FIELD NOTES

OF THE SURVEY OF THE

Seventh Standard Parallel North through Range 7 West,

the North boundary,

the West boundary,

and the Subdivision lines of

Township 29 North, Range 7 West,

Of the Gila and Salt River Base and Meridian,

In the State of Arizona,

EXECUTED BY

Fred W. Rodolf, U. S. Cadastral Engineer,

Dupree R. Averill, U. S. Surveyor, and

James C. O'Brien, U. S. Transitman,

In the capacity of U. S. Surveyor, under Special Instructions dated February 24, 1920,
issued by the United States Surveyor General to govern surveys included in Group
No. 105, Arizona, which were approved by the Commissioner of the General Land
Office, March 6, 1920, and Assignment Instructions dated March 27, 1920
April 15, 1920

Survey commenced April 14, 1920

Survey completed April 30, 1920

DATE DIAGRAM.

TOWNSHIP 29 NORTH, RANGE 7 WEST.

Black lines on this diagram indicate surveys executed by
Fred W. Rodolf, U.S. Cadastral Engineer, on dates shown
thereon.

Red lines on this diagram indicate surveys executed by
Dupree R. Averill, U. S. Surveyor, on dates shown thereon.

Blue lines on this diagram indicate surveys executed by
James C.O'Brien, U.S. Transitman, on dates shown thereon.

See book "A" for dates of survey of this line

Surveys hereinafter described, executed on dates shown on
above diagram by Fred W. Rodolf, U.S. Cadastral Engineer,
Dupree R. Averill, U.S. Surveyor, both using Buff solar
transit No. 9223, and James C. O'Brien, U.S. Transitman,
using successively, Young and Sons mountain transits
Nos. 8389 and 8541.

Nos. 0509 and 0541.
Each instrument is equipped with full vertical circle
and the Smith solar attachment; unless otherwise
specified all azimuth determinations are accomplished
with the solar attachments.

PRELIMINARY FIELD TEST OF BUFF SOLAR TRANSIT NO. 9223,
by FRED W. RODOLE, U.S.C.E.

April 13, 1920. I examine the adjustment of the instrument, and correct all errors; then, to test the solar apparatus by comparing its indications from

2

observations made during a.m. and p.m. hours with a meridian established by Polaris observation, proceed as follows:

At camp in the NW. $\frac{1}{4}$ of sec. 16, T. 29 N., R. 7 W., G. & S.R. Base and Mer., Arizona, in lat. $35^{\circ}54'N.$; long. $113^{\circ}02\frac{1}{2}'W.$ at 6h. 00m. p.m., l.m.t., observe Polaris at western elongation, making four observations, two each with the telescope in direct and reversed positions, and mark the mean point in the line thus determined, on a peg driven firmly in the ground 8 chs.N.

Azimuth of Polaris at western elongation = $1^{\circ}23'00''$.

April 14, 1920, I lay off the azimuth of Polaris $1^{\circ}23'$ to the east, and mark the meridian thus determined by a tack in a peg driven firmly in the ground 8 chs.N.

At 9h. 00m. a.m., l.m.t., I set off $35^{\circ}54'N.$ on the lat.arc; $9^{\circ}07'N.$ on the decl.arc, and determine a meridian with the solar, which I find to agree with the true meridian.

At app. noon, with the lat.arc unchanged, I observe the sun on the meridian; the resulting reading of the decl.arc is $9^{\circ}09\frac{1}{2}'N.$, which agrees with the computed declination of the sun.

At 3h. 00m. p.m., l.m.t., with the lat.arc unchanged, I set off $9^{\circ}12\frac{1}{2}'N.$ on the decl.arc; and determine a meridian with the solar, which I find to agree with the true meridian.

As all of the solar observations during the usual hours of solar work come within $1'30''$ of the true meridian, I conclude that the adjustment of the instrument is satisfactory.

FINAL FIELD TEST OF YOUNG & SONS TRANSIT NO. 8389, AND PRELIMINARY FIELD TEST OF YOUNG & SONS TRANSIT NO. 8541, BY JAMES C. O'BRIEN, U. S. T.

April 17, 1920. I examine the adjustment of each instrument and correct all errors; then, to test the solar apparatus by comparing its indications from observations made during a.m. and p.m. hours with the meridian established by Polaris observation April 13, 1920, by Fred W. Rodolf at camp in the NW. $\frac{1}{4}$ of sec. 16, T. 29 N., R. 7 W., as hereinbefore described, proceed with each instrument as follows:

April 18, 1920. At 9h. 00m., a.m., l.m.t., I set off $35^{\circ}54'N.$ on the lat.arc; $10^{\circ}53\frac{1}{2}'N.$ on the decl.arc, and determine a meridian with the solar, which I find to agree with the true meridian.

At app. noon, with the lat.arc unchanged, I observe the sun on the meridian; the resulting reading of the decl. arc is $10^{\circ}56'N.$, which agrees with the computed declination of the sun.

At 3h. 00m. p.m., l.m.t., with the lat.arc unchanged, I set off $10^{\circ}59'N.$ on the décl.arc, and determine a meridian with the solar, which I find to agree with the true meridian. As all of the solar observations made during the usual hours of solar work come within $1'30''$ of the true meridian, I conclude that the adjustments of both instruments are satisfactory.

Unless otherwise specified, all measurements are made with Lufkin steel tapes, 5 chs. in length, compared with a Chesterman standard steel tape, and found correct. The measurements are made on the slope, the vertical angles determined, and the slope measurements properly reduced to true horizontal distances.

Survey of Seventh Std. Parallel North, thru. Range 7 West. 3.

Chains. From the standard cor. of T.S. 29 N., R.S. 6 and 7 W., on 7th Standard Parallel North, described in Book "A," West, on true line, on S. bdy. of sec. 30. Over gently rolling land, thru. scattering timber and undergrowth. Asc. 45 ft. over E. slope.
 19.98 NE. end of low ridge, brs. NE. and SW. Desc. slightly over NW. slope.
 25.98 Draw, course NE. Asc. 55 ft. over E. slope, to
 40.00 Set an iron post, 3 ft. long, 1 in. in diam., 10 ins. in the ground, in a mound of stone, for standard $\frac{1}{4}$ sec. cor. of sec. 30, marked on brass cap,

6.45	N.0°03'W., bet. secs.16 and 17. Over level land, devoid of timber and undergrowth. Road, brs.NE. and SW.
40.00	Set an iron post, 3 ft.long, 1 in. in diam., 24 ins.in the ground, for $\frac{1}{4}$ sec.cor., marked on brass cap,
	S17 S16 1920
	and dig pits 18x18x12 ins., one each N. and S. of cor. 3 ft. dist. Continue over level land, devoid of timber and undergrowth. Fence, brs.S.21 $\frac{1}{2}$ E. and N.21 $\frac{1}{2}$ W. W.edge of water in Laguna Lake, brs.S.21 $\frac{1}{2}$ E and N.21 $\frac{1}{2}$ W. near S.end of said lake. This lake is about 100 chs. in length N. and S., and about 10 chs.wide, E. and W. The line N.of this point passes over the water surface of the lake, rendering continuation of chaining impracticable; therefore, obtain the measurement across the lake by triangulation, as described as follows, and as shown on the diagram hereon: Measure a base S.89°57'W., 14.79 chs. Set flag ahead on sec.line at E. edge of water in lake. From W.end of base, flag brs.N.23°28'E. Included angles are 66°29', 23°31' and 90°00', the sum of which is 180°00'. Triangulated dist.on sec.line across lake is obtained by Tang.66°29' x base or $2.29801 \times 14.79 = 33.99$ 33.99 chs., which added to 51.37 chs. gives 85.36 chs., N.0°3' W., from cor.of secs.16,17,20 and 21, for the position of the flag on the E.edge of lake. True point for cor.of sec.. 8,9,16 and 17 falls in water of Laguna Lake, where it is impracticable to monument the cor.; therefore, at (5.30 chs.N.0°3'W., from sec.cor.point). Flag point of above described triangulation at E. edge of water in Laguna Lake, bearing N 21 $\frac{1}{2}$ W. and S.21 $\frac{1}{2}$ E. Set an iron post 3 ft.long, 2 ins. in diam., on bed rock in mound of stone for witness cor.to cor.of secs.8,9, 10.and 17, marked on brass.cap.,

The continued satisfactory adjustment of the solar apparatus during the survey of this township is indicated from field tests described in books "C" and "D" of this group.

GENERAL DESCRIPTION.

This township lies entirely within the Hualpai Indian Reservation, and the surface is mostly gently rolling. The entire township is on the plateau between Cataract Canyon on the East, and the Colorado River Canyon on the North and West. The general course of the drainage is NE. The west two ranges of sections drain NE. into a valley bearing N. and S., which forms the head of what is known as Laguna Valley, and which drains northerly into the Colorado River.

The soil varies from a sandy loam, 1st rate, to rocky, 4th rate, a gravelly clay, 2nd and 3rd rate predominating. The timber consists mainly of pine and cedar, interspersed with oak, and is mostly in a scattering growth tho. in some parts are found dense timbered areas.

A scattering undergrowth of scrub oak, scrub cedar, sage brush and mountain mahogany is prevalent in nearly all sections.

There are no streams of permanent flowing water, the drainage system consisting of dry coulees, washes and draws, carrying water at irregular periods.

Water is stored in Thornton Tank in sec. 33, and in Laguna Lake in secs. 8, 9, 16 and 17 for watering of range stock.

A good growth of desert grass is found in nearly all parts of the township, rendering the area good for grazing purposes, which is the only use to which the land is at present utilized.

There are no settlers residing in the township, and the only improvements are wire fences in the central part

OK 3504

53

There is no evidence of there being valuable mineral de-
posits of any kind.

Several roads traverse the township.

I, Fred W. Rodolf, U.S.Cadastral Engineer, hereby certify upon honor that, in pursuance of special instructions received from the U. S. Surveyor General, for Group 105, Arizona bearing date of the 24th day of February, 1920, I have well, faithfully, and truly in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instructions, and the laws of the United States, surveyed all those parts or portions of the Seventh Standard Parallel North thru Range 7 West, and the Subdivision lines of Township 29 North, Range 7 West of the Gila and Salt

River Base and Meridian, in the State of _____, which are represented in the foregoing field notes ^{and by diagram on page 1 hereof} as having been executed by me, and under my direction; and that all the corners of said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the U. S. Surveyor General, for Group 105, Arizona and in the specific manner described in the field notes, and that the foregoing are the original field notes of such survey.

Place Las Vegas, Nevada
Date April 19, 1922

Fred W. Rodolf
U.S.Cadastral Engineer.

APPROVAL.

OFFICE OF THE UNITED STATES SURVEYOR GENERAL,

Phoenix, Arizona, May 13, 1922The foregoing field notes of the survey of the

Seventh Std. Parallel North thru Range 7 West, and the
North and West boundaries and Subdivision lines of
Township 29 North, Range 7 West
of the Gila and Salt River Base and Meridian in the State of Arizona

executed by Fred W. Rodolf, U.S.Cadastral Engineer, Dupree R. Averill,

U.S. Surveyor and James C. O'Brien, U.S. Transitman

under his special instructions dated February 24, 1920 for Group 105, 101, having been critically examined, and the necessary corrections and explanations made, the said field notes, and the surveys they describe, are hereby approved.

Frank D. Frost

U. S. Surveyor General.

I certify that the foregoing transcript of the field notes of the above described surveys in

has been correctly copied from the original notes on file in this office.

U. S. Surveyor General.
