FIELD NOTES

OF THE RESURVEY OF

Part of the Subdivision lines of

Township 11 South, Range 12 East and

Second Standard Parallel South thru Range 12 East

and of the SURVEY of

East boundary of

Township 10 South, Range 11 East and

North Boundary and

Subdivision lines of

Township 10 South, Range 12 East

Of the Gila and Salt River base and Meridian,

In the State of Arizona

EXECUTED BY

William N. Thorn, U.S.Cadastral Engineer

and

Horace M. Muscott, U.S.Transitman

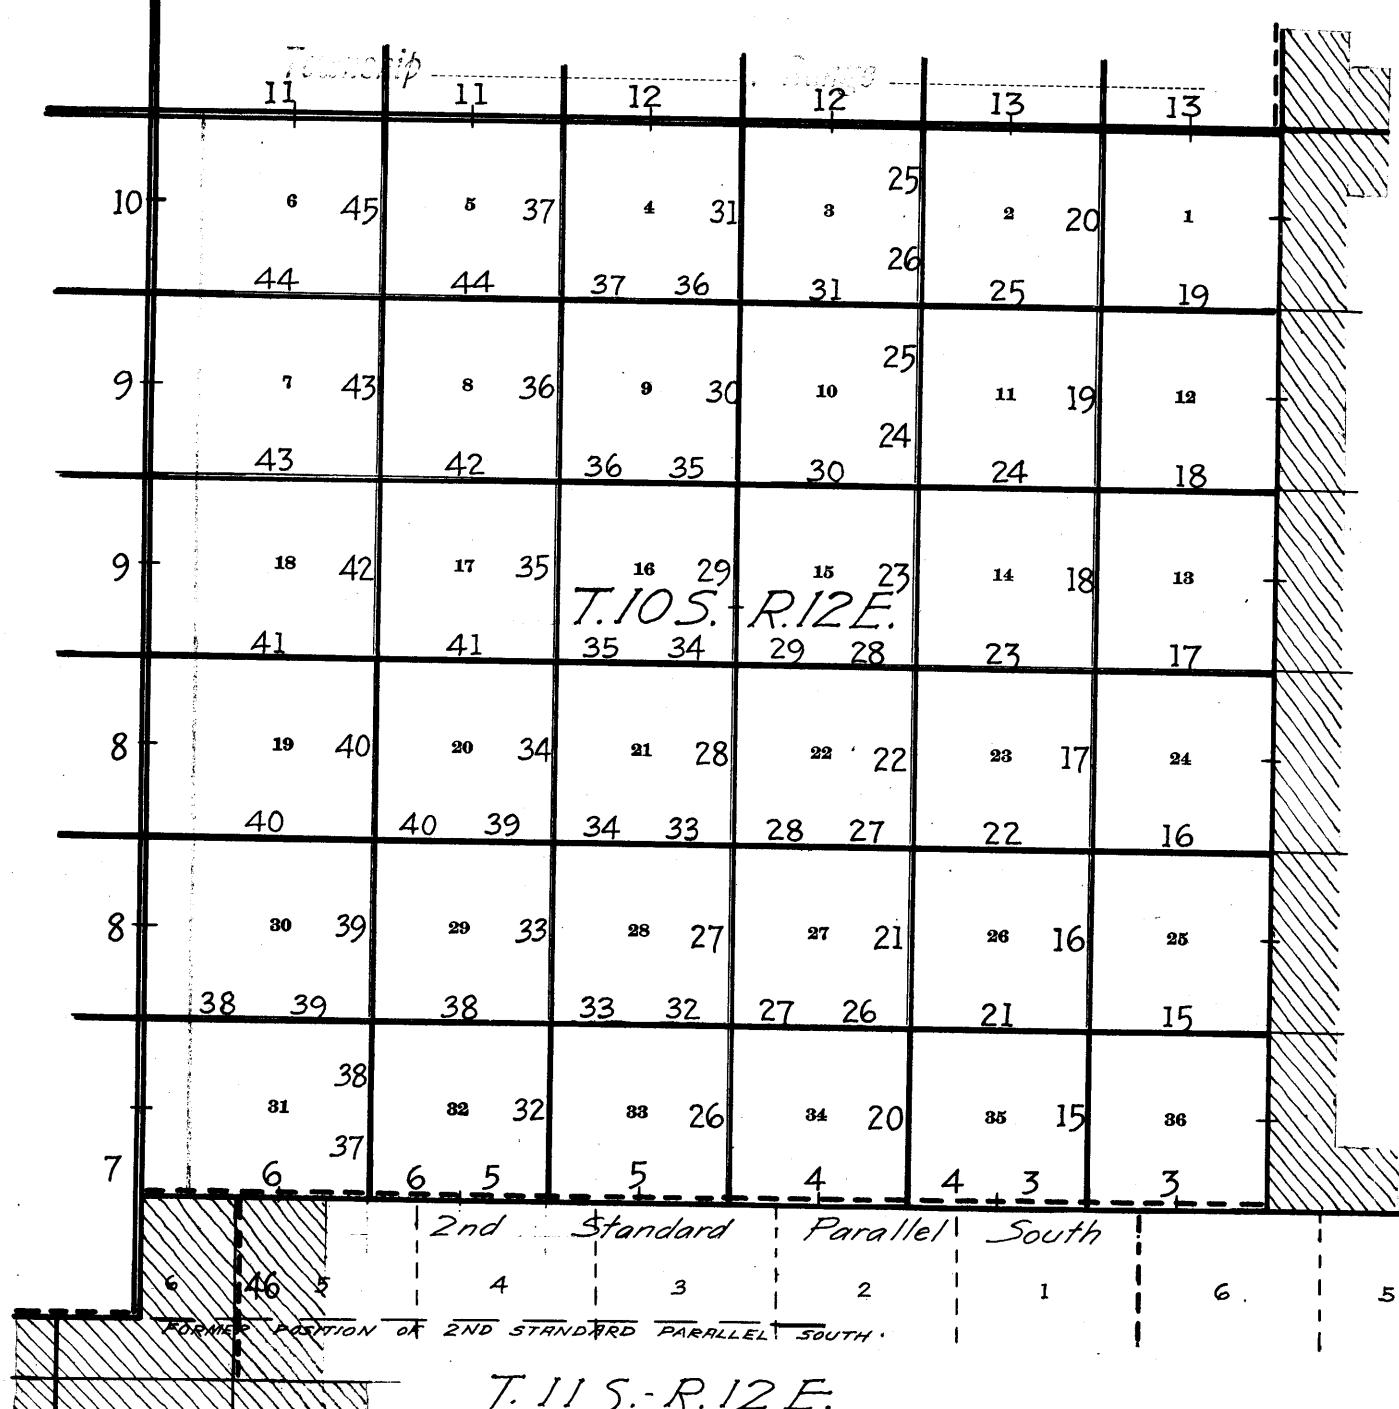

In the capacity of U.S. Surveyors
~~In the capacity of U.S. Surveyor~~, under Special Instructions dated February 6, 1918,
issued by the United States Surveyor General to govern surveys included in Group
No. 01, which were approved by the Commissioner of the General Land
Office, February 27, 1918, and Assignment Instructions dated December 18, 1918

Resurvey
and Survey commenced January 27, 1919.

Resurvey
and Survey completed February 21, 1919.

6 2-3-19 RESURVEY	5	2nd Standard Parallel South RESURVEYED					

Black lines on above diagram indicate surveys executed by
William H. Thorn, U.S. Cadastral Engineer on dates shown thereon.

Red lines on above diagram indicate surveys executed by
Horace M. Muscott, U.S. Transitman, on dates shown thereon.

Chains.

Resurvey and survey hereinafter described executed by William H. Thorn, J. S. Cadastral Engineer and Horace M. Muscott, U. S. Transitman, on dates shown on diagram on page 1 hereof, using respectively, Young and Sons' Light mountain transits Nos. 8592 and 8248. The instruments are equipped with full vertical circles and Smith Solar attachments; the horizontal limbs having two double verniers placed opposite to each other, and reading to 1' of arc, which is also the least count of the verniers of the latitude and declination arcs; all azimuth determinations, unless otherwise specified are accomplished with the solar attachment.

The instruments were examined, tested on the true meridian at Phoenix, found correct, and were approved by the Assistant Supervisor of Surveys for Arizona, conditional upon satisfactory field tests.

TEST OF INSTRUMENTS.

Examine the adjustments of the transits, and correct all errors; then, to test the solar apparatus, by comparing its indications resulting from solar observations made during a.m. and p.m. hours, with a meridian determined by observations on Polaris, proceed as follows:

Jan. 24, 1919: At camp in sec. 34, T. 10 S., R. 12 E.; latitude $32^{\circ}30\frac{1}{2}'$ N.; longitude, $111^{\circ}05'$ W., observe Polaris at 11h.18m. apparent time, a.m., at its eastern elongation, at which time the star is plainly visible. The observation is executed in accordance with the Manual of Instructions, and mark a point in the line thus determined, on a peg driven in the ground, 5 chs. N. of station. Then lay off the azimuth of Polaris $1^{\circ}19'40''$ W., and mark the meridian thus determined by a tack point in a stake driven firmly in the ground.

At apparent noon, set off $32^{\circ}30'23''$ on the lat. arcs, and observe the sun on the meridian; the resulting readings of the decl. arcs are $19^{\circ}17\frac{1}{2}'$ S., which agrees with the computed decl. of the sun for noon.

At 3h.0m. p.m., apparent time, with the latitude arcs unchanged, set off $19^{\circ}15'14''$ S. on the decl. arcs, and determine meridians with the solars, which find to agree with the true meridian.

Jan. 25, 1919: At 9h. 0m. a.m., apparent time, with the lat. arcs unchanged, set off $19^{\circ}4'20''$ S., on the decl. arcs, and determine meridians with the solars, which agree with the true meridian.

As all of the solar observations during the usual hours of solar work come within 1'30" of the true meridian, conclude that the adjustments of the instruments are satisfactory.

Unless otherwise specified, all measurements are made with a Lufkin steel tape, 5 chains in length, compared with a Chesterman standard steel tape, and found correct. The measurements are made on the slope, the vertical angle determined, and the slope measurements properly reduced to true horizontal distances.

Resurvey of 2nd Standard Parallel South, thru Range 12 East, 3.

Chains.

Independent Resurvey superceding the survey executed by J.B. McLaughlin, U.S. Deputy Surveyor in 1884; As subdivisional closings on the Standard Parallel made during the progress of this survey will furnish satisfactory verification of the length of the lines, employ single set of chainmen.

From std.cor. of T.10 S., Rs.12 and 13 E., which is an iron post, 3 ins. in diam., set 18 ins. in the ground, and in a mound of stone 3 ft. base, 1 ft. high, witnessed by a mound of stone 4 ft. base, 2 ft. high to the N. of post,

West, on true line, on the south bdy. of sec.36.

 80.14 The cor.of secs.5,6, 7 and 8.
 Land, gently rolling.
 Soil, sandy, decomposed granite, 3rd rate.
 Timber, scattering small mesquite, palo verde and ironwood.
 Undergrowth, dense greasewood, catclaw, sage brush, oco-
 tilla, sahuaro and cholla cactus.

The continued satisfactory adjustment of the solar appa-
 ratus during the survey of this township is indicated
 from field tests, as described in Books "C" and "D".

GENERAL DESCRIPTION.

The southeast half of this township is mountainous, being part of the Tortillita Mountains, the tops of the spurs and ridges ranging from 300 to 900 ft. high. The approximate elevation is 2500 ft. above sea level. There is but very little soil, the ground being a rocky granite formation, 4th rate, and of no value for agricultural purposes.

The northwest half of this township is a gently rolling country, with a shallow sandy soil, and a rocky granite formation, in places covered with poor grass. The approximate elevation of this part is 2000 ft.above sea level.

The entire township is covered with small undergrowth, some of which might be classed as small timber, are mesquite, palo verde, ironwood, and willow in the low lands; the undergrowth is ocotilla, sage brush, grease wood and catclaw. The cactus is cholla and sahuaro.

There is a road running NE. and SW. across the township, along the foot of the mountains; and also, one entering the township in section 18, and running to the U. S. Mineral Monument No.2, which is in sec.10.

The entire township drains to the W. and SW.

A big wash enters the township in sec.12, and leaves in sec.31. There is no permanent flow of water in the township.

There is one settler in sec.20, who has a well of good water. Name not obtained.

The southwestern end of the "Owl Head Buttes" is in the northeast corner of sec.5.

There are indications of mineral in sec.9, where there is evidence of extensive workings.

The original cor. of secs. 5, 6, 7 and 8, is a granite stone, 8x6x5 ins. above ground, firmly set, marked with 5 notches on S. edge, and 5 notches on E. edge, and witness-ed with 4 bearing trees, properly marked, one each NE., SE., SW. and NW. of cor.

Set an iron post, 3 ft. long, 2 ins. in diam., alongside of old stone, 20 ins. in the ground, on bed rock, and raise a mound of stone, 2 ft. base, 1 ft. high around same, for reestablished cor. of secs. 5, 6, 7 and 8, with brass cap, marked

T11S	R12E
S 6	S 5
<hr/>	
S 7	S 8
1919	

Thence,
N. 0° 3' W., on true line, bet. secs. 5 and 6.
Over rolling land, thru. dense undergrowth and scattering timber.

- 18.70 Wash, 50 lks. wide, 8 ft. deep, course S. 40° W.
 26.16 Intersect original closing cor. of secs. 5 and 6, at a point 16 lks. E. from original std. $\frac{1}{4}$ sec. cor. of sec. 31, T. 10 S., R. 12 E. Destroy both corners.
 40.00 Set an iron post, 3 ft. long, 1 in. in diam., 26 ins. in the ground; for $\frac{1}{4}$ sec. cor. of secs. 5 and 6, with brass cap, marked

$\frac{1}{4}$	
S 6	S 5
<hr/>	
1919	

from which,

An ironwood, 8 ins. in diam., brs. N. 1° 30' E., 102 lks. dist., marked " $\frac{1}{4}$ S 5 BT." No other trees available; dig pits, 18x18x12 ins. N. and S. of post 3 ft. dist.

- 45.80 Enter bottom land, brs. E. and W.
 51.40 Wash, 120 lks. wide, 2 ft. deep, course S. 60° W.
 57.70 Wash, 250 lks. wide, 2 ft. deep, course S. 60° W.
 59.20 Leave bottom land, brs. E and W.
 65.70 Left bank of wash, brs. N. 60° E. and S. 60° W. Thence across wash.
 69.80 Main drain of wash, course S. 60° W.
 72.70 Right bank of wash, brs. N. 60° E.. and S. 60° W.; leave wash.
 79.68 Intersect the 2nd Standard Parallel South, 18.12 chs. W. of the reestablished standard $\frac{1}{4}$ sec. cor. of sec. 31, hereinbefore described.
 At point of intersection,

Set an iron post, 3 ft. long, 2 ins. in diam., 12 ins. in the ground, and raise a mound of stone, 3 ft. base, 2 ft. high, around same, for reestablished closing cor. of secs. 5 and 6, with brass cap, marked

T10S	R12E
<hr/>	
S31	
<hr/>	
S 6	S 5
<hr/>	
T11S	R12E
<hr/>	
C	C
<hr/>	
1919	

Raise a mound of stone, 3 ft. base, 2 ft. high, S. of cor. Land, rolling.

Soil, sandy and gravelly, 3rd rate.
Undergrowth, dense greasewood, catclaw, ocotilla, sahuaro and cholla cactus.

Timber, scattering small ironwood and mesquite.
