FIELD NOTES

OF THE SURVEY OF THE

East half of the North boundary, the South $5\frac{1}{2}$ miles of the West boundary, and of a portion of the Subdivision lines of

TOWNSHIP 31 NORTH, RANGE 8 WEST,

and of $\frac{1}{2}$ mile of the Subdivision lines of

TOWNSHIP 31 NORTH, RANGE 9 WEST,

Of the Gila and Salt River Base and Meridian,

In the State of Arizona

EXECUTED BY

Horace M. Muscott, and Francis R. Ihrie, U. S. Transitmen,

In the capacity of U. S. Surveyors, under Special Instructions dated February 25, 1920, issued by the United States Surveyor General to govern surveys included in Group No. 106, which were approved by the Commissioner of the General Land Office, March 8, 1920, and Assignment Instructions dated June 2, 1920

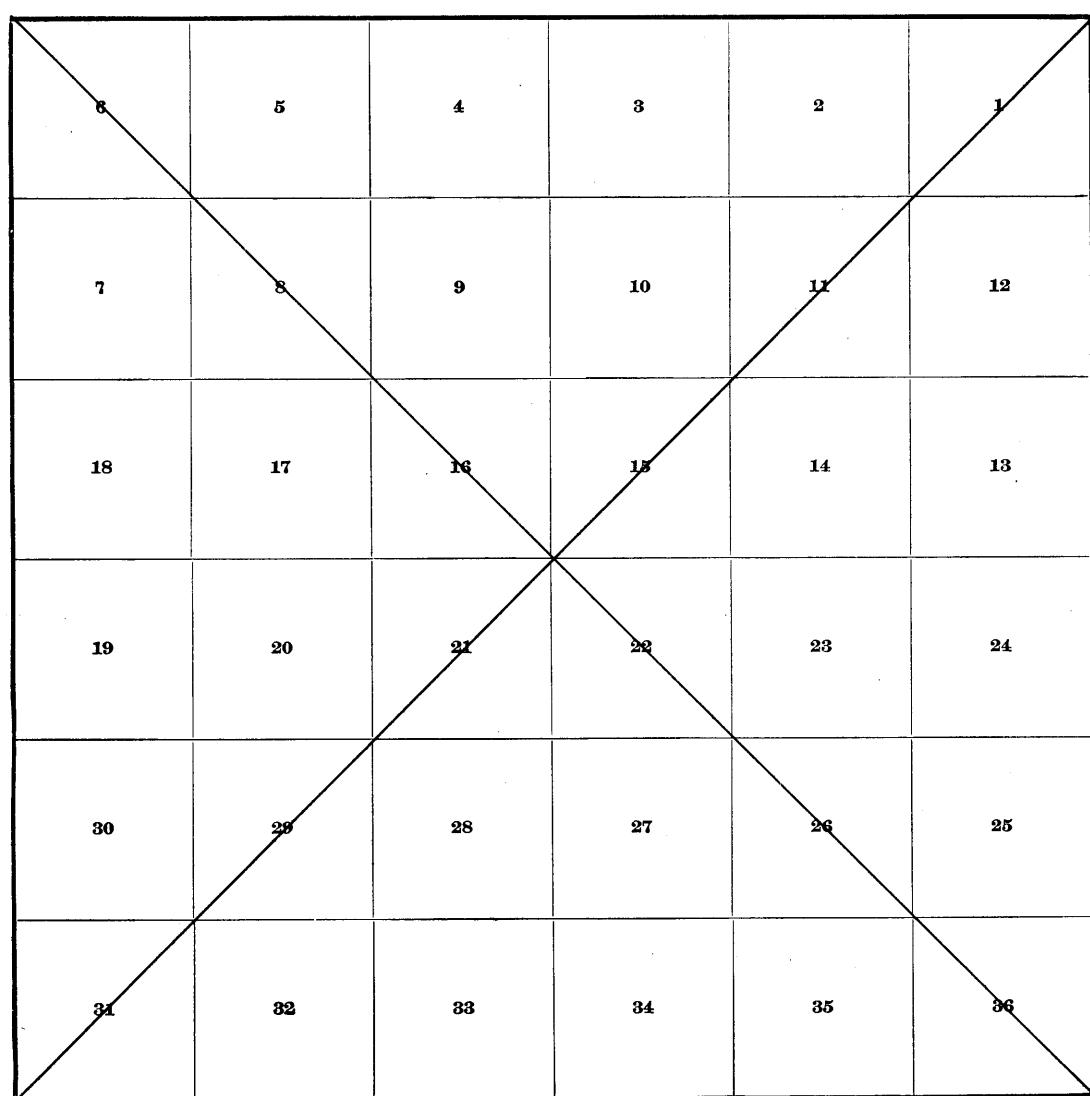

Survey commenced July 8, 1920

Survey completed August 4, 1920

Surveyed under current Group 105

See book "D"
for date of
execution of
survey of this line.

See book "C" for dates of execution of survey of this line.

Red lines on above diagram indicate surveys executed by Horace M. Muscett,
U. S. Transitman, on dates shown thereon.Blue lines on above diagram indicate surveys executed by Francis R. Ihrie,
U. S. Transitman, on dates shown thereon.

165

Surveys hereinafter described, executed by Horace M. Muscott and Francis R. Ihrie, U.S. Transitmen, on dates shown on diagram on page 2 hereof, using respectively, Young and Sons Transit No. 8489, and Buff and Buff transit No. 9977. Each instrument is equipped with full vertical circle, and the Smith solar attachment; unless otherwise specified, all azimuth determinations are accomplished with the solar attachment.

July 8, 1920: We examine the adjustment of each instrument, and correct all errors; then, to test the solar apparatus by comparing its indications from observations made during a.m. and p.m. hours with a meridian established by Polaris observation, proceed with each instrument as follows:

At the cor. of secs. 5, 6, 31 and 32, on S. bdy. of T. 31 N., R. 8 W., Gila and Salt River Base and Meridian, Arizona, in latitude $36^{\circ}01'30''$ N., and in longitude, $113^{\circ}10'29''$ W., at 7h. 30m. a.m., l.m.t., make an hour angle observation on Polaris west of the meridian, two each with the telescope in direct and reversed positions, and mark the mean point in the lines thus determined on a peg driven firmly in the ground about 5 chs. N.

Lay off the azimuth of Polaris 23° to the east, and mark a point in the meridian thus determined by a tack in a peg driven firmly in the ground 5 chs. N.

July 8, 1920: At 8h. 00m., a.m., l.m.t., set off $36^{\circ}1\frac{1}{2}'$ N. on the lat. arc; $22^{\circ}29'$ N. on the decl. arc, and determine a meridian with the solar, which agrees with the true meridian.

At app. noon, with the lat. arc unchanged, observe the sun on the meridian; the resulting reading of the decl. arc is $22^{\circ}27\frac{1}{2}'$ N., which agrees with the computed decl. of the sun.

At 4h. 00m. p.m., l.m.t., with the lat. arc unchanged, set off $22^{\circ}26\frac{1}{2}'$ N. on the decl. arc, and determine a meridian with the solar, which agrees with the true meridian.

As all of the solar observations made with both instruments during the usual hours of the solar work come within $1'30''$ of the true meridian, we conclude that the adjustments of the instrument are satisfactory.

Unless otherwise specified, all measurements are made with Lufkin steel tapes, 5 chs. in length, compared with Lufkin standard steel tapes, and found correct. The measurements are made on the slope, the vertical angle determined, and the slope measurements properly reduced to the true horizontal distances.

A Survey of part of West bdy. of Township 31 North, Range 8 West.

Chains.

From the cor. of Ts. 30 and 31 N., Rs. 8 and 9 W., described in Book "C,"
 North, on true line, bet. secs. 31 and 36.
 Over mountainous land, thru. dense timber and undergrowth.
 Descend 125 ft., over N.slope.
 22.30 Bottom of ravine, course E. Asc. 170 ft., over S.slope, to
 40.00 Spur, slopes E. Set an iron post, 3 ft. long, 1 in. in diam., 10 ins. in the ground to bed rock, supported in a mound of stone, for $\frac{1}{4}$ sec.cor., marked on brass cap,

 lks. dist., marked T31N R8W S6 BT.

A cedar, 12 ins. in diam., brs. S. 8° E., 89 lks.
 dist., marked T31N R8W S7 BT.

Land, nearly level.

Soil, gravelly and rocky, 3rd and 4th rate.

Timber, scattering pine and cedar.

Undergrowth, scattering sage brush and cactus.

No grass.

North, on a true line, on W. bdy. of sec. 6, (S. $\frac{1}{2}$).

Over nearly level land, thru. scattering timber and under
 growth, on broad bench, between the left upper and
 lower walls of the Colorado River Canyon. Descend
 slightly over NW. slope.

30.00 Gully, course NE. Ascend slightly over SE. slope, to
 40.00 Set an iron post, 3 ft. long, 1 in. in diam., over cross
 (x)marked on surface rock, and raise mound of stone
 around post, for $\frac{1}{2}$ sec. cor. of sec. 6 only, marked on
 brass cap,

$\frac{1}{2}$ S 6
 1920

from which,

A pine, 6 ins. in diam., brs. S. $50\frac{1}{2}$ ° E., 30 lks.
 dist., marked $\frac{1}{2}$ S 6 BT.

About 15 chs. N. from this cor., the township bdy. in-
 tersects the left lower rim of the Colorado River
 Canyon, beyond which precipitous descent over the
 left lower wall of the canyon renders further survey
 of the line impracticable.

Land, nearly level.

Soil, rocky, 4th rate.

Timber, scattering pine and cedar.

Undergrowth, scattering sage brush and cactus.

No grass.

8 Survey of part of the North bdy. of Township 31 North, Range 8 West.

Chains.

From the cor. of Ts. 31 and 32 N., Rs. 7 and 8 W., established under current Group No. 105, which is an iron post 3 ins. in diam., projecting 12 ins. above ground firmly set, properly marked on brass cap, and witness ed by four properly marked bearing trees as follows:

A pine, N. 58° E., 173 lks. dist.

A pine, S. 27 $\frac{1}{2}$ ° E., 102 lks. dist.

A pine, S. 26° W., 83 lks. dist.

A pine, N. 34 $\frac{3}{4}$ ° W., 90 lks. dist.

Thence,

West, on a true line, bet. secs. 1 and 36.

Over gently rolling land, thru dense timber and under growth on bench.

Descend slightly over W. slope, to

12.00 Top of sandstone cliffs 150 ft. high, bearing N. and S., facing W. Leave gently rolling land and timber, and enter mountainous land. From foot of cliffs, descend 160 ft., over steep W. slope, to

20.60 E. edge of bottom of Prospect Valley, brs. N. and S. Leave mountainous, and enter nearly level land in bottom of Prospect Valley, bearing NE. and SW.

30.60 Wash, 50 lks. wide, course N.

35.60 W. edge of bottom of Prospect Valley, brs. N. and SW. Leave nearly level bottom of valley, and enter rolling land on W. side of valley. Ascend 20 ft., over E. slope, to

40.00 Set an iron post, 3 ft. long, 1 in. in diam., 8 ins. in the ground to bed rock, supported in a mound of stone, for $\frac{1}{4}$ sec. cor., marked on brass cap,

1 S 36

4 S 1

1920

and raise a mound of stone, 2 ft. base, $1\frac{1}{2}$ ft. high, N. of cor.

Continue over rolling land, thru. dense undergrowth. Asc. 180 ft., over E. slope, to

60.00 Leave rolling, and enter mountainous land. Asc. 455 ft., over E. slope, to

80.00 Mark a cross (x) on rock ledge at exact cor. point, and over same, set an iron post, 3 ft. long, 2 ins. in diam., supported in a mound of stone, for cor. of secs. 1, 2, 35 and 36, marked on brass cap,

Chains.

- 40.01 Set an iron post, 3 ft. long, 1 in. in diam., 12 ins. in the ground to bed rock, supported in a mound of stone, for $\frac{1}{4}$ sec.cor., marked on brass cap,

$$\begin{array}{c} \frac{1}{4} S 9 \\ \hline S 16 \\ 1920 \end{array}$$

from which,

A pine, 8 ins. in diam., brs. S. 29° W., 30 lks.
dist., marked $\frac{1}{4}$ S 16 BT.

A pine, 6 ins. in diam., brs. N. 5° W., 44 lks.
dist., marked $\frac{1}{4}$ S 9 BT.

Thence over rolling land on top of mesa. Ascend 34 ft., over E.slope.

49.80 Descend 20 ft., over W.slope, to

52.00 Left upper rim of the Colorado River canyon, brs. N. and S. Leave rolling land and timber, and enter mountainous land. Desc. 740 ft., over W.slope, to sec.cor.

54.00 Perpendicular cliff, about 100 ft. high, brs. S. and NW., facing W.

80.02 The cor. of secs. 8, 9, 16 and 17.

Land, E. $4\frac{1}{2}$ chs. and W. 28 chs., mountainous; remainder, nearly level and rolling.

Soil, rocky clay, 4th rate.

Timber, pine and cedar, dense in E. 52 chs.; scattering in W. 28 chs.

Undergrowth, scattering chamisal, manzanita and sagebrush. No grass.

N. 0° 3' W., bet. secs. 8 and 9.

Over mountainous land, thru. scattering timber and undergrowth, along left upper wall of the Colorado River canyon.

The sec.line passes over faces of cliffs and otherwise broken surface, which renders chaining of measurement thereon impracticable; therefore, the measurement of the entire line is obtained by a combination of offset and traverse as described as follows, and as shown on the diagram hereon:

From cor. of secs. 8, 9, 16 and 17,
West, 6.00 chs. on offset line.

Thence,

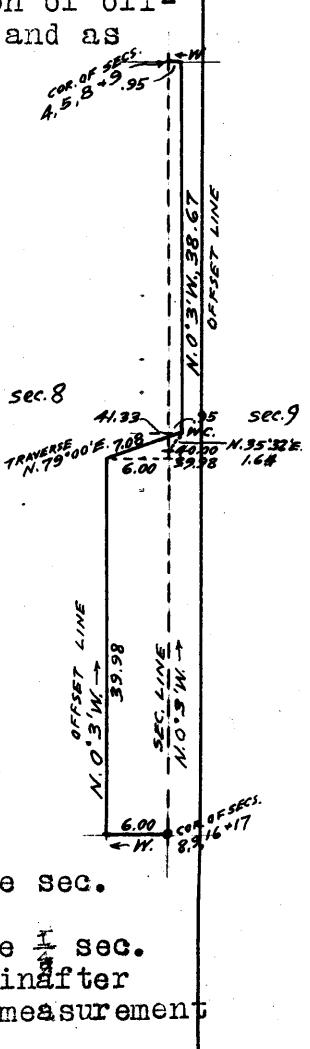

N. 0° 3' W., 39.98 chs. on offset line to a point
in sec. 8, which is 6.00 chs.

W. of 39.98 ch. station on
the sec.line, bet. secs. 8
and 9.

It is impracticable to
reach the true point for sec. 8
 $\frac{1}{4}$ sec.cor., or a point
on sec.line in close
proximity thereto;
therefore, traverse to the
nearest accessible point
where a witness cor. to the
 $\frac{1}{4}$ sec.cor. can be estab-
lished as follows:

N. 79° 00' E., 7.08 chs. to a point in sec. 9, the
position of which is de-
termined by computation
to be N. 35° 32' E., 1.64 chs.
dist. from true point for
 $\frac{1}{4}$ sec.cor. or 0.95 chs.E.
from 41.33 ch. station on the sec.
line.

Establish witness cor. to the $\frac{1}{4}$ sec.
cor. at this point, as hereinafter
described, and continue the measurement
of the sec.line as follows:

BOOK 3515

38 Part of Subdivision lines of Township 31 North, Range 8 West.

Chains.

From the witness cor. to $\frac{1}{4}$ sec.cor.
 N. $0^{\circ}3'W.$, 38.67 chs. on offset line in sec. 9 to a point
 0.95 chs. E. of, 80.00 ch. point on sec.
 line, bet. secs. 8 and 9.
 Thence,
 West, 0.95 chs., on offset line to the true point for
 cor. of secs. 4, 5, 8 and 9, and monument
 said sec.cor. as hereinafter described.
 The approximate positions of the topographical features
 on the line bet. secs. 8 and 9, and approximate differ-
 ences in elevation between same, are described as fol-
 lows:
 From cor. of secs. 8, 9, 16 and 17,
 Ascend 60 ft., over SW. slope.
 6.65 Spur, slopes NW. Descend 70 ft., over NW. slope.
 14.25 Gulch, course NW. Ascend 600 ft., over SW. face of cliffs,
 bearing NW. and SE.
 26.00 Top of cliffs, thence along W. slope, with slight change
 in elevation, to
 32.00 Top of same cliffs, brs. E. and SW. Descend 400 ft. over
 N. face of same.
 36.00 Gulch, course W. Ascend 250 ft., over SW. slope, to
 40.00 True point for $\frac{1}{4}$ sec.cor. falls on precipitous SW. slope,
 and is inaccessible; therefore, at a point 1.64 chs.
 N. $35^{\circ}32'E.$ herefrom, located by offset and traverse,
 as hereinbefore described, establish a witness cor. to
 the $\frac{1}{4}$ sec.cor. as follows:
 Set an iron post, 3 ft. long, 1 in. in diam., 6 ins. in
 the ground to bed rock, supported in a mound of stone,
 for witness cor. to the $\frac{1}{4}$ sec.cor. of secs. 8 and 9,
 marked on brass cap,

and raise a mound of stone, 2 ft.base, 1 $\frac{1}{2}$ ft.high, W.
of cor.

Beyond this cor., the line passes over precipitous broken
slopes of the left lower wall of the Colorado River
canyon, rendering continuation of survey impracticable.
Land, rolling and broken.

Soil, red sandstone, 4th rate.

Timber, scattering pine and cedar in S.11 chs. None
elsewhere.

Undergrowth, scattering sage brush.
No grass.

The continued satisfactory adjustment of the solar appa-
ratus, throughout the Survey of this township is
indicated from field tests, as described in Book "F."

The following notes and observations were made during the
various stages of the field work, and will be of interest in
connection with the adjustment of the apparatus.

On the 1st day of May, 1920, the sun was at the zenith at 12 M. and the
apparatus was set up at the station, and the observations
were made.

On the 2nd day of May, 1920, the sun was at the zenith at 12 M. and the
apparatus was set up at the station, and the observations
were made.

On the 3rd day of May, 1920, the sun was at the zenith at 12 M. and the
apparatus was set up at the station, and the observations
were made.

On the 4th day of May, 1920, the sun was at the zenith at 12 M. and the
apparatus was set up at the station, and the observations
were made.

GENERAL DESCRIPTION.

This township lies entirely within the Hualpai Indian Reservation on the south or left side of the Colorado River Canyon, the left upper rim of which passes thru. the NW. $\frac{1}{4}$ of the township. The unsurveyed portion falls on the left lower wall of the canyon, and is unsurveyable. The surface is mostly mountainous, tho. there are scattered areas of rolling and nearly level land in all parts of the township. The greater part of the township is drained by Prospect Valley, course north, thru. the eastern part. The soil is mostly rocky, 4th rate, with the exception of a narrow strip along the east boundary and some parts of the bottom of Prospect Valley, where there is a gravelly, 2nd and 3rd rate soil. There are scattering small areas devoid of timber, but most of the township has either a scattering or dense growth of cedar and pine. The undergrowth consisting of sage brush, chamisal, scrub cedar, manzanita, scrub oak and cactus is mostly scattering. There is a fair growth of grass along the east bdy. and in parts of the bottom of Prospect Valley, but elsewhere there is none. The only permanent running water is in a spring in sec.18. A gypsum deposit in secs.1 and 2, and a mine in sec.6, known as the "Ridenour Mine" are the only indications of valuable mineral. There are no settlers, and the only improvements consist of two cabins in sec.6 at the Ridenour Mine, a platform for loading ore in sec.21, and a fenced tract around the SE. cor. of the Tp. A road and trail traverses the bottom of Prospect Valley, a trail extends from the Ridenour mine to the ore loading platform, and a road extends from the ore loading platform southeasterly to the bottom of Prospect Valley, in T.30 N., R. 8 W.

Chains.

Survey hereinafter described executed by Horace M. Muscott, U.S. Transitman, on date shown on diagram on page 2 hereof, using Young and Sons Transit No. 8489, described with record of preliminary field test on page 3 hereof.

From the cor. of secs. 30, 31 and 36 on E. bdy. of Tp., hereinbefore described, West, on a true line, on N. bdy. of sec. 36 (E. $\frac{1}{4}$). Over nearly level land, thru. dense timber and under-growth, on top of spur, sloping slightly to the east from the left upper rim of the Colorado River Canyon. The N. edge of the top of this spur, brs. E. and W. at about 1.00 ch. N. of line.

40.00 Set an iron post, 3 ft. long, 1 in. in diam., 15 ins. in the ground to bed rock, supported in a mound of stone for $\frac{1}{4}$ sec. cor. of sec. 36 only, marked on brass cap,

$\frac{1}{4}$ S 36
1920

from which,

A cedar, 4 ins. in diam., brs. S. $34\frac{1}{2}$ ° E., 12 lks.
dist., marked $\frac{1}{4}$ S 36 BT.

An oak, 4 ins. in diam., brs. S. 35° W., 23 lks.
dist., marked $\frac{1}{4}$ S 36 BT.

About 5 chs. W. of this cor., the line intersects the left upper rim of the Colorado River canyon, bearing N. and S., beyond which steep descent over upper wall of canyon renders continuation of survey impracticable.

Land, nearly level.

Soil, rocky clay, 4th rate.

Timber, dense pine, cedar and oak.

Undergrowth, dense chamisal, scrub oak and sagebrush.

No grass.

The continued satisfactory adjustment of the solar apparatus during the survey of this township is indicated from field test described in Book "F."

GENERAL DESCRIPTION.

The east half of sec. 36 is the only regular subdivision which could be made in the portion of this township lying on the east or left side of the Colorado River canyon, as the positions of the other subdivisional corners in such portion of the township fall either on the left upper or lower walls of the canyon, and are inaccessible. The left lower rim of the canyon crosses the east boundary of the Tp. near the $\frac{1}{4}$ sec. cor. of sec. 6, T. 31 N., R. 9 W., and limited the survey of said bdy. to the south $5\frac{1}{2}$ miles thereon. The left upper rim of the canyon crosses the same Tp. bdy. at about the midpoint, and crosses the south bdy. of this Tp. near the $\frac{1}{4}$ sec. cor. of secs. 1 and 36, limiting the survey of the S. bdy. to the east 40 chs. of said line.

The Colorado River, course SW. enters the township near the NE.cor., and leaves near the SW.cor., and the greater part of the surface of this township falls in the canyon of this river, and is unsurveyable. Along the East bdy. there is a narrow strip of nearly level bench near the left upper rim of the canyon, and also along the left lower rim. The E. $\frac{1}{4}$ of sec. 36 is mountainous with the exception of a small nearly level area on top of a spur in the northern part, and the

drainage is easterly into Prospect Valley. The soil is a rocky clay, 4th rate. The timber, consisting of pine, cedar and oak is dense, and the undergrowth consisting of chamisal, scrub oak, manzanita and sagebrush is also dense. There is no permanent running water except in the Colorado River. There is no grass, evidence of valuable mineral, settlers improvements or roads in the surveyed portion of the township. This part of the township is entirely within the Hualpai Indian Reservation.

CERTIFICATE OF UNITED STATES TRANSITMAN.

BOOK 3515

I, Horace M. Muscett, U. S. Transitman, hereby certify upon honor that, in pursuance of special instructions received from the U. S. Surveyor General for **Group 106, Arizona,**

bearing date of the **25th** day of **February**, 1920, I have well, faithfully, and truly in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instructions, and the laws of the United States, surveyed all those parts or portions of **the North and West boundaries, and Subdivision lines of Township 31 North, Range 8 West,** and **the Subdivision lines of Township 31 North, Range 9 West,**

of the **Gila and Salt River**

Base and Meridian, in the State of **Arizona**, which are represented in **and by diagram on page 2 hereof** the foregoing field notes as having been executed by me, and under my direction; and that all the corners of said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the U. S. Surveyor General for **Group 106, Arizona,** and in the specific manner described in the field notes, and that the foregoing are the original field notes of such survey.

Place **Los Angeles, Calif.**
Date **July 11, 1922**

(Signed) **Horace M. Muscett**
U. S. Transitman

APPROVAL.

OFFICE OF THE UNITED STATES SURVEYOR GENERAL,

Phoenix Ariz., August 7, 1922.

The foregoing field notes of the survey of **the East half of the North Boundary, the South 5½ miles of the West Boundary, and of a portion of the Subdivision lines of Township 31 North, Range 8 West,** and of a portion ($\frac{1}{2}$ mile) of the Subdivision lines of **Township 31 North, Range 9 West,** of the **Gila and Salt River Base and Meridian,** in the State of **Arizona,**

executed by **Horace M. Muscett, and Francis R. Ihrie, U. S. Transitmen,**

under special instructions dated **February 25, 1920** for **Group 106, Ariz.**, having been critically examined, and the necessary corrections and explanations made, the said field notes, and the surveys they describe, are hereby approved.

Frank D. Frost
U. S. Surveyor General.

I certify that the foregoing transcript of the field notes of the above described surveys in **Book "B"** of **Group 106, Arizona**, has been correctly copied from the original notes on file in this office.

U. S. Surveyor General.
