# FIELD NOTES

OF THE SURVEY OF THE

West, East and North boundaries, and

Subdivision lines of

TOWNSHIP 8 SOUTH, RANGE 12 EAST,

Of the Gila and Salt River Base and Meridian,

In the State of Arizona.

## EXECUTED BY

William H. Thorn, U.S. Cadastral Engineer

and

Horace M. Muscott, U.S. Transitman

In the capacity of United States Surveyors  
~~Transitman, respectively,~~, under instructions dated February 6, 1918,  
issued by the United States Surveyor General to govern surveys included in  
Group No. 81, which were approved by the Commissioner of the General Land  
Office, February 27, 1918, and Assignment Instructions dated  
December 18, 1913.

Survey commenced March 29, 1919

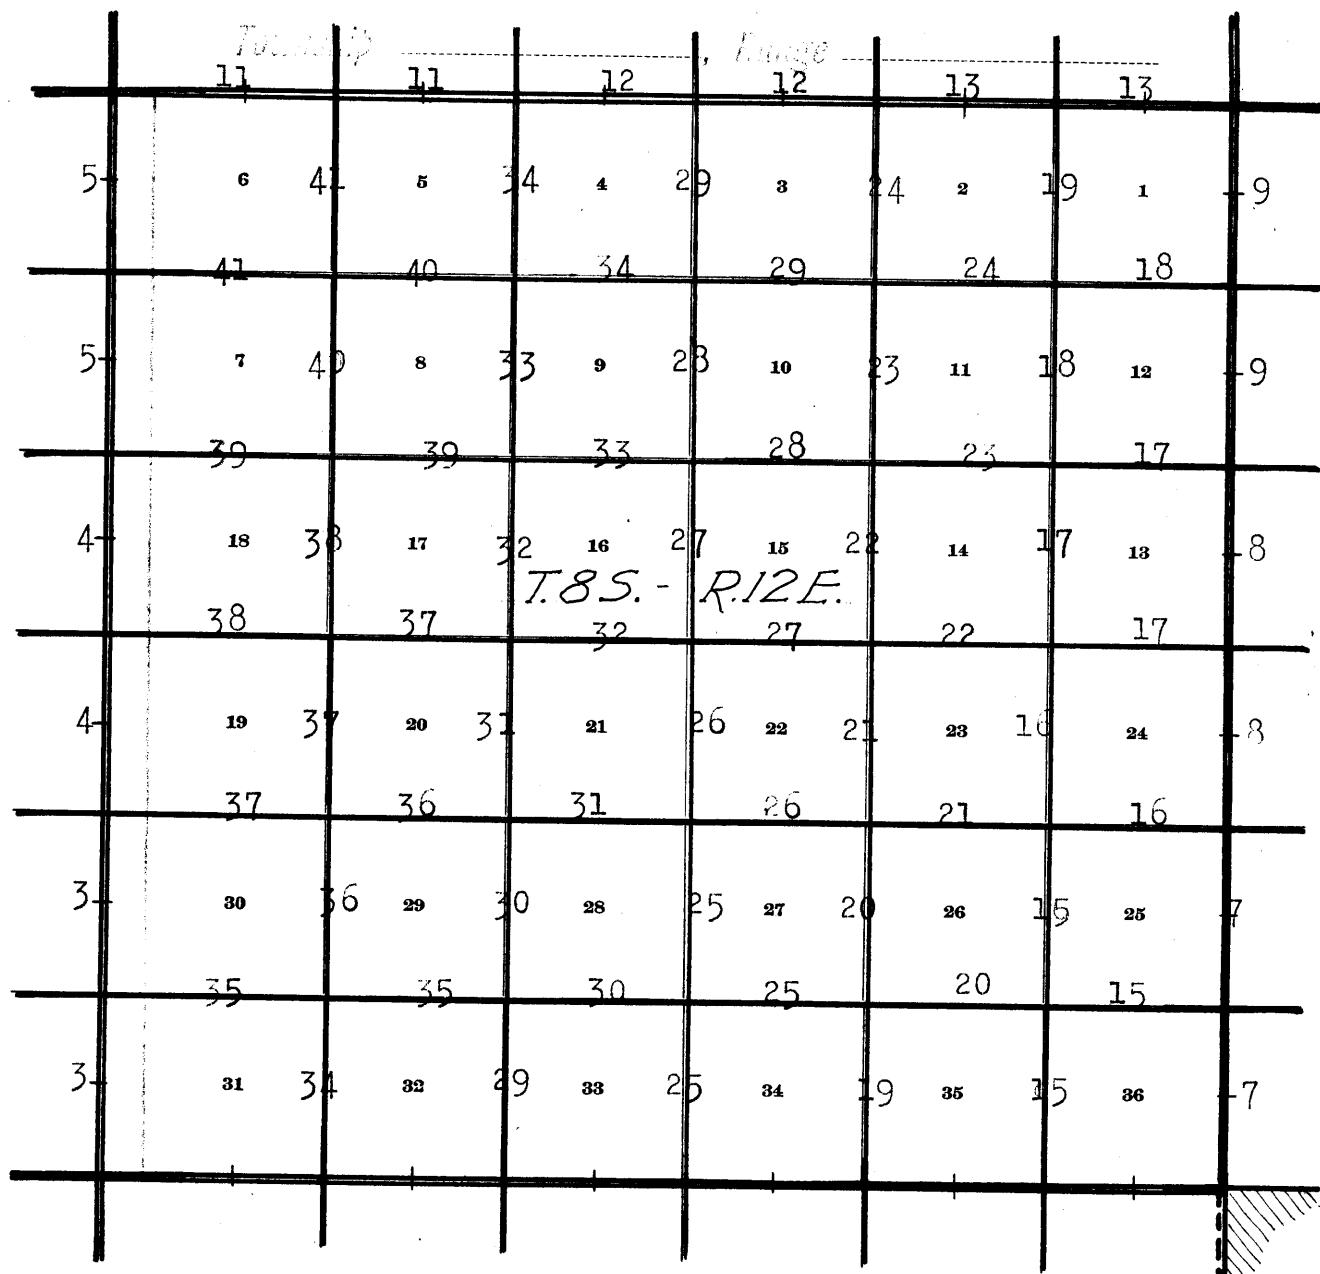

Survey completed April 16, 1919.

Black lines on above diagram indicate surveys executed by William H. Thorn, U.S.Cadastral Engineer, on dates shown thereon.

Red lines on above diagram indicate surveys executed by Horace M. Muscatt, U.S.Transitman, on dates shown thereon.

Resurvey and survey hereinafter described executed by William H. Thorn, U. S. Cadastral Engineer and Horace M. Muscott, U. S. Transitman, on dates shown on diagram on page 1 hereof, using respectively Young and Sons' light mountain transits Nos. 8592 and 8248, described, with certificate of approval by the Assistant Supervisor of Surveys, in Book "A".

We examine the adjustments of the transits and correct all errors; then, to test the solar apparatus, by comparing their indications resulting from solar observations made during a.m. and p.m. hours, with a meridian determined by observations on Polaris at elongation, we proceed as follows:

March 29, 1919: At our camp, in sec. 2, T. 9 S., R. 12 E., in lat.  $32^{\circ}40\frac{1}{2}'N.$ , long.  $111^{\circ}4'W.$ , at 7 h. 2.1m., p.m., l.m.t., by our watches, which are set to correct local mean time, we observe Polaris at western elongation, in accordance with the Manual of Instruction, and mark a point in the line thus determined by a tack in a stake, 5 chs. N. of our station.

March 30, 1919: We lay off the azimuth of Polaris,  $1^{\circ}20'$  to the east, and mark the meridian thus determined, by a tack in a stake, driven firmly in the ground, 5 chs. N. of our station.

At 9 hrs. 0 m., a.m., l.m.t., we place both transits on the meridian, and set off  $32^{\circ}40\frac{1}{2}'N.$  on the lat. arcs;  $3^{\circ}33'N.$  on the decl. arcs; and determine a meridian with each solar, which in each case, agrees with the true meridian.

At apparent noon, with the lat. arc unchanged, we observe the sun on the meridian with each transit; the resulting readings of the decl. arcs are  $3^{\circ}36'N.$ , which agrees with the computed decl. of the sun.

At 3 h. 0m., p.m., l.m.t., with the lat. arcs unchanged, we set off  $3^{\circ}39'N.$  on the decl. arcs, and determine a meridian with each solar, which in each case agrees with the true meridian.

As all of the solar observations during the usual hours of solar work come within  $1'30''$  of the true meridian, we conclude that the adjustments of the instruments are satisfactory.

## Subdivision of T. 8 S. R. 12 E.

**Chains.** Undergrowth, catclaw, greasewood and cholla, and sahuaro cactus. The continued satisfactory adjustment of the solar apparatus during the survey of this township is indicated from field tests, as described in Books "F" and "I".

GENERAL DESCRIPTION.

This township is gently rolling with the exception of some rocky hills in secs. 18, 19, 30, 31, 32 and 33. The general drainage is to the West. The approximate elevation is 2,000 ft. above sea level. The soil is a sandy clay, 2nd rate and sandy clay mixed with a gravelly granite formation, 3rd and 4th rate. Timber is small scattering palo verde and mesquite. The undergrowth is heavy and dense cacti, greasewood, cat claw and mesquite brush. There is good spring grass pasture for cattle but no permanent grasses. The township is adapted for grazing purposes. There are a few prospect holes but nothing of any value. Plummers have a ranch in sec. 19, with a windmill and water; a homestead in sec. 7, with water and Olsons have a ranch in sec. 35, with water. The phoenix-Tuscon highway runs NW. and SE. across township and the Red Rock-Ray road runs, N. and S.
