RETRACEMENT AND RESURVEY OF

WEST AND NORTH BOUNDARIES OF

TOWNSHIP 5 NORTH, RANGE 4 EAST,

AND RETRACEMENT OF

FIRST GUIDE MERIDIAN EAST, THRU. TOWNSHIP 5 NORTH,

3318
Of the Gila and Salt River Base and Meridian,

In the State of Arizona.

EXECUTED BY

Sidney E. Blout.

*In the capacity of U. S. Cad. Eng'g under Special Instructions dated February 26, 1919,
issued by the United States Surveyor General to govern surveys included in Group
No. 91, which were approved by the Commissioner of the General Land
Office, March 18, 1919, and Assignment Instructions dated March 21, 1919*

Survey commenced August 4, 1919.

Survey completed August 30, 1919.

1st Standard Parallel North

6-4817

First Guide Meridian East

Executed on dates shown above by Sidney E. Blout, U.S.
Cadastral Engineer.

Survey executed on dates shown on diagram on page 1 hereof, by Sidney E. Blout, U.S.Cadastral Engineer, using a Buff transit No. 9984, and an A. Lietz transit No. 6165, both instruments being provided with the improved Smith solar attachment. The horizontal limb of each instrument is provided with two double verniers, placed opposite to each other, reading to single minutes of arc, which is also the least count of the verniers of the latitude and declination arcs. The instruments were examined, tested on the true meridian at Phoenix, Arizona, found correct, and approved by the Assistant Supervisor of Surveys for Arizona and California, March 1, 1919, conditional upon satisfactory field tests.

TEST OF BUFF TRANSIT.

Examine the adjustments of the transit, and correct the level and collimation errors; then, to test the solar apparatus, by comparing the results of observations on the sun made during a.m. and p.m. hours with a meridian established by observations on Polaris, proceed as follows:

Set instrument over south stake on the meridian established at camp near E.O. Brown's ranch in sec. 16, T.5 N., R.5 E., July 7, 1919, described in Book "E," and at 4h. 05m. p.m. apparent time, Aug. 7, 1919, set off $33^{\circ}46'30''$ N. on the lat.arc; $16^{\circ}32'$ N. on the decl.arc, and determine a meridian with the solar, and mark a point thereof by a tally pin in the stake already set 5 chs. north of instrument. This point falls 0.6 ins.W. of the meridian established by the Polaris observations.

At 7h. 05m. a.m., apparent time, August 8, 1919, set off $33^{\circ}40\frac{1}{2}'$ N. on the lat.arc; $16^{\circ}22'$ N. on the decl.arc, and determine a meridian with the solar, and mark a point thereof by a nail driven in the stake already set 5 chs.N. of instrument. This point falls 0.2 ins.E. of the meridian established by the Polaris observations.

The solar apparatus by p.m. and a.m. observations, defines positions for meridians, respectively, about $0'31''$ W. and $0'10''$ E. of the meridian established by the Polaris observations; therefore, conclude that the adjustments of the instrument are satisfactory.

TEST OF LIETZ TRANSIT.

August 22, 1919, examine the adjustments of the transit, and correct the level and collimation errors; then, to test the solar apparatus by comparing its indications resulting from solar observations, made during a.m. and p.m. hours with a meridian established by observations on Polaris, I proceed as follows:

At camp, 20.00 chs.N. of the $\frac{1}{4}$ sec.cor. bet. secs. 5 and 32, on the S.bdy. of T.6 N., R.4 E., latitude, $33^{\circ}48'50''$ N.; longitude, $111^{\circ}58'24''$ W., set off $33^{\circ}49'$ N. on the lat.arc; $11^{\circ}54\frac{1}{2}'$ N. on the decl.arc, and at 5h.3m.p.m., apparent time, Aug. 22, determine a meridian with the solar, and mark a point thereof by a nail driven in a stake set in the ground 5 chs.N. of instrument.

At 9h.33.8m.p.m., l.m.t., by my watch, which is correct local mean time, observe Polaris at eastern elongation, and mark the direction thus determined by a tally pin in stake set in the ground about 5 chs. N. of instrument.

August 23, 1919. At 6h.30m., a.m., lay off the azimuth of Polaris $1^{\circ}21'25''$ to the west, and mark the meridian thus determined by a nail driven in the stake set last evening on which the meridian falls 0.7 ins.W. of the mark established by the solar observation.

At 7h.03m. a.m., Aug. 23, set off $33^{\circ}39'$ N. on the lat.arc;

11°42 $\frac{1}{2}$ 'N. on the decl.arc, and determine a meridian with the solar, and mark a point thereof by a tack driven in the stake already set 5 chs.N.of instrument. This point falls 0.4 ins.W. of the meridian established by the Polaris observations.

The solar apparatus by p.m. and a.m. observations, defines positions for meridians, respectively, about 0'36"E. and 0'21"W. of the meridian established by the Polaris observation; therefore, conclude that the adjustments of the instrument are satisfactory.

All measurements are made with a Lallie 5 chain steel tape, compared with a Chesterman Standard Steel tape, and found correct. All measurements are made on the slope the vertical angle determined, and the slope measurements properly reduced to true horizontal distances.

Retracement of First Guide Meridian East, thru. Township 5 North. 5

Chains.	
39.98	From the standard cor. of Ts. 5 N., Rs. 4 and 5 E., described in Book "D," North, on a random line, bet. secs. 31 and 36. Over rolling land, thru. scattering timber and undergrowth. Fall 9 lks.E. of the $\frac{1}{4}$ sec.cor., which is an ironwood post 3 ins. sq., 14 ins. above ground, firmly set, marked and witnessed as described by the surveyor general. True course and dist. of south half bet. secs. 31 and 36 is therefore N.0°08'W., 39.98 chs.
40.00	From $\frac{1}{4}$ sec.cor., North, on random line. Fall 12 lks.E. of the cor. of secs. 25, 30, 31 and 36, which is a granite stone, 6x8x10 ins. above ground, firmly set, marked and witnessed as described by the surveyor general. True course and dist. of north half mile bet. secs. 31 and 36 is N.0°10'W., 40.00 chs. Land, rolling, sandy valley land. Soil, sandy and gravelly, 2nd and 3rd rate. Timber, palo verde, mesquite and ironwood. Undergrowth, greasewood brush.
15.00	North, on a random line, bet. secs. 25 and 30. Over rolling land, thru. scattering timber and undergrowth. Wash, 10 lks.wide, course SW.
40.00	Fall 3 lks.E. of the $\frac{1}{4}$ sec.cor., which is a palo verde post, 3 ins. in diam., 8 ins. above ground, firmly set, marked and witnessed, as described by the surveyor general. True course and dist. of south half mile, bet. secs. 25 and 30 is N.0°02'W., 40.00 chs.
20.67	Thence from $\frac{1}{4}$ sec.cor., North, on a random line. Wash, 20 lks.wide, course SW.
37.07	Wash, 20 lks.wide, course SW.
40.07	Intersect the cor. of secs. 19, 24, 25 and 30; which is a granite stone, 10x10x8 ins. above ground, firmly set, marked and witnessed as described by the surveyor general. True course and dist. of north half mile, bet. secs. 25 and 30 is North 40.07 chs.
	Land, rolling, sandy valley. Soil, sandy and gravelly, 2nd and 3rd rate. Timber, palo verde, mesquite and ironwood. Undergrowth, greasewood brush.
11.60	North, on a random line, bet. secs. 19 and 24. Over rolling land, thru. scattering timber and undergrowth. Road, NE. and SW., Phoenix to Camp Creek.
27.80	Wash, 20 lks.wide, course SW.
40.05	Intersect the $\frac{1}{4}$ sec.cor., which is a porphyry stone, 12x10x8 ins. above ground, firmly set, marked and witnessed, as described by the surveyor general. True course and dist. of south half of mile bet. secs. 19 and 24 is North, 40.05 chs.
15.90	Thence from $\frac{1}{4}$ sec.cor., North, on a random line. Wash, 10 lks.wide, course SW.
39.93	Intersect the cor. of secs. 15, 18, 19 and 24, which is a porphyry stone, 12x10x8 ins. above ground, firmly set, marked and witnessed as described by the surveyor general. True course and dist. of north half mile bet. secs. 19 and 24 is North, 39.93 chs.
	Land, rolling sandy valley.

GENERAL DESCRIPTION.

This township contains every variety of land, from level valley to rough mountains, and the soil ranges from sandy loam to loose decomposed rock. The soil of the level and rolling portion of the township, which comprises the major portion of the land in the township, is a sandy or gravelly clay loam, capable of producing good crops with the aid of irrigation. The soil of the mountainous portion of the township is, for the most part, decomposed granite and malpais stone, wholly unfit for agricultural purposes.

The township is poorly watered, no supply of a permanent nature being found in the township.

The entire township is covered with a medium growth of palo verde, mesquite and ironwood timber, suitable for fuel purposes.

Mineral, principally copper ore, is found in the "Mormon Girl" mine in sec. 4.

The entire township is covered with a variety of grasses, which furnish good range for stock.

There is one settler in sec. 7.

4-680

FIELD ASSISTANTS. to

Sidney E. Blout, U.S.Cadastral Engineer.

CERTIFICATE OF UNITED STATES CADASTRAL
ENGINEER.

I, Sidney E. Blout, U.S. Cad. Engineer., hereby certify upon honor that, in pursuance of special instructions received from the U. S. Surveyor General for Group 91, Arizona, bearing date of the 26th day of February, 1919, I have well, faithfully, and truly in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instructions, and the laws of the United States, surveyed all those parts or portions of the SUBDIVISIONS, and retraced and resurveyed all those parts or portions of the WEST AND NORTH BOUNDARIES of TOWNSHIP 5 NORTH, RANGE 4 EAST and retraced all those parts or portions of the FIRST GUIDE MERIDIAN EAST, THRU. TOWNSHIP 5 NORTH, of the Gila and Salt River Base and Meridian, in the State of Arizona, which are represented in the foregoing field notes as having been executed by me, and under my direction, and that all the corners of said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the U. S. Surveyor General for Group 91, Arizona, and in the specific manner described in the field notes, and that the foregoing are the original field notes of such survey.

Sidney E. Blout
U. S. Cadastral Engineer.

APPROVAL.

OFFICE OF THE UNITED STATES SURVEYOR GENERAL,

Phoenix, Arizona, September 4, 1920.

The foregoing field notes of the survey of the SUBDIVISION, and Retracement and Resurvey of the WEST AND NORTH BOUNDARIES of TOWNSHIP 5 NORTH, RANGE 4 EAST, and Retracement of FIRST GUIDE MERIDIAN EAST, THRU. TOWNSHIP 5 NORTH, of the Gila and Salt River Base and Meridian, in the State of Arizona, executed by Sidney E. Blout, U.S. Cadastral Engineer, under his special instructions dated Feby. 26, 1919, for Group 91, Arizona, having been critically examined, and the necessary corrections and explanations made, the said field notes, and the surveys they describe, are hereby approved.

Frank D. Pratt

U. S. Surveyor General.

DMBP

I certify that the foregoing transcript of the field notes of the above-described surveys in

, has been correctly copied from the original notes on file in this office.
