FIELD NOTES

OF THE RETRACEMENT OF

The Gila and Salt River Base Line, thru. part of Range 7 East, and

OF THE RESURVEY OF

The Gila and Salt River Base Line, thru. part of Range 7 East, and

The West Boundary of Township 1 North, Range 7 East, and

of the SURVEY OF

The East Boundary,

The North Boundary, and

The Subdivision Lines of

TOWNSHIP 1 NORTH, RANGE 7 EAST,

Of the Gila and Salt River Base and Meridian,

In the State of Arizona.

EXECUTED BY

Sidney E. Blout,

U.S. Cadastral Engineer,

In the capacity of U. S. Surveyor, under Special Instructions dated May 23, 1921,
issued by the United States Surveyor General to govern surveys included in Group
No. 116, Arizona, which were approved by the Commissioner of the General Land
Office, July 6, 1921, and Assignment Instructions dated Nov. 21, 1921.

Retracement,
Resurvey & Survey commenced November 15, 1921.

Retracement,
Resurvey & Survey completed December 5, 1921.

GILA & SALT RIVER BASE LINE

RETRACED - RESURV. - RETRACED -

Lines Retraced, Resurveyed or Surveyed on dates shown on above diagram by Sidney E. Blout, U.S. Cadastral Engineer.

Retracement, resurveys, and surveys, hereinafter described executed on dates shown on diagram on page 1 hereof, by Sidney E Blout, U.S.Cadastral Engineer, using A.Lietz transit No.6166 equipped with improved Smith solar attachment. The horizontal limb is provided with two double verniers, placed opposite to each other, reading to single minutes of arc, which is also the least count of the verniers of the latitude and declination arcs.

The instrument was examined, tested on the meridian at the Federal Building at Phoenix Arizona November 8, 1921, found correct and was approved by the Assistant Supervisor of Surveys, for Arizona and California, conditional upon satisfactory field tests.

TEST OF INSTRUMENT

November 14, 1921; examine the adjustments of the transit and correct the level and collimation errors, then to test the solar apparatus by comparing its indications, resulting from solar observations, made during a.m., and p.m. hours with a meridian established by observations on Polaris; proceed as follows;

In camp, near the cor. of secs. 13, 18, 19, and 24 on W.bdy. of T1N., R7E. latitude $33^{\circ}25'11''$ N., and longitude $111^{\circ}41'03''$ W. at $4^{\text{h}}00^{\text{m}}$ p.m. app.time; set off $33^{\circ}25'11''$ N. on the lat. arc, $18^{\circ}15'11''$ S. on the decl. arc and determine a meridian with the solar and mark a point thereof on a stake driven firmly in the ground 5-chs. N.

At the same station at $7^{\text{h}}01^{\text{m}}$ p.m. by my watch which I set by Western Union clock to read correct local mean time; observe Polaris on the hour angle, making two observations, one each with telescope in direct and reversed positions. and mark the mean point in the line thus determined by a tack driven in a stake set firmly in the ground 5-chs. N.

November 15; At $7^{\text{h}}30^{\text{m}}$ a.m.; lay off the azimuth of Polaris $0^{\circ}56'47''$ to the west and mark the meridian thus determined by a tack driven in the stake already set 5-chs. N. on which the meridian falls $01'E.$ of the mark determined by the solar.

At $8^{\text{h}}00^{\text{m}}$ a.m. app.time with the latitudē arc unchanged; set off $18^{\circ}25'S.$ on the decl. arc and determine a meridian with the solar and mark a point thereof on the stake already set 5-chs. N. This mark falls $01'E.$ of the meridian established by the Polaris observations.

The solar apparatus by a.m. and p.m. observations, defines positions for meridians which agree within one minute with the meridian established by the Polaris observation; therefore conclude that the adjustments of the instrument are satisfactory.

The magnetic bearing of the true meridian at 8 a.m. is N $14^{\circ}26'W.$

All measurements are made with a Lufkin 5-chain steel tape compared with a Chesterman standard steel tape and found correct. The measurements are made on the slope, the vertical angles determined, and the slope measurements properly reduced to true horizontal distances.

Resurvey of West bdy. of Township 1 North Range 7 East.

3

Chains.

The Range line bet. Ts. 1 N., Rs. 6 and 7 E. was surveyed in 1868 by George P. Ingalls, U.S.D.S., and no retracement or resurvey of said line is of record.

Retracement for Resurvey.

- From the standard corner of Ts.1 N., Rs.6 and 7 E., on the G. & S.R. Base Line, hereinafter described, North, on random line, searching diligently at record intervals for the original corners. Fail to find trace of any old corner; until at
 161.03 Fall 164 lks.W. of remains of original corner of secs.19, 24, 25 and 30, hereinafter described. True course and dist. of Range Line to this cor. are therefore N. $0^{\circ}35' E.$, 161.04 chs., which, to maintain the original proportion between corner intervals gives four intervals of 40.26 chs. each for the reestablishment of the corners.
- Thence, North, on random line, bet. secs.19 and 24.
 40.00 Diligent search in this vicinity fails, to reveal any trace of the original $\frac{1}{4}$ sec.cor.
- 79.04 Fall 28 lks.W. of the recognized point of original location of the cor.of secs.13,18,19 and 24, hereinafter described. True course and dist. of Range line, bet. secs.19 and 24 are therefore N. $0^{\circ}12' E.$, 79.04 chs.
- Thence, North, on random line, searching diligently at record intervals for the original cors. Fail to find any trace of any old cor., and at
 239.27 Fall 223 lks.W. of the cor. of Ts.1 and 2 N., Rs.6 and 7 E., hereinafter described. True course and dist. of the N. $\frac{1}{2}$ of the Range line are therefore N. $0^{\circ}32' E.$, 239.28 chs., which, to maintain the original proportion between corner intervals gives six intervals of 39.88 chs. each for the reestablishment of the corners.

RESURVEY.

After retracing the G. & S.R. Base Line thru Range 7 East, it becomes evident that closing corners will be required on this range line for the subdivision lines of the West range of secs: in T.1 N., R.7 E.; therefore, in the resurvey of the range line described as follows, the corners which are reestablished at proportional intervals refer to the areas W. of the line only. The $\frac{1}{4}$ sec.cors.referring to areas E. of the line are set at the midpoints between closing cors. with the exception of secs.6 and 31, where they are set at 40.00 chs.in northing and southing, respectively, from the closing cors.

In the following notes, the divisions of the range line are designated as East boundaries of secs. in T.1 N., R:6 E.

The standard cor. of Ts.1 N., Rs.6 and 7 E., on the G. & S.R. Base Line, reestablished by F.W.Rodolf, U.S.S. in 1911, is an iron post, 3 ins.in diam.; projecting 12 ins. above ground, firmly set, properly marked on brass cap, and witnessed by three pits, one each E.W and N.

Resurvey of West bdy. of Township 1 North, Range 7 East.

1921

No trees suitable for bearing trees within limits. Destroy old mound of stone W. of cor., and raise a mound of stone 2 ft. base, $1\frac{1}{2}$ ft. high, S. of cor.

Land, nearly level.

Soil, stony clay loam; 8 ins. deep, 2nd and 3rd rate.

Timber, scattering pale verde, mesquite and ironwood.

Undergrowth, scattering greasewood, scrub mesquite and cactus.

Fair grass.

10 Retracement of the Gila and Salt River Base Line, thru part of R. 7 E.
Chains.

- The Gila and Salt River Base Line, th. Range 7 East, was surveyed by W. F. Ingalls, U.S.D.S. in 1868, and resurveyed by F.W.Rodolf, U.S.S. in 1911. No other retracements or resurveys of the line in this range are of record. The closing cor.s of the lines from the S. were established by W. F. Ingalls, U.S.D.S. in 1868, and all of them were reestablished by F.W.Rodolf, U.S.S. in 1911.
- From the standard cor. of Ts. 1 N., Rs. 6 and 7 E., hereinbefore described,
S.89°40'E., on a random line, on S. bdy. of sec.31 (W. $\frac{1}{2}$). Over level land, sloping slightly to the SW., thru. scattering timber and undergrowth.
- 1.45 Long distance telephone line brs. N.62 $\frac{3}{4}$ °W. and S.62 $\frac{3}{4}$ °E. Extends northwesterly to Mesa and southeasterly to Florence.
- 40.24 Fall 5 lks.N. of the previously reestablished standard $\frac{1}{2}$ sec.cor. of sec.31, which is an iron post, 1 in. in diam., projecting 14 ins. above ground, firmly set, properly marked on brass cap, and witnessed by two pits, one each E. and W. of post, 3 ft. dist., and a mound of earth N. of cor. No bearing trees.
True course and dist. of W. $\frac{1}{2}$ of S. bdy. of sec.31 are therefore S.89°36'E., 40.24 chs.
Thence,
S.89°40'E., on a random line on S. bdy. of sec.31, (E. $\frac{1}{2}$). Over level land, sloping slightly to the SW., thru. scattering timber and undergrowth.
- 11.86 Road brs. N.10°W. and S.10°E.
- 24.22 Fall 4 lks.S. of the previously reestablished closing cor. of secs.5 and 6, T.1 S., R.7 E., which is an iron post 1 in. in diam., projecting 14 ins. above ground, firmly set, properly marked on brass cap, and witnessed by three pits, one each E., W. and S. of cor., and mound of earth S. of cor. No bearing trees.
- 40.30 Fall 7 lks.S. of the previously reestablished std.cor. of secs.31 and 32, which is an iron post, 3 ins. in diam., projecting 12 ins. above ground, firmly set, properly marked on brass cap, and witnessed by three pits, one each E., W. and N. of cor., and a mound of earth N. of cor.
No bearing trees.
True course and dist. of E. $\frac{1}{2}$ of S. bdy. of sec.31 are therefore S.89°46'E., 40.30 chs.
Land, level.
Soil, sandy, 1st rate.
Timber, scattering mesquite and Palo verde.
Undergrowth, scattering greasewood and scrub mesquite.
Fair grass.
-
- The previously reestablished standard cor. of secs. 32 and 33, which is an iron post, 3 ins. in diam., projecting 12 ins. above ground, firmly set, properly marked on brass cap, and witnessed by three pits, one each E., W. and N. of cor., and mound of earth N. of cor.
No bearing trees.
Thence,
S.89°40'E., on a random line, on S. bdy. of sec.33 (W. $\frac{1}{2}$). Over level land, sloping slightly to the SW., thru. scattering timber and undergrowth.
- 40.15 Fall 1 lk. N. of the previously reestablished standard $\frac{1}{2}$ sec.cor. of sec.33, which is an iron post 1 in. in diam., projecting 14 ins. above ground, firmly set, properly marked on brass cap, and witnessed by two pits, one each E. and W. of cor., and mound of earth, N. of cor. No bearing trees.
True course and dist. of W. $\frac{1}{2}$ of S. bdy. of sec.33 are

Retracement of the G. & S. R. Base Line thru part of Range 7 East 11

Chains.	
	therefore S.89°39'E., 40.15 chs.
	Thence, S.89°40'E., on a random line on S.bdy.of sec.33 (E. $\frac{1}{2}$). Over level land, sloping slightly to the SW., thru scattering timber and undergrowth.
24.29	Fall 3 lks.S. of the previously reestablished closing cor. of secs.3 and 4, T.1 S., R.7 E., which is an iron post, 1 in. in diam., projecting 14 ins. above ground, firmly set, properly marked on brass cap, and witnessed by three pits, one each E., W. and S. of post, and mound of earth, S. of cor. No bearing trees.
40.19	Fall 6 lks.S. of the previously reestablished standard cor. of secs.33 and 34, which is an iron post, 3 ins. in diam., projecting 12 ins. above ground, firmly set, properly marked on brass cap, and witnessed by three pits, one each E., W. and N. of post, and mound of earth N. of cor. No bearing trees. True course and dist. of E. $\frac{1}{2}$ of S. bdy. of sec.33 are therefore S.89°45'E., 40.19 chs. Land, level. Soil, sandy, 1st and 2nd rate. Timber, scattering mesquite and palo verde. Undergrowth, scattering greasewood and scrub mesquite. Fair grass.
	S.89°40'E., on a random line, on S. bdy. of sec.34 (W. $\frac{1}{2}$). Over level land, sloping slightly to the SW., thru scattering timber and undergrowth.
40.19	Fall 2 lks.N. of the previously reestablished standard $\frac{1}{4}$ sec.cor. of sec.34, which is an iron post, 1 in. in diam., projecting 14 ins. above ground, firmly set, properly marked on brass cap, and witnessed by two pits, one each E. and W. of post, and a mound of earth N. of cor. No bearing trees. True course and dist. of W. $\frac{1}{2}$ of S. bdy. of sec.34 are therefore S.89°38'E., 40.19 chs. Thence, S.89°40'E., on a random line on S. bdy. of sec.34 (E. $\frac{1}{2}$). Over level land, sloping slightly to the SW., thru scattering timber and undergrowth.
23.90	Fall 2 lks.N. of the properly reestablished closing cor. of secs. 2 and 3 of T.1 S., R.7 E., which is an iron post, 2 ins. in diam., projecting 8 ins. above ground, firmly set, properly marked on brass cap, and witnessed by three pits, one each, E., W. and S. of post, and a mound of earth, S. of cor. No bearing trees.
40.20	Fall 2 lks.N. of the previously reestablished standard cor. of secs.34 and 35, which is an iron post 3 ins. in diam., projecting 10 ins. above ground, firmly set, properly marked on brass cap, and witnessed by three pits, one each E., W. and N. of post, and a mound of earth N. of cor. No bearing trees. True course and dist. of E. $\frac{1}{2}$ of S. bdy. of sec.34 are therefore S.89°38'E., 40.20 chs. Land, level. Soil, sandy, 1st rate. Timber, scattering mesquite and palo verde. Undergrowth, scattering greasewood and scrub mesquite. Fair grass.
	S.89°40'E., on a random line, on S.bdy. of sec.35 (W. $\frac{1}{2}$). Over level land, sloping slightly to the SW., thru scattering timber and undergrowth.
40.16	Fall 2 lks.N. of the previously reestablished standard $\frac{1}{4}$ sec.cor. of sec.35, which is an iron post 1 in. in

Survey of Subdivision lines of Township 1 North, Range 7 East. 23

Chains.

Preliminary to the survey of Subdivision lines of this township, survey a Sectional Correction line from the cor. of secs. 25, 30, 31 and 36 on East boundary of the Tp., West 481.46 chs. to intersection with W. bdy. of Tp. setting temp. $\frac{1}{4}$ sec. and sec.cors. alternately at intervals of 40.00 chs. thereon. The position of the permanent sec.cors. on the Sectional Correction line being determined by the points of intersection therewith of the meridional section lines alined in the normal manner, and the permanent $\frac{1}{4}$ sec.cors. on said line being established at midpoints bet. secs.cors. except the $\frac{1}{4}$ sec.cor. of secs. 30 and 31, which is placed 40.00 chs. from the east.

The bearings of the meridional sec. lines N. of the Sectional Correction line are determined by computation to theoretical intersections with the sec.cors.on the N. bdy. of the Tp., and the errors in actual survey adjusted in the North tier of secs. in the normal manner.

From the previously reestablished standard cor. of secs. 35 and 36 on S. bdy.of Tp. (G.& S.R. Base Line) herein-before described,

N.0°01'W., bet. secs. 35 and 36.

Over level land, sloping slightly to the SW., thru.scattering timber and undergrowth.

39.52 (40.00 chs. S.0°01'E. from intersection with Sectional Correction line), Set an iron post 3 ft.long, 1 in. in diam., 26 ins.in the ground for $\frac{1}{4}$ sec.cor., marked on brass cap,

58

Township 1 North, Range 7 East.

GENERAL DESCRIPTION.

This south half of this township, with the exception of a small detached ridge in secs. 20 and 21 has a level surface, with a sandy and gravelly soil, 1st and 2nd rate.

The north half with the exception of a few scattered hills and buttes has a nearly level and gently rolling surface, and the soil varies from sandy, 2nd rate to rocky, 4th rate.

There is a scattering growth of palo verde, mesquite and ironwood timber in nearly all parts, a scattering undergrowth of greasewood, scrub palo verde, mesquite and cactus, and a fair growth of grass.

The drainage of the entire township is to the SW., thru. numerous small washes.

There is no permanent running water, the only water supply in the township being a well in sec. 30.

There is no indication of valuable mineral deposits.

Settlers are located in secs. 19, 21, 29, 30 and 31,

The improvements consist of two houses in sec. 19, one in sec. 21, one in sec. 29, three in sec. 30, and one in sec. 31, a fenced field in sec. 29, a high power electric transmission line from Roosevelt Dam to Phoenix, passing NE. and SW., thru. the central part, a long distance telephone line from Mesa to Roosevelt, parallel to and alongside the power line, and a long distance telephone line from Mesa to Florence passing NW. and SE. thru. sec. 31, near the SW. cor. of the Tp.

The Apache Trail, Auto Highway passing easterly and westerly thru. the central part is the principal road, and the only improved one, but many other roads traverse the township in various directions, and give access to all sections.

CERTIFICATE OF UNITED STATES CADASTRAL
ENGINEER.

ECK 60
3510

I, Sidney E. Blout, U.S.Cadastral Engineer,, hereby certify upon honor that, in pursuance of special instructions received from the U. S. Surveyor General, for Group 116, Arizona, bearing date of the 23rd day of May, 1921, I have well, faithfully, and truly in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instructions, and the laws of the United States, retraced all those parts or portions of the Gila and Salt River Base Line in Range 7 East; and resurveyed all those parts or portions of the Gila and Salt River Base Line in Range 7 East, and the West Bdy. of Township 1 North, Range 7 East; and surveyed all those parts or portions of the East and North Bdrs., and the Subdivisions lines of TOWNSHIP 1 NORTH, RANGE 7 EAST.

of the Gila and Salt River.

Base and Meridian, in the State of Arizona, which are represented in and by diagram on page 1 hereof the foregoing field notes as having been executed by me, and under my direction; and that all the corners of said retracement, resurvey & survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the U. S. Surveyor General, for Group 116, Arizona, and in the specific manner described in the field notes, and that the foregoing are the original field notes of such retracement, resurvey and survey.

Place: Phoenix, Arizona

Sidney E. Blout
U.S. Cadastral Engineer.

Date: October 16 1923

APPROVAL.

OFFICE OF THE UNITED STATES SURVEYOR GENERAL,

Phoenix, Arizona. November 2, 1923.

The foregoing field notes of the retracement of The Gila and Salt River Base Line, thru part of Range 7 East, and of the Resurvey of The Gila and Salt River Base Line, thru part of Range 7 East, and the West bdy. of Township 1 North, Range 7 East, and of the Survey of the East and North Bdrs., and the Subdivision lines of TOWNSHIP 1 NORTH, RANGE 7 EAST.

of the Gila and Salt River Base and Meridian, in the State of Arizona,

executed by Sidney E. Blout, U. S. Cadastral Engineer,

under his special instructions dated May 23, 1921, for Group 116, Arizona,, having been critically examined, and the necessary corrections and explanations made, the said field notes, and the retracements, resurveys and surveys they describe, are hereby approved.

Frank P. Frazee

U. S. Surveyor General.

I certify that the foregoing transcript of the field notes of the above described survey in

, has been correctly copied from the original notes on file in this office.

U. S. Surveyor General
