FIELD NOTES

OF THE RESURVEY OF THE

East boundary of Township 14 North, Range 1 East, and

South boundary of Township 14 North, Range 2 East,

and of the Survey of the

East boundary.

North boundary, and

Subdivision lines of

TOWNSHIP 14 NORTH, RANGE 2 EAST,

Of the Gila and Salt River Base and Meridian,

In the State of Arizona.

EXECUTED BY

Benjamin J. Kinsey, U.S.T., and

Ty White, U. S. T.

In the capacity of U. S. Surveyor-s, under Special Instructions dated May 26, 1922,
issued by the United States Surveyor General to govern surveys included in Group
No. 120, Arizona, which were approved by the Commissioner of the General Land
Office, June 23, 1922, and Assignment Instructions dated May 26, 1923.

Resurvey and Survey commenced June 7, 1923.

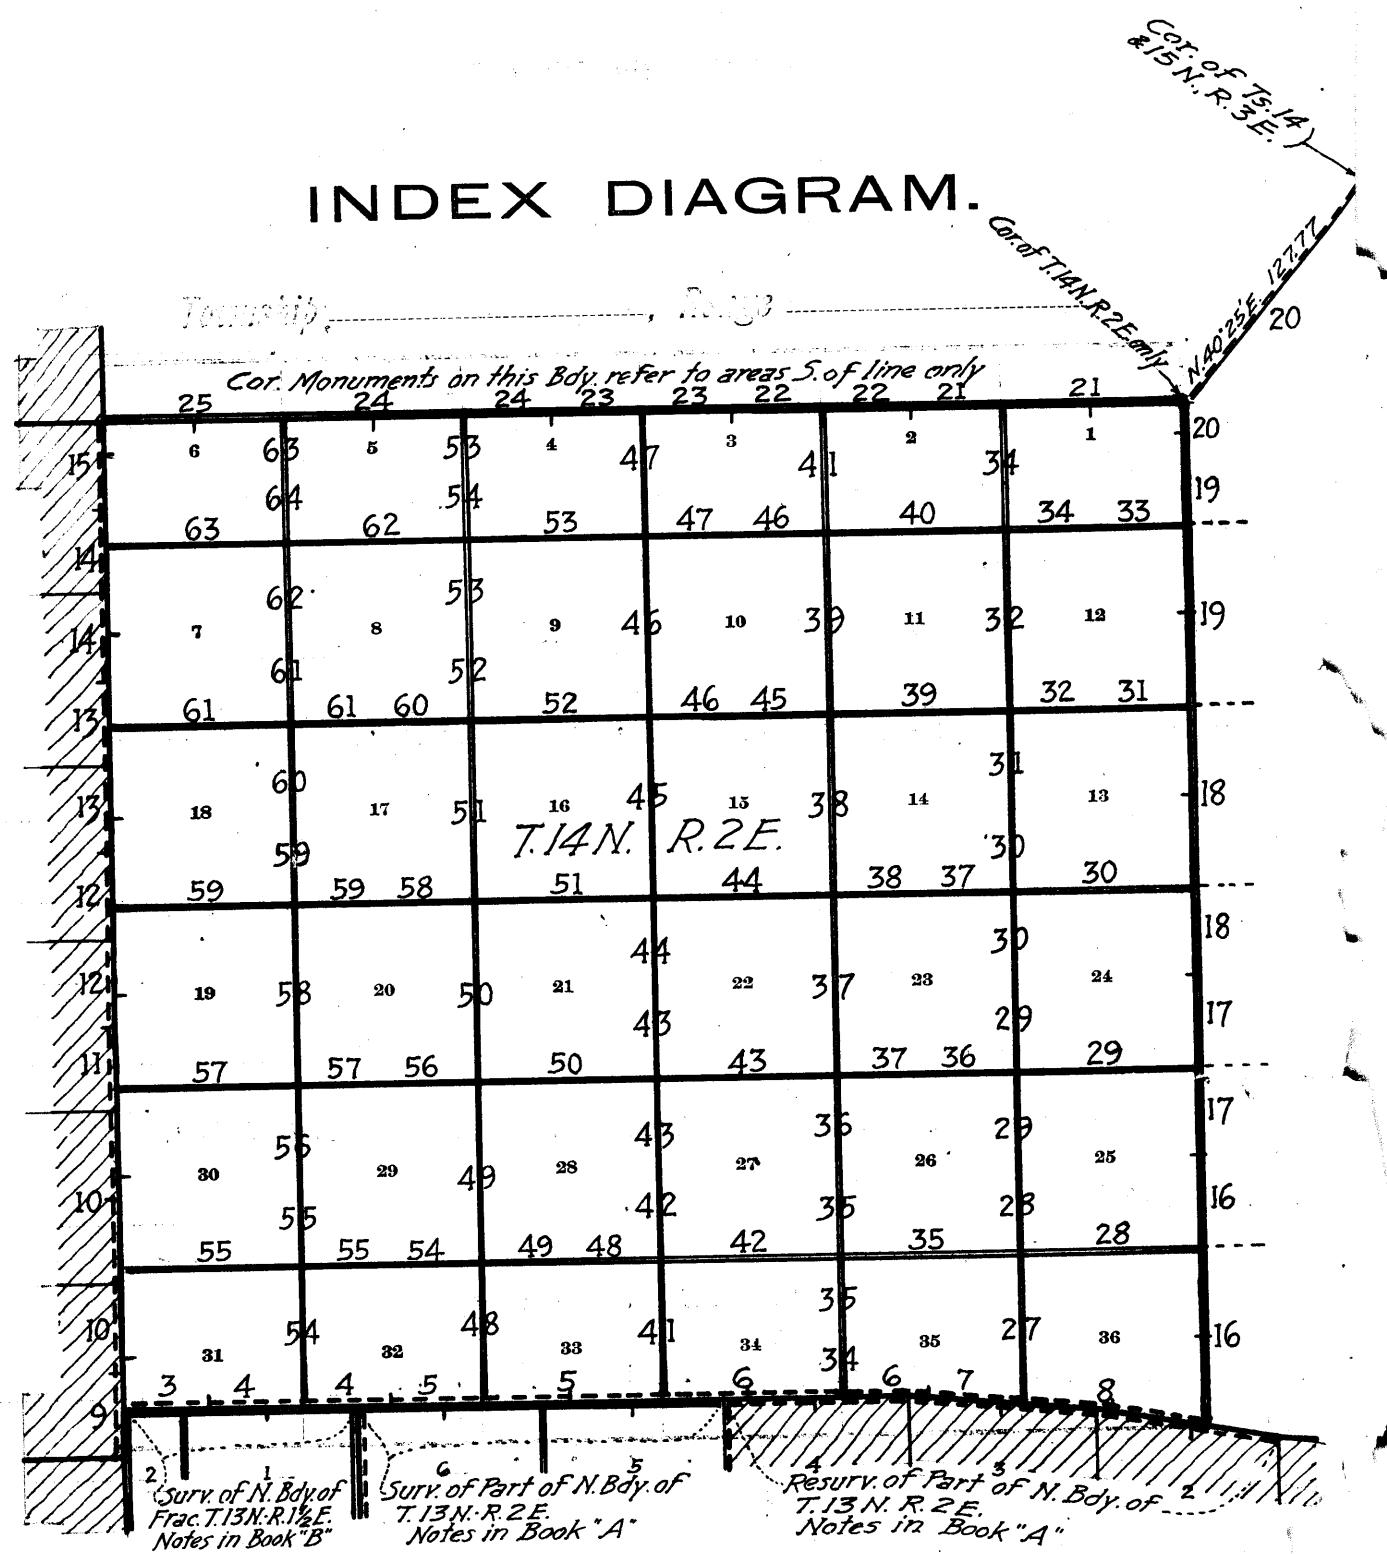

Resurvey and Survey completed Aug. 4, 1923.

- - - - - Indicates lines resurveyed by Ty White, U.S.T., on dates shown thereon.

BOOK 3660

(2)

The resurveys and surveys hereinafter described were executed on dates shown on diagram on page 1 hereof, by Benjamin J. Kinsey and Ty White, U.S. Transitmen, using respectively Buff Rocky Mountain Favorite solar transit No. 9940, with U-shaped standards, $4\frac{1}{2}$ in. horizontal circle, 4 in. vertical circle, and improved Smith solar attachment; and Young & Sons transit No. 8540, with full vertical circle and Smith solar attachment. Unless otherwise specified, all azimuth determinations are accomplished with the solar attachments.

July 2, 1923: We examine the adjustment of each instrument and find no errors; then, to test the solar apparatus by comparing its indications during the a.m. and p.m. hours, with a meridian established by Polaris observation, proceed with each instrument as follows:

At camp, near the $\frac{1}{4}$ sec.cor. of secs. 13 and 24, T. 14 N., R. 2 E., Gila and Salt River Base and Meridian, Arizona, in latitude $34^{\circ}45'10''$ N., and longitude, $112^{\circ}06'11''$ W., at 1h. 02m. a.m., l.m.t., observe Polaris at eastern elongation, making four observations, two each with the telescope in direct and reversed positions, and marking the mean point in the line thus determined by a tack in a stake driven firmly in the ground about 5 chs. N. of instrument.

Azimuth of Polaris at eastern elongation = $1^{\circ}20'59''$.

July 3, 1923: Lay off the azimuth of Polaris $1^{\circ}21'$ to the west, and mark the meridian thus determined by a tack in a stake driven firmly in the ground about 5 chs. N.

July 8, 1923: At same station, at 9h.00m. a.m., l.m.t., set off $34^{\circ}45'N.$ on the latitude arc; $22^{\circ}33'N.$ on the decl. arc, and determine a meridian with the solar which agrees with the true meridian.

At apparent noon, with the lat. arc unchanged, observe the sun on the meridian; the resultant reading of the decl. arc is $22^{\circ}32'N.$, which agrees with the computed declination of the sun.

At 3h.00m. p.m., l.m.t., with the lat. arc unchanged set off $22^{\circ}31'N.$ on the decl. arc, and determine a meridian with the solar, which agrees with the true meridian.

As all of the observations made with both instruments during the usual hours of solar work come within $1'30''$ of the true meridian, conclude that the adjustments of the instruments are satisfactory.

All measurements are made with Lufkin steel tapes, 5 chs. in length, compared with a Chesterman standard steel tape, and found correct. The measurements are made on the slope, the vertical angles determined with clinometer, and the slope measurements properly reduced to true horizontal distances.

Resurvey of South bdy. of Township 14 North, Range 2 East.

Chains.

3

89

The east four miles of the S. bdy. of T.14 N., R.2 E. were surveyed in 1877 by C.B. Foster, U.S.D.S. in connection with the subdivision of the East four ranges of secs. in T.13 N., R.2 E., and the cor. monuments on said Tp. bdy. were established with a common reference to areas on both sides of the lines.

In 1917, G.F. Rigby, U.S.S., resurveyed the line between secs. 4 and 33, reestablishing the $\frac{1}{4}$ sec. cor., and the cor. of secs. 4, 5, 32 and 33, with original reference, and surveyed the remainder of the township bdy. W. from said sec. cor., establishing cors. thereon with reference to areas in T.14 N., R.2 E. only.

No other resurvey and no retracement of the line is of record.

As the subdivision lines and E. bdy. of T.14 N., R.2 E. have never been surveyed, the position of all cor. monuments on the line which refer to said township only, is subject to change, but in view of the fact that the East four ranges of sections in T.13 N., R.2 E. are embraced within accepted surveys, the position of the existing cor. monuments on the N. bdy. thereof, and their reference to areas in T.13 N., R.2 E. must be preserved, though their reference to T.14 N., R.2 E. may be destroyed if necessary.

The completion of survey of T.13 N., R.2 E., as described in Book "A" of this group, created a fractional township designated as T.13 N., R.1 $\frac{1}{2}$ E., between the original and new positions of the W. bdy. of T.13 N., R.2 E.; therefore the S. bdy. of T.14 N., R.2 E. is now identical in position with the N. bdy. of frac. T.13 N., R.1 $\frac{1}{2}$ E., and part of T.13 N., R.2 E. bdy. is now

The establishment of the cors. on the line referring to areas in frac. T.13 N., R.1 $\frac{1}{2}$ E. is described in Book "B" of this group as "Survey of North bdy. of frac. T.13 N., R.1 $\frac{1}{2}$ E."

The establishment of cors. on the line referring to secs. 5 and 6, T.13 N., R.2 E. is described in Book "A" of this group as "Survey of part of N. bdy. of T.13 N., R.2 E." and the reconstruction and reestablishment of cors. referring to areas in sec. 2, 3, and 4 of said Tp. is described in same book as "Resurvey of Part of the N. bdy. of T.13 N., R.2 E."

The following notes describe the resurvey of the S. bdy. of T.14 N., R.2 E., reestablishing cors. referring to areas in said township only at intervals of 40.00 chs. in easting, counting from the SW.cor. thereof.

From original closing cor. of frac. T.13 N., R.1 $\frac{1}{2}$ E., and reestablished closing cor. of T.14 N., R.2 E., described in Book "B" of this group, East, on true line, on S. bdy. of sec. 31.

Over rolling land, thru. very scattering timber and dense undergrowth. Ascend gradually over SW.slope.

BOOK 3660

Resurvey of East boundary of Township 14 North, Range 1 East. 9
Chains.

The East bdy. of T.14 N., R.1 E., was surveyed in 1871 by S.W. Foreman, U.S.D.S., establishing all cor. monuments thereon with a common reference to areas on both sides of the line.

In 1917, G.F. Rigby, U.S.S. surveyed the completion of the S.bdy. of T.14 N., R.2 E., established closing cor. of Ts. 13 and 14 N., R. 2 E. on the range line at 19.86 chs. N. of the original cor. of Ts. 13 and 14 N., R.s. 1 and 2 E., and reconstructed said township cor., changing its reference to Ts. 13 and 14 N., R.1 E. only.

No retracement or resurvey of the East bdy. of T.14 N., R. 1 E., is of record.

Preliminary to the survey of the West bdy. of frac. T.13 N., R.1½ E., executed under this group, the East bdrs. of Ts. 13 and 14 N., R.1 E., were retraced as described in Book "B."

In said retracement no trace of any sec.cor. or $\frac{1}{4}$ sec.cor. monument on the E. bdy. of T.14 N., R.1 E., could be found.

The true bearing and length of said Tp.bdy., as determined by the retracement was N.0°47'E., 474.84 chs., giving 12 intervals of 39.57 chs. each, for the reestablishment of the missing cor. monuments.

The following notes describe a resurvey of the E. bdy. of T.14 N., R.1 E., reestablishing the $\frac{1}{4}$ sec. and sec. cor. monuments referring to areas in said township only, at the proportional intervals of 39.57 chs., reestablishing a $\frac{1}{4}$ sec.cor. referring to sec. 31, T.14 N., R.2 E. at a point on the range line theoretically due W. of the $\frac{1}{4}$ sec.cor. of secs. 31 and 36, on the E. bdy. of said township, and then reestablishing the sec. and $\frac{1}{4}$ sec.cors. referring to areas in T.14 N., R.2 E. only; alternately at intervals of 40.00 chs. in northing, beginning at the reestablished $\frac{1}{4}$ sec.cor. of sec. 31 of said township, and placing the deficiency in measurement in the N.½ of W. bdy. of sec. 6.

From cor.of Ts.13 and 14 N.,R.1 E.,described in Book"B," of this group,

N.0°47'E., on true line, on E. bdy. of sec.36.

Over rolling land, thru dense undergrowth, nearly parallel to wire fence, about 140 lks.E. of line.

11.00 Descend 55 ft., over N.slope.

Center of wash, 360 lks.wide, course W.

19.70 Ascend 72 ft., over SW.slope, to

Intersect the closing cor.of frac.T.13 N., R.1½ E., and T. 14 N., R.2 E.,described in Book "B" of this group.

Continue line and measurement.

Ascend 24 ft., over SW. and W. slopes.

30.82 Wash, 10 lks.wide, course SW.Asc.30 ft. over SE.slope, to
(Proportional dist.) Set an iron post, 3 ft.long, 1 in.in diam., 26 ins.in the ground for reestablished $\frac{1}{4}$ sec.cor. of sec.36 only, with brass cap,marked

1S36

1023

No bearing trees available. Raise a mound of stone, 3 ft. base, 2 ft.high, W. of cor.

Continue nearly parallel to wire fence, about 110 lks.E. of line. Asc.37 ft., over SE.slope, to

52.40 (Theoretically due W.of the $\frac{1}{4}$ sec.cor.of secs.31 and 36 on the E.bdy.of T.14 N., R.2 E.) Set an iron post, 3 ft. long, 1 in.in diam., 26 ins.in the ground,for reestablished $\frac{1}{4}$ sec.cor.of sec.31 only, with brass cap,marked

1S.31

1923

No bearing trees available. Raise a mound of stone, 3 ft. base, 2 ft.high, E.of cor.

Ascend 40 ft., over SE. slope.

BOOK 3660

Survey of Subdivision lines of Township 14 North, Range 2 East. 27
Chains.

The south boundary of this township is defective in alignment; therefore, preliminary to the survey of the subdivision lines, begin at the cor. of secs. 25, 30, 31 and 36 on the E. bdy. and survey a Governing Section Line due west a distance of five miles, setting temp. cors. thereon at intervals of 40.00 chs., and from the temp. cor. of secs. 29, 30, 31 and 32, connect said Governing Section Line with the cor. of secs. 30 and 31 on the W. bdy. by a random line West, and true line easterly. The meridional sec. lines of the south tier of secs. are then surveyed from their respective sec. cors. on the S. bdy. in the normal manner, establishing the $\frac{1}{4}$ sec. cors. at 40.00 chs. S. from the Governing Section Line, and establishing the permanent sec. cors. at the several points of intersection of the meridional sec. lines with the Governing Section Line. The $\frac{1}{4}$ sec. cors. on the Governing Sec. Line are then established at midpoints between the sec. cors., with the exception of that part of said line situated bet. secs. 30 and 31, where the permanent $\frac{1}{4}$ sec. cor. of said sections is established at 40.00 chs. in westing from the cor. of secs. 29, 30, 31 and 32.

The survey of the subdivision lines of the north five tiers of sections is then initiated from the sec. cors. on the Governing Sec. Line, and executed in the normal manner, placing the deficiency in measurement against the N. and W. boundaries of the township.

From the reestablished cor. of secs. 35 and 36, on the S. bdy. of the Tp., hereinbefore described, N. 0° 1' W., on true line, bet. secs. 35 and 36. Over rolling land, thru. very scattering timber and dense undergrowth.

The continued satisfactory adjustment of the solar apparatus of the instruments used in the execution of the resurveys and surveys described in the foregoing notes is indicated from field tests described in Book "D" of this group.

GENERAL DESCRIPTION,

This township is situated in the Black Hills, bet. the Agua Fria and Verde Rivers, and lies partly within the Prescott Forest Reserve.

Ash Creek, with a general southerly course, drains the greater part of the Tp.

Grapevine wash, carrying an intermittent stream of water drains the NW.cor.

The elevation ranges from 3000 ft.in the south, to 5,500 ft. in the extreme northern part.

The soil under cultivation is black, sandy loam and 2nd rate in grade. Elsewhere, the soil is a rocky, 3rd and 4th rate.

The timber in the south half of the township is scattering juniper. with a growth of willows and cottonwood along the principal washes. In the northern part can be found a thick growth of yellow pine and oak..

The slopes throughout are covered with dense oak and buck brush, and in the north sections, thickets of manzanita and mountain mahogany.

Mine shafts, tunnels, and other improvements evidence the presence of mineral, especially copper.

Water can be found in a well, owned by W. Wilkins, in sec.7, a spring of good water at the Bottle Ranch, in sec.24, owned by Wm. West, who also has improvements, consisting of houses, barns, orchards and fences in secs.13 and 24. The same class of improvements can be found in secs.29 and 30, owned by Daniel McGilleland, who resides thereon, Joe Starneck in sec.33, and Joe Scisorilla, in sec.35, who also reside in the township.

The south, east and west parts of the township are traversed by fair wagon roads, the Dewey-Camp Verde Highway crosses the S.edge of the Tp.; the road in the NW. however, cannot be traveled by wagons beyond Wilkins well.

The lands are best suited for grazing and mining.
