# FIELD NOTES

RE-  
OF THE SURVEY OF THE

First Standard Parallel South, thru Range 26 East, and

Survey of the  
West boundary,

Part of the North boundary, and

Part of Subdivision lines of

TOWNSHIP 5 SOUTH, RANGE 26 EAST,

Of the Gila and Salt River Base and Meridian,

In the State of Arizona.

## EXECUTED BY

William H. Thorn, U.S. Cadastral Engineer,

and

Benjamin J. Kinsey, U.S. Transitman,

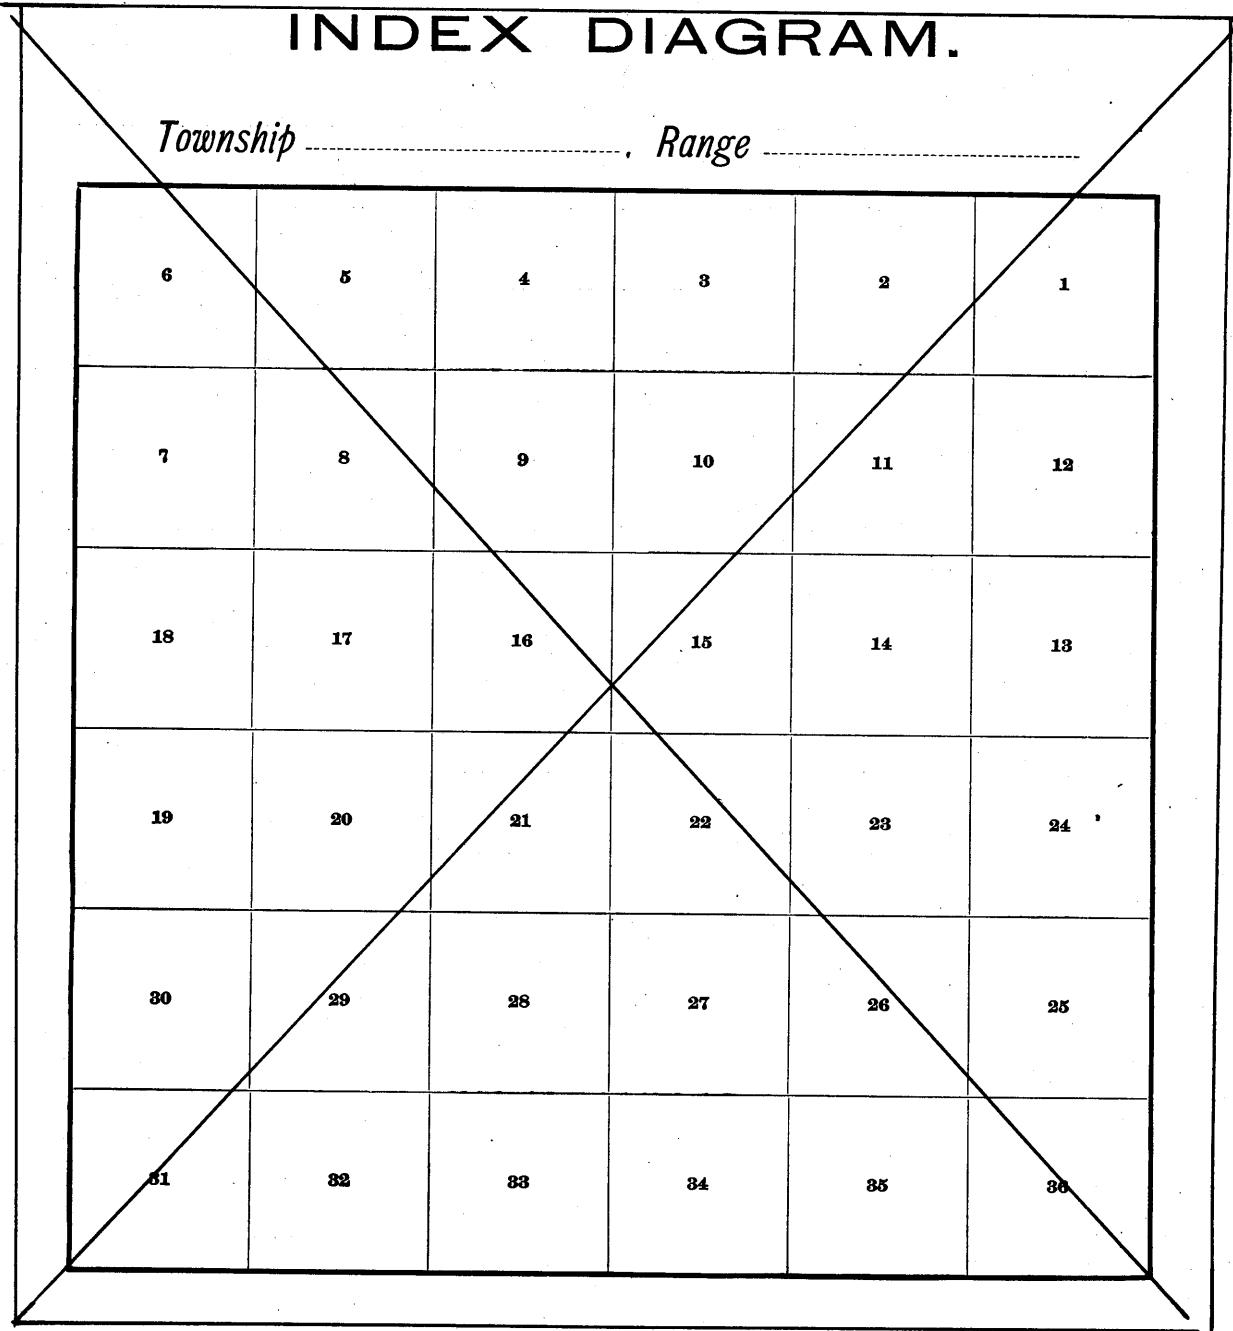

In the capacity of U. S. Surveyors, under Special Instructions dated August 24, 1920,  
issued by the United States Surveyor General to govern surveys included in Group  
No. 111, which were approved by the Commissioner of the General Land  
Office, December 18, 1920, and Assignment Instructions dated Nov. 17, 1920

Resurvey and Survey commenced November 30, 1920.

Resurvey and Survey completed January 8, 1921.

Township 5 South, Range 26 East

First Standard Parallel South

Solid red lines on above diagram indicate surveys executed by William H. Thorn, U.S. Cadastral Engineer on dates shown thereon.

Dotted red lines on above diagram indicate resurveys executed by William H. Thorn, U.S. Cadastral Engineer on dates shown thereon.

Solid black lines on above diagram indicate surveys executed by Benjamin J. Kinsey, U.S. Transitman, on dates shown thereon.

Chains.

Resurveys and surveys hereinafter described, executed on dates shown on diagram on page 2 hereof, by William H. Thorn, U.S. Cadastral Engineer, and Benjamin J. Kinsey, U.S. Transitman, using respectively, Young and Sons transits Nos. 8592 and 8477. Each instrument is equipped with full vertical circle, and the Smith solar attachment; unless otherwise specified, all azimuth determinations are accomplished with the solar attachments.

-----  
Nov. 27, 1920. We examine the adjustments of each instrument, and correct all errors; then, to test the solar apparatus by comparing its indications from observations made during a.m. and p.m. hours with a meridian established by Polaris observation, proceed with each instrument as follows:

At the town of Safford, Arizona, near center of sec. 8, T. 7 S.; R. 26 E., Gila and Salt River Base and Meridian, Arizona, in latitude  $32^{\circ}50'40''$  N., longitude,  $109^{\circ}42'W$ . at 3h.10.5m.p.m., l.m.t., observe Polaris at eastern elongation, making of four observations, two each with the telescope in direct and reversed positions, and mark the mean point in the line thus determined on a stake driven firmly in the ground 5 chs. N.

Azimuth of Polaris at eastern elongation =  $1^{\circ}19'34''$ .

Nov. 28, 1920. Lay off the azimuth of Polaris  $1^{\circ}19\frac{1}{2}'$  to the west, and take for reference point a pine tree on mountain about 15 miles distant, which brs. N.  $0^{\circ}02'W$ .

At 9h.00m. a.m., l.m.t., set off  $32^{\circ}50\frac{1}{2}'N$ . on the lat.arc;  $21\frac{1}{2}18\frac{1}{2}'S.$  on the decl.arc, and determine a meridian with the solar, which agrees with the true meridian.

At app. noon, with the lat.arc unchanged, observe the sun on the meridian, the resulting reading of the decl.arc is  $21^{\circ}20\frac{1}{2}'S.$ , which agrees with the computed decl. of the sun.

At 3h.00m.p.m., l.m.t. with the lat.arc unchanged, set off  $21^{\circ}21\frac{1}{2}'S.$  on the decl.arc, and determine the meridian with the solar, which agrees with the true meridian.

As all the solar observations made with both instruments during the usual hours of solar work come within  $1'30''$  of the true meridian, we conclude that the adjustment of the instruments is satisfactory.

All measurements are made with Lufkin steel tapes, 5 chs. in length compared with the Chesterman standard steel tape, and found correct. The measurements are made on the slope, vertical angles determined with clinometer and the slope measurements properly reduced to the true horizontal distances.

## BOOK 3581

## 1 Resurvey of 1st Standard Parallel South, thru. Range 26 East.

Chains.

The 1st Standard Parallel South, thru. Range 26 East was surveyed in 1895 by Philip Contzen, compassman for Alfred L. Trippel, U.S. Deputy Surveyor. In 1917, the S. bdy. of sec. 36 was retraced and the standard cor. of Ts. 5 S., Rs. 26 and 27 E. was reestablished by proportional measurement. No other retracements are of record.

Retracement for Resurvey.

- From the reestablished standard cor. of Ts. 5 S., Rs. 26 and 27 E., N.  $39^{\circ}45'W.$ , on a random line on S. bdy. of sec. 36.

 Thence from cor.,  
 West, on a random line, on S. bdy. of sec. 31 ( $W.\frac{1}{2}$ ).  
 40.52 Fall 10 lks. S. of the original std. cor. of Ts. 5 S., Rs. 25 and 26 E.

Resurvey of the 1st Std. Par. South, thru. Range 26 East. 5

Chains.

Resurvey:

The standard cor. of Ts. 5 S., Rs. 26 and 27 E., reestablished by William B. Kimmel, U.S. Gadastral Engineer in 1917, is an iron post, 3 ins. in diam., projecting 8 ins. above ground, firmly set, properly marked on brass cap, and witnessed by a mound of stone N. of cor., and one properly marked bearing tree, a cedar, 18 ins. in diam., N. 26° E., 165 lks. dist.

Thence, N. 89° 45' W., on a true line, on S. bdy. of sec. 36. Over mountainous land, thru. scattering timber and undergrowth.

Ascend 39 ft., over E. slope.

7.00 Descend 15 ft. over NW. slope.

13.60 Rocky gulch, course NE.

Ascend 515 ft., over rocky NE. slope.

26.20 Top of Casimiro Mountain, brs. SW. and NW. Highest point in same, brs. NW. 2 chs. dist.

Descend 375 ft., over W. slope, to

37.00 The original closing cor. of Ts. 6 S., Rs. 26 and 27 E., which is a mound of stone.

Alongside of same, set an iron post, 3 ft. long, 2 ins. in diam., on bed rock, supported in a mound of stone, for reestablished closing cor., marked on brass cap,

T5S R26E

S 1 S 6

R26 E R27 E

T6S

C C

1920

and raise a mound of stone 3 ft. base, 2 ft. high, S. of cor.

40.05 Descend 171 ft., over W. slope, to

(Midway bet. the SE. and SW. cors. of sec. 36),

Set an iron post, 3 ft. long, 1 in. in diam., on bedrock, supported in a mound of stone, for reestablished standard  $\frac{1}{4}$  sec. cor., marked on brass cap,

S C

S 36

1920

and raise a mound of stone 3 ft. base, 2 ft. high, N. of cor.

41.00 Descend 27 ft., over W. slope, to

The original standard  $\frac{1}{4}$  sec. cor. of sec. 36, which is a stone, 20x8x6 ins. above ground, marked WC  $\frac{1}{4}$  SC on N. face, and witnessed by a mound of stone, 3 ft. base, 2 ft. high, N. of cor.

Deface old marks, and mark "AP."

Thence,

N. 89° 47' W., on a true line on S. bdy. of sec. 36, continuing measurement.

Descend 520 ft., over W. slope, to

Gulch, course SW.

Descend 490 ft., over SW. slope, to

80.11 The original standard cor. of secs. 35 and 36, which is a granite stone 10x8x4 ins. above ground, firmly set, marked with 1 notch on E., 5 notches on W., SC on N. face, and witnessed by a mound of stone, 3 ft. base, 1 $\frac{1}{2}$  ft. high, N. of cor.

Land, mountainous.

Soil, rocky 4th rate.

Timber, scattering small cedar.

Undergrowth, scattering scrub oak, scrub cedar, catclaw, scrub mesquite and cacti.

## BOOK 3581

46 Part of Subdivision lines of Township 5 South, Range 26 East.

Chains.	Ascend 42 ft., over SW. slope. 43.23 Point of spur, slopes W. Descend 102 ft., over N. slope. 47.95 Gulch, course W. 58.89 Ascend 353 ft., over SW. slope, to Beyond this point, the sec.line passes over cliffs facing SW., which are too steep and broken to allow accurate chaining; therefore, triangulate as described as fol- lows, and as shown on the diagram hereon:
	From 58.89 ch.station, indicated on diagram at "A," line in a flag "B," at top of cliffs, N.0°2'W. from "A." From "B" measure a Base, S.55°32'E., 5.23 chs. to point "C." Bearing "C-A" = S.16°18'W. Vertical angle from "A" to "B" is . + 20°. Included angles of triangle "A-B-C" are 16°20', 55°30' and 108°10' the sum of which is 180°00'.  Triangulated measurement of "A-B" is obtained by sine 108°10' x Base or .95015 x 5.23 = 17.67 chs., which sine 16°20' .28123 added to 58.89 chs. gives 76.56 chs. N.0°2'W. from cor. of secs. 4, 5, 8 and 9, for the position of triangulation point "B." 76.56 Triangulation point at top of cliffs, bearing NW. and SE. facing SW., 425 ft. above 58.89 ch.station. Continue line and measurement by chaining. Ascend slightly over SW. slope, to 77.30 Main ridge of the Gila Mountains, btrs. NW. and SE. Intersect the South bdy. of the White Mountain Indian Res- ervation at a point 5.73 chs. N.55½°W. from the 60½ mile mon., which is an iron post 1 in. in diam., pro- jecting 33 ins. above ground, firmly set in ground and mound of stone, properly marked on brass cap, and wit- nessed by mound of stone N.E. of post, and one properly marked bearing tree. A juniper, N.80½°E., 161 lks. dist. At point of intersection, set an iron post, 3 ft. long, 2 ins. in diam., on bed rock, supported in a mound of stone, for closing cor. of secs. 4 and 5, marked on brass cap.
	Raise a mound of stone 3 ft. base, 2 ft. high, S. of cor. Land, mountainous. Soil, rocky, 4th rate. Timber, scattering cedar of small size. Undergrowth, dense greasewood, scrub mesquite and scrub cedar.
2.30	From the reestablished standard cor. of secs. 31 and 32, on S. bdy. of Tp.. (1st Std. Par. S.), hereinbefore described, N.0°03'W., bet. secs. 31 and 32. Over rolling land, thru. dense undergrowth. Descend 15 ft., over NW.slope. Wash, 10 lks. wide, course SW. Ascend 250 ft., over SE.slope.
32.00	Spur, slopes SW.

GENERAL DESCRIPTION.

This township is situated in Graham County, Arizona, about eight miles north from Safford, the county seat. The White Mountain Indian Reservation invades the northern part of the township. The surface is mountainous, and lies on the southern slope of the Gila Mountains, the main ridge of which forms the south boundary of the Indian Reservation, and passes thru. the northern part of the Tp. In the extreme southwestern part, there is some rolling surface. The soil is mostly rocky, 4th rate.

Some scattered portions have a rocky, 3rd rate soil. About half of the township is devoid of timber, and the remainder has a scattering growth of pine, cedar and oak of small size. In the vicinity of some of the springs, and along some of the washes is a scattering growth of cottonwoods. The most of the surface is covered with a dense undergrowth of greasewood, scrub oak, cedar and mesquite, catclaw, buckbrush, manzanita and cacti.

There are no water courses carrying a permanent flow of water, but there are numerous permanent springs in various parts of the township.

There are valuable mineral deposits, as evidenced by

a group of patented mining claims in secs. 34 and 35, and a number of prospect holes and shafts in the south-eastern part.

There is one settler, Watson, in N. $\frac{1}{2}$  of sec. 25, near Bear Spring. The improvements consist of a reservoir in sec. 5, known as Big Springs Reservoir; two corrals, one in sec. 8, and one in sec. 25; two houses, one in sec. 25, and one in sec. 26; a water pipe line from spring in sec. 26 extending southwesterly to tank on S. bdy. of sec. 35, and range fences in the northwestern and south-eastern part of the township.

A road from the Big Springs Reservoir in sec. 5 extends southwesterly to Pima. Another road from Watson's ranch in sec. 25 extends southerly to Safford.

A number of old roads in poor condition traverse the southern part of the township.

The grazing value of the land is fair.

## **FIELD ASSISTANTS.** to
