly into the Little Colorado river, about 15 miles distant. No permanent running water exists. The main drainage water-courses are Young's creek and Canyon Padre creek, the former draining easterly through the center of the Tp., and the latter draining Northeasterly thru.sec.36. A dam is thrown across Young's Creek in sec.22, from which flood waters are conveyed to a reservoir in sec. 36 of T.22 N., R.10 E. by means of a ditch thrusecs. 15,14,11 and 12. A pond in SW. $\frac{1}{4}$ of sec.29 also stores flood water from a wash.

There are two settlers: E.M.Piper in secs.16 and 17, with house and fenced tract, part of which is cultivated; and E.M.Coldcord in sec.29 with house, fenced tract, and pond or reservoir. Ruins of Indian houses are visible in several sections.

The Atchison,Topeka & Santa Fe Railway, with double track, & paralleled by telegraph and telephone lines, and right-of-way fences extends easterly and westerly, thru. the center of the township. A station on same in NW. $\frac{1}{4}$ of sec. 23, known as Angell Station, consists of water tank and pump house and "Y" track.

The "National Old Trails Highway" passes thru. the Tp., entering at the center of the W. boundary, and leaving at the SE.cor. This road crosses a concrete bridge over Padre Canyon in sec.36. Several other good roads connect with this highway, and traversed the town-ship in all directions.
