## FIELD NOTES

OF THE RETRACEMENT OF

part of the Arizona-Nevada State Boundary (307M to 301M)

AND OF THE SURVEY OF

part of the East boundary (the North 4 miles)

the North boundary,

and the Subdivision lines of

Fractional Township 41 North, Range 16 West.

Of the Gila and Salt River Base and Meridian,

In the State of Arizona

EXECUTED BY

Joseph P. Davis, U. S. Cadastral Engineer,

and

Claude F. Warner, U. S. Transitman,

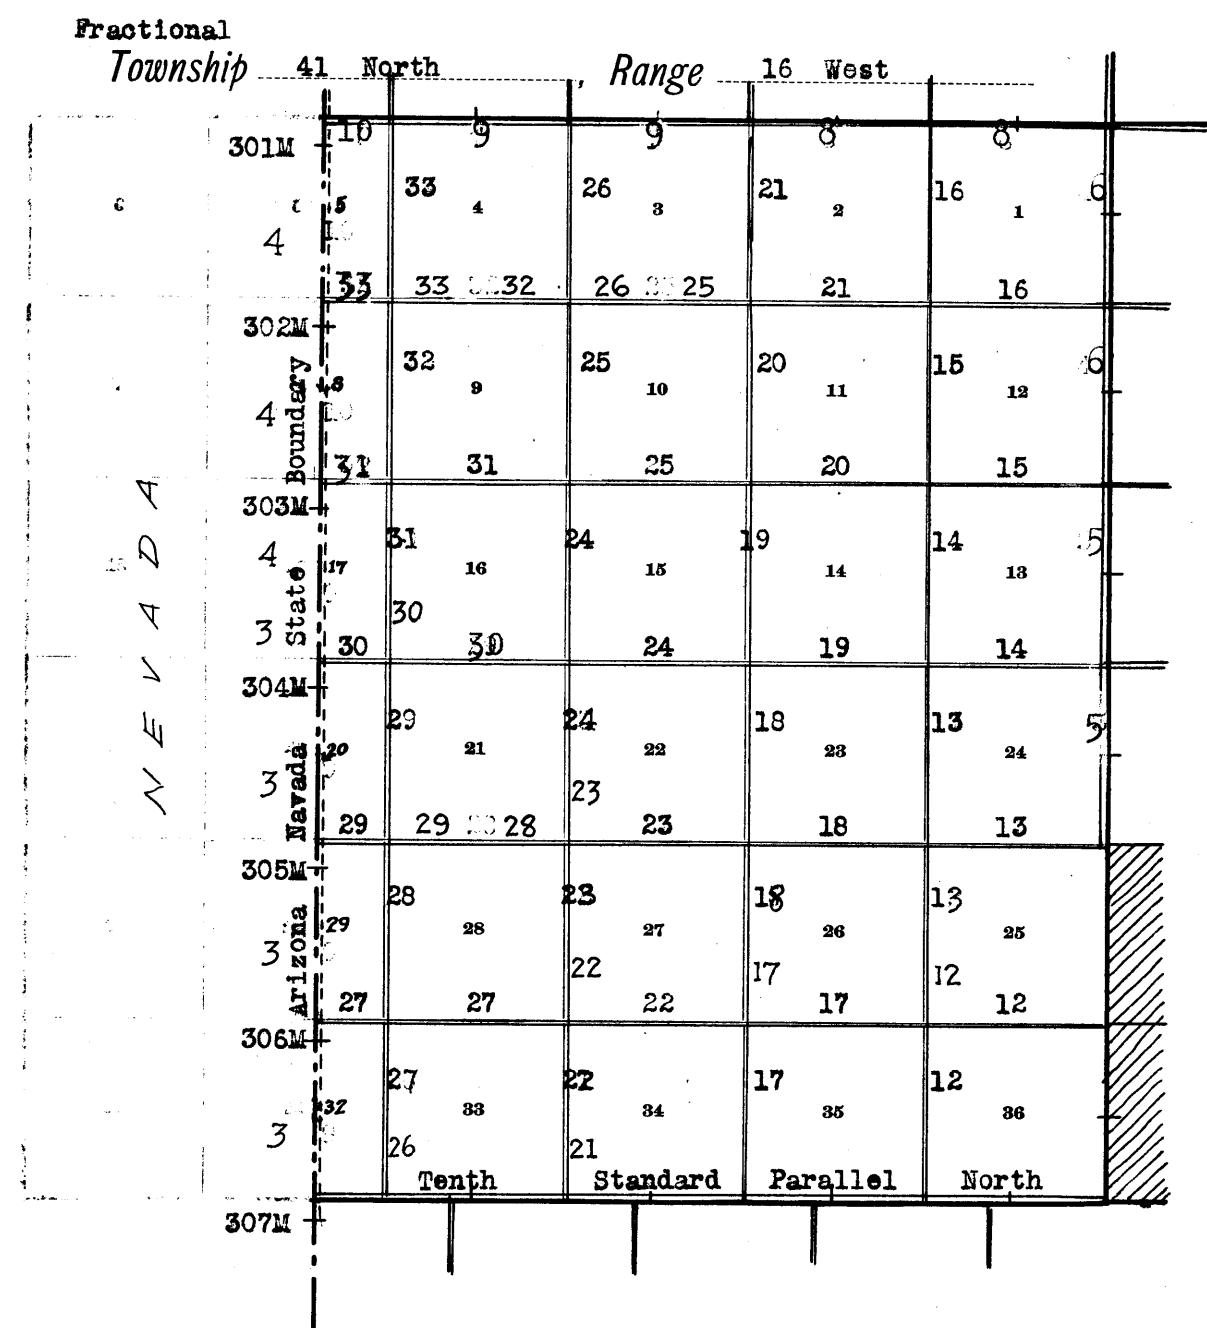

In the capacity of U. S. Surveyor~~s~~, under instructions dated September 29, 1920,  
 issued by the United States Surveyor General to govern surveys included in  
 Group No. 112, Arizona which were approved by the Commissioner of the General Land  
 Office, November 10, 1920, and Assignment Instructions dated December 15, 1920.

Retracement and Survey commenced January 12, 1921

Retracement and Survey completed January 25, 1921

black lines indicate surveys, and dotted black lines indicate retracements, executed by Joseph P. Davis, U.S.Cadastral Engineer, and red lines indicate surveys, and dotted red lines indicate retracements, executed by Claude F. Warner, U. S. Transitman, on dates shown thereon,  
and brown lines indicate accepted surveys.

Retracement and surveys hereinafter described executed by Joseph P. Davis, U. S. Cadastral Engineer and Claude F. Warner, U. S. Transitman, on dates shown on diagram on page 1 hereof, using respectively Buff light mountain transit No. 10125 and Young and Sons light mountain transit No. 8532. For description of instruments and certificate of approval, see Book "A".

Unless otherwise specified, all measurements are made with a Lufkin steel tape, 5 chs. in length, compared with a Chesterman standard steel tape and found correct. The measurements are made on the slope, the vertical angles determined and the slope measurements properly reduced to true horizontal distances.

We examine the adjustments of the transits and correct all errors; then, to test the solar apparatus, by comparing their indications, resulting from solar observations, made during a.m. and p.m. hours, with a meridian determined by observations on Polaris at elongation, we proceed as follows:

Jan. 9, 1921. At our camp, near the center of the NE.  $\frac{1}{4}$  of sec. 26, T. 40 N., R. 16 W., G. and S. R. B. and M. in lat.  $36^{\circ}50\frac{1}{2}'N.$ , long.  $113^{\circ}59'W.$ , using the meridian determined by observations on Polaris at elongation as described in Book "A", at 9 hrs. 0 m., a.m., l.m.t., we set off  $36^{\circ}50\frac{1}{2}'N.$  on the lat. arcs;  $22^{\circ}4'S.$  on the decl. arcs, and determine a meridian with each solar, which in each case agrees with the true meridian.

At apparent noon, with the lat. arcs unchanged, we observe the sun on the meridian with each solar; the resulting decl. with each instrument is  $22^{\circ}4'S.$ , which is the computed decl. of the sun.

At 3 hrs. 0 m., p.m., l.m.t., with the lat. arcs unchanged, we set off  $22^{\circ}2'S.$  on the decl. arcs and determine a meridian with each solar, which in each case agrees with the true meridian.

As all of the solar observations during the usual hours of solar work come within 1'30" of the true meridian, we conclude that the adjustments of the solars are satisfactory.

Completion of the survey of the  
east boundary of fractl. Township 41 North, Range 16 West. 5

Chains.

The south two miles of the east boundary of fractl. T. 41 N., R. 16 W. were surveyed in December, 1912, by Thomas B. Matthews, U.S. Surveyor, and no further retracement or resurvey of such portion of the line is of record.

The following notes describe the survey of the N. four miles of the line which completes the survey of said township boundary:

The original cor. of secs. 19, 24, 25 and 30, T. 41 N., R. 15 W., and fractl. T. 41 N., R. 16 W. is an iron post, 3 ins. in diam., projecting 12 ins. above ground, firmly set, properly marked on brass cap, and witnessed by pits NE., SE., SW. and NW., and mound of earth W. of cor. No bearing trees.

Thence, North, on true line, bet. secs. 19 and 24.

The continued satisfactory adjustment of the solar apparatus during the survey of this fractional township is indicated from field tests, as described in Book "C."

GENERAL DESCRIPTION.

The southern part of this fractional township consists of rolling, and gently rolling, sandy land, draining to the south, covered with a scant growth of yucca, greasewood and sage brush undergrowth. The northern part is rough and broken, being cut by Beaver Dam Wash, and its tributaries. Sullivan's Pump is located in the southeast quarter of sec. 2.

There are no settlers. The old Mormon emigrant trail from Salt Lake City, Utah to Los Angeles, California, crosses the northern part of the township.

There is no indication of valuable mineral.
