OF THE RESURVEY OF THE

South boundary,

AND OF THE SURVEY OF THE

East boundary, andSubdivision lines ofTOWNSHIP 14 SOUTH, RANGE 8 EAST,Of the Gila and Salt River Base and Meridian,In the State of Arizona.

## EXECUTED BY

Charles E. Hunter,U. S. Transitman,

*In the capacity of U. S. Surveyor, under Special Instructions dated September 25, 1919  
issued by the United States Surveyor General to govern surveys included in Group  
No. 100, Arizona, which were approved by the Commissioner of the General Land  
Office, October 22, 1919, and Assignment Instructions dated December 1, 1924.*

Resurvey and Survey commenced December 21, 1924.

Resurvey and Survey completed January 17, 1925.

on dates shown thereon.

## BOOK 3672

Resurvey and survey hereinafter described, executed by Charles E. Hunter, U. S. Transitman, on dates shown on diagram on page 1 hereof, using Buff and Buff transit No. 10125. This instrument is equipped with full vertical circle and Smith solar attachment. Unless otherwise specified all azimuth determinations are accomplished with the solar attachment.

December 21, 1924: Examine the adjustment of the instrument and correct all errors; then, to test the solar apparatus by comparing its indications from observations made during a. m. and p. m. hours with a meridian established by Polaris observation, proceed as follows:

At camp near the center of sec. 13, T. 14 S., R. 7 E., G. & S. R. B. & M., Arizona, in latitude  $32^{\circ} 12\frac{1}{2}'$  N., longitude  $111^{\circ} 35\frac{1}{2}'$  W., at 9 h. 0 m., a. m., l. m. t., set off  $32^{\circ} 12\frac{1}{2}'$  N. on the lat. arc.,  $23^{\circ} 24\frac{1}{2}'$  S., on the decl. arc, and mark the meridian thus determined by a tack in a peg driven firmly in the ground 5 chs. N.

At app. noon with the lat. arc unchanged, observe the sun on the meridian, obtaining a reading of  $23^{\circ} 26'$  S. on the decl. arc, which agrees with the computed declination of the sun.

At same station at 1 h. 31 m., p. m., l. m. t., observe Polaris at western elongation, making four observations, two each with the telescope in direct and reversed positions, and mark the mean point in the line thus determined, on a peg driven firmly in the ground 8. chs. N.

Azimuth of Polaris at western elongation =  $1^{\circ} 17' 35''$ .

At 1 h. 45 m., p. m., l. m. t., lay off the azimuth of Polaris  $1^{\circ} 17\frac{1}{2}'$  to the west and mark the meridian thus determined by a tack in a peg driven firmly in the ground 8. chs. N. This meridian coincides with the meridian determined with the solar apparatus.

At 3 h. 0 m., p. m., l. m. t., with the lat. arc unchanged, set-off  $23^{\circ} 24\frac{1}{2}'$  S. on the decl. arc and determine a meridian with the solar, which agrees with the true meridian.

As all of the solar observations made during the usual hours of solar work come within 1' in arc of the true meridian, conclude that the adjustments of the instrument are satisfactory.

Unless otherwise specified all measurements are made with a Lufkin steel tape 5. chs. in length, compared with a Lufkin standard steel tape and found correct. The measurements are made on the slope, the vertical angles determined with clinometer and the slope measurements properly reduced to true horizontal distances.

## Resurvey of the South Boundary of T. 14 S., R. 8 E.

**Chains** This township boundary was surveyed in 1886 by George J. Roskruge, U. S. D. S., establishing all corner monuments thereon, with a common reference to areas on both sides of the line. No retracement or resurvey of any part of this line is of record. The following notes describe a resurvey of the entire line, reconstructing all existing corner monuments thereon by setting an iron post alongside each and altering same to refer to areas S. of the line only, and establishing  $\frac{1}{4}$  sec. and sec. cors. referring to areas N. of the line only, in proper alignment between the existing cors., at intervals of 40.00 chs. in westing, counting from the East end of the township boundary.

---

Retracement for Resurvey.

- From the cor. of Ts. 14 and 15 S., Rs. 7 and 8 E., described in Book "F" of this group.
- S.  $89^{\circ} 47'$  E., on random line, on N. bdy. of sec. 6, ( $W\frac{1}{2}$ )

40.20	S. $89^{\circ} 47'$ E., on random line, on N. bdy. of sec. 1 (W. $\frac{1}{2}$ ) Fall 12 lks. S. of the original $\frac{1}{2}$ sec. cor. of secs. 1 and 36, hereinafter described. True course and distance of W. $\frac{1}{2}$ of N. bdy. of sec. 1 are, therefore, N. $89^{\circ} 57'$ W., 40.20 chs.
	Thence
40.67	S. $89^{\circ} 47'$ E., on random line, on N. bdy. of sec. 1 (E. $\frac{1}{2}$ ) Fall 1 lks. S. of the cor. of Ts. 14 and 15 S., R. 8 E., originally the cor. of Ts. 14 and 15 S., Rs. 8 and 9 E., hereinafter described. True course and dist. of E. $\frac{1}{2}$ of N. bdy. of sec. 1, are, therefore N. $89^{\circ} 48'$ W., 40.67 chs.

RESURVEY.

The cor. of Ts. 14 and 15 S., Rs. 8 and 9 E., was established by G. J. Roskruge, U. S. D. S., in 1886, and retained such designation until May, 1920, when it was changed to cor. of Ts. 14 and 15 S., R. 8 E., only, by Guy R. Veal, U. S. Surveyor, as described in Book "B" of this group.

Reconstruct this corner monument as follows: alongside stone, set an iron post, 3 ft. long, 3 ins. in diam., 24 ins. in the ground for cor. of Ts. 14 and 15 S., R. 8 E., with brass cap marked

T 14 S	R 8 E	R 9 E
S 36		S 6
S 1		
T 15 S		
1924		

In addition to the three bearing trees described by Surveyor Veal in Book "B", establish a new bearing tree, as follows:

Palo verde, 8 ins. in diam., brs. N.  $27\frac{1}{2}$  W., 533 lks. dist., marked T 14 S R 8 E S 36 B T.

## Resurvey of the South Boundary of T. 14 S., R. 8 E.

- Chains Thence  
 N. 89° 48' W., on a true line on S. bdy. of sec. 36.  
 Over level land, thru scattering timber and dense undergrowth.

## Survey of the East Boundary of T. 14 S., R. 8 E.

**Chains** The following notes describe the survey of the East Boundary of T. 14 S., R. 8 E., due North to intersection with South Bdy. of T. 13 S., R. 8 E., where a cor. of T. 14 S., Rs. 8 and 9 E., is established. Two sets of cors. are established on the line, one set referring to areas in T. 14 S., R. 8 E., only, and the other to areas in T. 14 S., R. 9 E., only.

The  $\frac{1}{2}$  sec. cor. of sec. 36, T. 14 S., R. 8 E., is established on the range line at a point theoretically due East from the  $\frac{1}{2}$  sec. cor. of secs. 31 and 36 on the W. bdy. of said Tp., and the remaining cors. referring to the East range of secs. of said township are then established at intervals of 40.00 chs. counting North from said  $\frac{1}{2}$  sec. cor. of sec. 36, and placing the excess measurement in the N.  $\frac{1}{2}$  of E. bdy. of sec. 1.

The cors. referring to the West range of secs. in T. 14 S., R. 9 E., are established on the range line at intervals of 40.00 chs., counting North from the cor. of Ts. 14 and 15 S., R. 9 E.

The cor. of Ts. 14 and 15 S., R. 9 E., was reestablished in May, 1920, by Guy R. Veal, U. S. S., under this group when he surveyed the N. bdy. of T. 15 S., R. 9 E., and resurveyed the West Bdy. of same township, as described in Book "B" of this group.

From cor. of Ts. 14 and 15 S., R. 8 E. (originally cor. of Ts. 14 and 15 S., Rs. 8 and 9 E.), hereinbefore described.

North, on true line on E. bdy. of sec. 36.

Over level land, thru scattering timber and undergrowth.  
7.47 Intersect the reestablished cor. of Ts. 14 and 15 S., R. 9 E., described in Book "B" of this group.

Continue line and measurement.

## Survey of the Subdivision Lines of T. 14 S., R. 8 E.

**Chains** The South boundary of the township is defective in alignment, therefore, preliminary to the survey of the subdivision lines of T. 14 S., R. 8 E., begin at the cor. of secs. 25 and 36 on the E. bdy. of the Tp., and survey a sectional correction line due West for 5 miles, setting temp. cors. thereon at intervals of 40.00 chs.

The meridional sec. lines are then surveyed from their respective sec. cors. on the S. bdy. of the Tp. in the normal manner, and at the several points of intersection with the sectional correction line the permanent sec. cors. are established. The permanent  $\frac{1}{4}$  sec. cors. on the sectional correction line are then established at mid-points between the sec. cors.

The  $\frac{1}{4}$  sec. cors. on the meridional sec. lines are established at 40.00 chs. from the sectional correction line, placing the excess or deficiency in measurement against the S. bdy. of the township.

From temp. cor. of secs. 25, 26, 35 and 36, S.  $0^{\circ} 1'$  E., on random line, bet. secs. 35 and 36.

40.00 Set temp.  $\frac{1}{4}$  sec. cor.

80.11 Fall 17 lks. W. of the reestablished cor. of secs. 35 and 36 on S. bdy. of the township, hereinbefore described.

Thence

The continued satisfactory adjustment of the solar apparatus of the instrument used in the execution of the resurveys and surveys described in the foregoing notes is indicated from field tests described in Books "I" and "K" of this group.

GENERAL DESCRIPTION.

The surface of this township is level and nearly level sloping gradually to the NW. The soil is a sandy and gravelly loam, 2nd rate, and in some parts adobe, 2nd rate.

There is a scattering growth of timber in all parts, consisting of mesquite, palo verde and ironwood, also a scattering undergrowth of greasewood and catclaw is prevalent in all sections.

In rainy seasons a fair growth of grass affords some grazing.

There are no springs and no water courses carrying permanent flow of water. The drainage system consists of a great many dry washes, course NW.

An Indian, whose house is located in Sec. 15, near the NW. cor. of said section, is the only settler. He has a tract of about 40 acres in the SW. quarter of Sec. 10 enclosed by wire fence. The only other improvements in the township consist of fences. A fence bearing N. and S. enters the township about  $2\frac{1}{2}$  chs. W. of the cor. of secs. 33 and 34 on the S. bdy., extends N. about  $3\frac{1}{2}$  miles, thence NW. about  $\frac{1}{2}$  mile, thence West, leaving the township on an east and west bearing at about 2 chs. N. of the cor. of secs. 4, 12, 13 and 18. From this fence in the SE. quarter of sec. 33 another fence extends W. about  $2\frac{1}{2}$  miles, thence South, leaving the township on a N. and S. bearing about 20. chs. west of the cor. of secs. 31 and 32. There are no indications of valuable mineral deposits. Several roads traverse the township.

The south four miles of the third meridional section line, and the west three miles of the fourth latitudinal section line of this township forms part of the boundary of the Papago Indian Reservation, all of the township to the east and north respectively, of said section lines, being within said reservation. Secs. 16, 17, and 18, and the SW. quarter of the township are entirely outside the reservation. From the cor. of secs. 7, 12, 13 and 18, on the west boundary of the township, the bdy. of the Reservation extends North 11 miles, thence East thru the middle of T. 12 S., R. 8 E., embracing all of T. 13 S., R. 8 E., and the S. of T. 12 S., R. 8 E.

## **FIELD ASSISTANTS.**

to

Charles E. Hunter.      U. S. Transitman.

## CERTIFICATE OF UNITED STATES TRANSITMAN.

I, Charles E. Hunter, U. S. Transitman, hereby certify upon honor that, in pursuance of special instructions received from the U. S. Surveyor General for Group 100, Arizona, bearing date of the 25th day of September, 1919, I have well, faithfully, and truly in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instructions, and the laws of the United States, surveyed all those parts or portions of the South boundary, and surveyed all those parts or portions of the East boundary, and Subdivision lines of

TOWNSHIP 14 SOUTH, RANGE 8 EAST.

of the Gila and Salt River

Base and Meridian, in the State of Arizona, which are represented in ~~as set forth in said notes and by diagram on page 1 hereof~~ the foregoing field notes as having been executed by me, and under my direction; and that all the corners of ~~said resurvey~~ and survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the U. S. Surveyor General for Group 100, Arizona, and in the specific manner described in the field notes, and that the foregoing are the original field notes of such ~~resurvey and survey~~.

Place: Phoenix, Arizona

Date: October 28, 1925

*Charles E. Hunter*

U. S. Transitman.

## APPROVAL.

## OFFICE OF UNITED STATES SUPERVISOR OF SURVEYS,

Denver, Colorado, November 25, 1925.

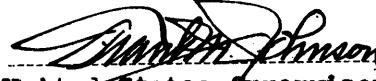

The foregoing field notes of the ~~resurvey of the~~  
South Boundary, and of the survey of the  
East boundary, and  
Subdivision lines of

TOWNSHIP 14 SOUTH, RANGE 8 EAST.

of the Gila and Salt River Base and Meridian, in the State of Arizona,

executed by Charles E. Hunter, U. S. Transitman,

under his special instructions dated September 25, 1919, for Group 100, Arizona, having been critically examined, and the necessary corrections and explanations made, the said field notes, and the ~~resurveys~~ surveys they describe, are hereby approved.

Franklin Johnson  
United States Supervisor of Surveys.

I certify that the foregoing transcript of the field notes of the above described surveys is

has been correctly copied from the original notes on file in this office.

U. S. Surveyor General
